CANADA STILL THE BIG GAME HUNTER'S PARADISE

Albert Smith and his white deer. Although thousands of moose, deer, bear and caribou have been killed in Canada during the past few years, big game is still plentiful throughout the Dominion. Many fine moose heads are secured every fall in Nova Scotia and New Brunswick by hunters from the United States, but guides, game wardens and Hudson's Bay Company trappers estimate that the natural increase exceeds the kill. Last season Sam Smith and his son Albert led a party of sixty Indians hunters from Fort Wayne to the big game section of Maine along the Canadian Pacific. Each member of the party so promptly got his allotment of game allowed by law that the hunters returned home ten days earlier than they intended. Albert Smith had the rare fortune to shoot a white deer, a fine buck with well grown antlers. In Canada the range of sport is a wide one. There are moose, caribou, deer and black bear in Ontario, Quebec, New Brunswick and Nova Scotia, and in the Canadian Rockies there are mountain sheep and goats, grizzly brown and black bear, moose, caribou, deer, wolf, wolverine and mountain lion. The bull moose of Nova Scotia, New Brunswick and Quebec are noted for their size, and a wounded moose charging the hunter will give him all the thrills he wants. In the Canadian Rockies "Old Silver Tip," the solitary grizzly, charges down hill like an avalanche, but the expert hunter knows how to stop him before he gets too near. Two of the prized heads easily procured in the Canadian Rockies are those of the mountain sheep and mountain goat. Both are wary and wonderful climbers as well, but the hunter with good legs and good wind can get a shot at them.

JUST KIDS—The Fortunes of War.

BONUS BILL TO BE SHELVED IS LATEST REPORT

WASHINGTON, Dec. 8.—From reliable sources it was ascertained today that the senate will take the responsibility of saying there shall be no cash bonus granted soldiers of the world war at this session of congress.

The senate finance committee, deeply impressed by the report of Secretary of the Treasury Houston, will meet some time next week and definitely shelve the soldier bonus bill which passed the house in the last session of congress.

In the present state of the country's finances, in the view of senate leaders, the treasury must not be asked to stand any large grants of public funds that can possibly be avoided. Protesters come from everywhere for reduction in taxes, the leaders say, while the burdens already assumed by the government are so large that any relief looks difficult of accomplishment.

To add another billion dollars or more for a cash bonus for the soldiers at this time, it is said, would cause serious complications. This will not be done, it is explained, in any spirit of opposition to the war veterans' demands, but because present necessities make the greatest measure of economy imperative.

FORUM OF THE PEOPLE

OREGON CITY, Or., Dec. 3.—(Editor of the Enterprise.)—Due to an attempt upon the part of Dr. H. S. Mount to try to discredit my diagnosis upon the cause of death of Alexander DeFord who was recently shot while resisting arrest, I am forced through self defense to publicly state in the papers why he either through gross misrepresentation or gross ignorance has under oath made statements which are impossible.

That the man died from a confluent pneumonia of the type similar to that found in pneumonia following "flu," was and still is my clinical diagnosis. This diagnosis is concurred in by the two other physicians and surgeons whom I called into consultation on the case and statements from them can be obtained if necessary. Every physician and surgeon in Oregon City and Portland with whom I have talked regarding the case has concurred in my belief and against the possibility of death being due to Septic Peritonitis (Blood poisoning).

Dr. H. S. Mount has disregarded Medical Ethics and Professional Courtesy in trying to discredit me upon the day of the inquest he insisted that all information be obtained was confidential and his work was done at the request of DeFord's relatives. But upon promise of coroner that an autopsy fee would be paid he willingly testified that death was due to Septic Peritonitis.

The man died 31 hours after he was shot and his temperature was never above 99 degrees Fahr., and then only the first two times taken after admission to hospital. Thereafter his temperature was 98.6 degrees Fahr., normal. The first lesson taught me (and probably most physicians and surgeons) in Surgery at Medical School was that even the most virulent of septic conditions could and would not cause death of patients until generally 5 or 6 days afterwards and never under any circumstances before 2 or 3 days following infection and then only after a more or less prolonged fever.

Ask your family physician about it. Suffice it to say that all the physicians and surgeons practicing and living in Oregon City, outside of Mount's office have (in a signed statement protesting against the county court paying an autopsy fee of \$25 to Dr. H. S. Mount for such testimony when said autopsy was not ordered by a county official) stated that "No person ever succumbs to a septic condition as soon as 31 hours after the infection and then only after a more or less prolonged abnormal rise in temperature or fever."
