Anticipated Drought Replaced by Showers

MACKSBURG, Sept. 15.—Those ubiquitous beings, the Prophets of Evil were sure, early in August, that we were to have an autumn drought that would destroy the potatoes and corn. That owing to the whole world's strikes our wheat crop must go to waste for want of men to harvest it. That sugar would continue rising in price till it was out of ordinary mortal's reach and that divers other calamities were in store for us.

Now that we have had a week of almost continuous rain, giving the pasture and all the late crops a new growth, that nearly every rancher has his grain threshed and put away before the rain began, that sugar is sold at less than half its highest price and still declining it would be interesting to know from whence came the knowledge upon which those dreadful prophecies were based.

Small satisfaction, however, would there be in trying to probe these hidden oracles to their source. As well ask the Egyptian Sphinx, by whom and for what she was created, as to question the pessimist as to her authority. He will simply tell you that he knows these things are to be and that is all.

Equally unshaken too is his equanimity upon being told that the time appointed for his disaster has passed without its happening at all. Never disconcerted is he. Diligently he sets himself at work to find and present to some unwary listener the gloomiest view of his affairs.

Whether we are depressed by adverse prediction to the extent of stifling our highest aims thus deflating our noblest effort, or whether we make it an incentive to increased diligence and perseverance depends entirely upon ourselves.

Someday we may listen to the darkest possible version of our prospects, if we remember that "The Hand that holds creation up shall guard His children well."

The Mother's Club held its regular fortnightly session on Thursday last at the home of its secretary and is to meet next on September 23, with its president, Mrs. John Hepler.

Both young people are life-long residents of this place and are highly esteemed by the community who join in wishing them a prosperous journey through life.

All of the public schools except the Eby have secured their teachers and are to open the first week in October.

Mrs. Buckley, the new rural school supervisor, attended the Community Fair last week.

The Fair was a success in every way. There was a good display of vegetables, especially corn. This community can raise corn that would do justice at the State Fair. Some was 11 feet tall. Mr. Russell had some dandy sorghum that was ten feet high.

Nearly all of last year's eighth grade graduates are attending high schools in Portland this year. R. L. Peake, whose son is attending Lincoln High, takes the pupils down every morning and brings them back evenings in his machine.

It is feared that the cannery which is being built here will not do very much canning this season. It was thought at first it would be ready in time to can the evergreen blackberries, which grow in such abundance here. However, the building is far from complete at the present time.

The "Happy Hour" Club met at the home of Mrs. R. L. Peake last Thursday.

Miss Genevieve Mumpower was out from Portland Tuesday.

Next year the convention will be held at Eugene.
