C., has been looking for an agriculturist that would be capable of filling the job for Clackamas county. Evidently Mr. Holt has proved efficient in the work, as Pullman college and O. A. C. highly recommended him to the county court and this community.

BLAST FROM STOVE KILLS THREE WOMEN

VANCOUVER, Wash., Mar. 1.—Mrs. Laura A. Miller, 28 year old; her daughter Marie, 5 years old, and her sister, Mrs. Beulah M. Daly, 25, were dead of the result of John Daly mistaking gasoline for kerosene to start a fire in the stove at the Frank Miller home at Brush Prairie yesterday. Miller was badly burned, but it is believed he will recover.

Daly recently sold his farm on Deer Island, and with his family was visiting the Millers. It was believed that there were live coals in the stove when Daly threw the gasoline in the stove.

Mrs. Daly and Marie Miller were in the bedroom on the lower floor, off the kitchen, and Mrs. Miller was upstairs. When the explosion took place it filled the lower bedroom with flames and the woman and child began screaming. Miller attempted to break the window to give his wife's sister and his child, and Mrs. Daly was seen to break the window pane, but was overcome before she could get out. An attempt was made to chop a hole through the side of the house to get them out, in vain. The woman died at the window and the child died on the bed.

Mrs. Miller, cut off from escape upstairs, jumped from the window. She was rushed to the hospital in Vancouver. She died last evening.

Mrs. Miller and Mrs. Daly were daughters of the late E. H. Dickson. Mrs. Miller was noble grand of the Rebekah lodge at Hockinson.

The funeral will be held from the Limber chapel in this city at 3 o'clock tomorrow, Rev. Charles Baskerville, pastor of the First Presbyterian church, officiating. The bodies will be taken to the Portland crematorium.

BOY ACTOR GETS \$65,000 AS AWARD

NEW YORK, Feb. 25.—An award of \$65,000 to George Wolcott, nine years old, stage and motion picture actor, for injuries received in an elevator accident last July, was returned by a supreme court jury here today. It was discovered that he would be unable to practice his profession in which he earned \$75 a week. The verdict, rendered after only ten minutes' deliberation, was against the Verboten Realty company.

The Metric System

The metric system, which measures everything in tens, is the logical basis for all human computations and measurements. The reason for this is that all of us are equipped with 10 fingers and 10 toes. From the time we are taught to say "this little pig went to market," our attention is directed to our digits. We normally count in tens.

Thus it would seem reasonable for this country to adopt the metric system and do away with our clumsy measurements of miles, pounds, bushels and gallons. Bills are even now before both houses of congress providing for such a change. All scientific work is done metrically. The system is universally used on the continent of Europe. Only England and the United States lag.

To be sure, it would be a difficult thing to accustom people to buy milk by the liter, to weigh goods by the gram and measure distances by the meter. France, when the system was put into effect there in the days of the revolution, suffered some inconveniences for a time. In fact, it was not until the period of the second empire that its use became universal.

Two million Americans who recently took a notable little journey to France are now more or less accustomed to the metric system. If the change is ever to be made in this country, this seems a good time. It will not mean that work will be any easier, or that the cost of living will come down. But it will mean that the arithmetic of business will be greatly simplified. Our money is already metric. Why not make our measurements of other things conform?

Any man will tell you that he gets inspiration out of smoking, but other folk do not notice that he is any smarter.

The sensitive woman who has a husband with deficient table manners is convinced that Job was a mere piker in the patience game.

When a man follows a dozen women in line at a cafeteria, he almost regrets that he voted for woman suffrage, especially if he has only half an hour for lunch.

SAYS TWANG OF YANKEE IS JAW DISEASE

WELLESLEY, Mass., Feb. 24.—Dr. Eugene C. Howe, professor of hygiene at Wellesley college, startled his class of girls today by declaring "Yankee twang" is due mostly to laxness of the jaw. That is not attributed to a lack of jaw exercise, but to an unaccountable failure to let the lower jaw fall far enough in articulating.

Students from New England, who are by no means in a great majority at Wellesley, are being urged by western girls to practice jaw calisthenics by wearing nonadjustable veils.
