TO DECIDE LIQUOR LAW, SAYS EVANS

Though insisting that the more stringent state prohibition statute takes precedence over the later Volstead act, District Attorney Evans Friday admitted that the prohibition enactment of the Oregon legislature went further than apparently was au thorized by the state constitutional amendment initiated by the people of

Oregon and passed November 3, 1914. Section 36, articles 1 of the Oregon constitution reads: "From and after January 1, 1916, no intoxicating li quors shall be manufactured or solo within this state except for medicinal purposes upon prescription of a licensed physician or for scientific, sac ramental or mechanical purposes." Yet the statute passed by the legis

lature, under which the prohobition law has been enforced-Chapter 141 of the general laws of 1915-prohibits the manufacture of any intoxicating li quor and the importation of ony except wine for sacramental and ethyl alchol for medicinal, scientific or me

"I have no doubt but that our law goes further than the constitution warrants," conceded Mr. Evans last night, "yet I have never heard of any case in the state courts which would test out the matter."

The recent ruling of the United States attorney-general making it pos sible for all alcholic liquors, including beer and wines, to be used for medicinal purposes and for all to be manufactured and sold for these purposes, subject only to the limitations of the Volstead act on non-beverage intexicating liquors, was thought not to affect Oregon by District Attorney Evans, unless courts hold in a test case that the provisions of the Oregon constitutional amendment are in effect the same as those of the 18th federa amendment, which forbids on ly the manufacture, sale or transportation of intoxicating liquors "for beverage purposes," but permits its me

dicinal use Local courts have taken the view that the state prohibition legislation has not been affected by subsequent federal enactments, but such opinions have been expressed only in the dis trict court, have not been of record in the circuit court in any county of the state, to the knowledge of the dis trict attorney, and has not been le cided by the Oregon supreme court Should the intent and purpose of

the Oregon constitutional amendment be held the same as that of the feleral constitutional amendment, it would follow that the manuafcture and sale of intoxicating liquors for medicinal purposes, on prescription, would be permitted in Oregon and that the restrictions of the statute interpreting the amendment in the state would

be declared unconstitutional .- Oregonwater.
