## Use of Poison Gas in World War Child's Play Compared to Future

By BRIG. GEN. A. B. FRIES, Chemical Warfare Division

The use of poisonous gas at the end of the World war was a child's game compared to what it will be in the future. The old type cloud gas that required the burying of cylinders in deep trenches, requiring the work of many men for many days to prepare an attack, is obsolete, but the modern method is a totally different matter.

A new American invention is the toxic smoke candle. It is a solid. safe and foolproof. It may be crushed, smashed, or punctured with bullets in the Circuit Court of the State of or shells without harm. It is only when a fuse is lighted and a heating mixture is agitated that a gas is given off. The candles may be very light or they may be heavy; they can be so small as to be carried in a knapsack. or so large as to require the efforts of many men. Its attacks are highly Helen S. Fahnlander, Defendant. efficient, more than 50 per cent of the total weight being poisonous gas.

Then there is a liquid gas, called "Dew of Death." If three drops of this liquid gas be absorbed into the skin, it will cause death in most cases. while smaller quantities will put a man in the hospital. This gas and the common mustard gas, which likewise burns the skin, can be sprinkled from airplanes in practically unlimited quantities.

#### HARMONY OF THOUGHTS IS ESSENTIAL

So Says V. I. Shepherd in His Lecture on Right Thinking.

"We recognize the importance of symmetry in architecture, of harmony in the arrangement of our offices and homes. Do we realize as keenly the necessity for symmetry in the unseen architecture of our minds and of harmony in the nature and arrangement

of our thoughts?" This question V. I. Shepherd asks in his Chautauqua lecture on "The House We Live In." His subject is a big one and all-important. He applies it to the everyday events of our lives and draws forth many conclusions that are new, interesting and extremely vital.

## SPOILED HIS "GOOD THING"

Youthful Financier Was Doing Splendidly Until His Mother Butted Into the Game.

"It's sure tough when a feller has business ability and is cleaning up money right and left and then his mother goes and spoils it all," said Tommy mournfully. "Why, I was making more money than any kid on the block."

"Weil, how did you make your money and why did your mother make you quit?" the boy was asked.

"The fellers around here never used to have any place to play marbles until I thought of my back yard," Tommy replied. "I used to charge them three cents to come into my yard and play. It really was worth the money, because in my place they had all the room they wanted and, besides, they would never get chased by the cop. At last I got about 20 to 35 costumers a day and my mother said she wouldn't let me run my business any more because the kids made too much noise."
