STRENGTH OF NAVY WILL BE DOUBLED BY 1920 APPROPRIATION

WASHINGTON, Nov. 23.—America's naval strength will be about twice as great by 1920 as it was in 1917, the year the United States entered the world war, it was brought out today before the house naval committee in considering the 1920 naval appropriation bill. The total number of all ships will be about 800 as compared with 300 in 1917.

Twenty-four dreadnaughts will be included in the fleet. There are now 19. Three hundred and fifty new destroyers also will be completed by that time.

Rear Admiral Taylor, chief of the construction division of the navy, enumerating vessels added or to be added between 1917 and 1920, named 350 submarine chasers, 112 patrol boats, 35 or 40 submarines, 50 mine sweepers, 25 tugs and 5 dreadnaughts. Submarine chasers are now in commission, but will not be in 1920, he said.

The 350 destroyers in 1920 will be an increase of 250, the admiral said, and will be completed in 18 months. About 1000 vessels are now in the navy, including a number of converted craft, which will disappear.

GOVERNOR WANTS TO OPEN IDLE LANDS FOR OUR SOLDIERS

SALEM, Or., Nov. 22.—Plans of the Land Settlement Commission to interest the government in a gigantic nationwide move for the returning soldiers in the sub-division and development of large tracts of land, particularly as it applies to the immense acreage in the Willamette valley in Oregon, were divulged at a conference between Governor Withycombe, Whitney L. Boise, William H. Crawford, secretary of the Land Settlement Commission; George Quayle, of the Oregon development bureau of the Portland Chamber of Commerce, and Professor H. D. Scudder, of the Oregon Agricultural College.

The keynote of the situation was expressed by Governor Withycombe when he said that the Government financed the war in terms of billions and there is no reason why peace development should not be financed in the same terms.

While the returning soldiers figure largely in the proposed development plan, it will be open to all citizens, the primary object being to put to use the great waste lands portions of which are fine farm properties, but which are lying idle and undeveloped in many sections of the Willamette valley.
