HEARING HELD; DOCTORS MAKE NO COMPLAINT

Medical Contract for Mills Said Satisfactory in Oregon City

Eight local doctors who protested against the contract between the State Industrial Accident Commission and the Doctors Mount of this city for medical service to two local paper mills, did not appear at the hearing which was held by the commission at 2 o'clock Thursday afternoon.

The doctors two weeks ago entered a protest against the contract system and asked that a hearing be held. The commission set the date for the hearing and the doctors, last Wednesday, directed a letter to the commission asking that the hearing be called off, as they believed that evidence would not be heard with an impartial mind on the part of the commissioners.

SYSTEM SCORED The complaint of the doctors, who are Ross Eaton, M.C. Strickland, W. E. Hempstead, W. H. Meisner, A. H. Huycke, C. A. Stuart, O. A. Welsh and G. E. Stuart, is based upon the fact that about a year ago the commission changed from the elective fee system to a contract system. Under the old method, any employee injured in the mills could go any doctor in the city he chose, and receive the benefits of the state industrial protection, and the commission would pay the doctor's fee. Because, according to the commission, the local doctors, with the exception of the Mounts, failed to cooperate along certain requested lines, the method was changed and the Mounts paid a flat salary for doing all of the medical work, attendant upon injuries to the employees in the mills.

In protesting against the holding of the hearing, the doctors stated that they did not feel that the commission would reverse its own action, and that no employees of the mills could testify without fear of losing their positions, due to the fact that the "employers have caused a feeling of grow up that if any of their employees appear in opposition to the present system they will lose their positions in the mills."

MEN NOT COERCED This latter allegation was denied by W. P. Hawley, representing the Hawley Pulp and Paper company and A. Bankus, of the Crown-Willamette paper company, who attended the hearing, at which the matter was informally discussed. Will T. Kirk and William A. Marshall, members of the commission were present to hear any protests against the present system. None, however, as the protesting doctors were not present, were made.

Mr. Kirk stated that he believed that the contract system, resulted in the saving of money and that it had worked far more satisfactorily than the fee system, due to the fact that he had found the other doctors in the city unwilling to cooperate with the nurse who had been installed in the Crown-Willamette mill.

W. P. Hawley pointed out that the number of accidents in the mills were less now than they were during the time that the fee system was in operation. No data upon this point was available, but Mr. Kirk stated that if, during a year's period, this proves to be the case, a readjustment of the salary paid the Mounts under contract, will be made.

The heads of the industrial plants expressed themselves as satisfied with the present system, but that they felt that if their employees desired some change, they would be perfectly willing to hear their complaints as the main object is the securing of satisfactory and speedy medical service for the men.

HEARING ASKED Mr. Kirk stated for the commission that while the local doctors who requested the hearing had been reported to have entered a protest against the holding of it at this time, no letter to this effect had been received by the commissioners before they left Salem at 7 o'clock Thursday morning.

Mr. Kirk stated that he had been informed that Phillip Hammond, counsel for the complaining doctors, had resigned from the case.

After the meeting, which was no more than an informal discussion as no case was presented for the protesting M. Ds the commission issued a statement covering the points in question, in which they said:

"Several days ago a delegation of Oregon City physicians, accompanied by their attorney, Phillip Hammond, called upon the Industrial Accident Commission, relative to the present arrangement for providing medical and surgical care for the employees of the two paper mills located here. They protested against the arrangement and asked for a hearing upon the matter. This request was promptly granted, and the date for the hearing was set for two o'clock Thursday.

NO COMPLAINT MADE "Members of the Commission and the employers were on hand at that hour, ready to hear any complaints or suggestions anyone concerned in the matter had to offer. But the doctors who asked for the hearing did not appear, and it has been suggested that the doctors would like to present their protests to the Commission privately and not at a public hearing.

"So far as the Commission is concerned, there is nothing under cover about this entire matter. All actions of the Commission have been open and above board, and they will continue to be so. The Commission is concerned in two things, namely, in providing the best possible service for men who are injured while under the protection of the Workmen's Compensation Law, and in holding down the cost of such service to a reasonable basis.

EDITORIAL—The Washington Editorial Association, recently resolved that no foreign advertising should be taken at less than twenty per cent discount from regular rates. No self-respecting newspaper would make gratification to outsiders, and the other side will not be healed. The country with the most country newspapers is that they hold their space too cheap. They will sell next to nothing any space they have, or all their space, regardless of the right of their readers to get what they pay for and get it into readable shape. Such papers look upon the electrolytic foreign advertisements as saving just so much composition, and they will run them by the year for a few cents an inch. The home advertised is the main stay of a good newspaper and in the distribution of favors he should come in for the best share. Foreign advertising is a mere accident in the business anyway.

GET OUT AND GET UNDER Water in Carburetor. One of the causes of an engine missing explosion, which is sometimes very mysterious, is water in the carburetor. If you have tried all other causes of skipping, try draining the carburetor. If some of the drainage is caught in the hand, the water will be repelled by the gasoline and be collected in globules.

Carburetor Adjustments. A great many car owners make the mistake of adjusting the carburetor when the engine is cool. Now it is always best to make adjustments to the motor after it has been run long enough to get thoroughly warmed through, and this applies equally to the valve tappets, etc. It is quite probable that the cold motor may operate very well on certain adjustments that will not agree at all with the hot engine.

When Motor Misses If a motor persists in missing when only a light load is being carried, before resorting to adjustment of the carburetor try making spark gap a little wider, presuming, of course, that the magnet is being used. On the other hand, if the motor misses when there is a heavy load on board, it may possibly be obviated by closing the spark gap slightly.

Inserting the Tube When inserting a new inner tube or replacing the old one which has been repaired, the inside of the casing should first be wiped out with a damp cloth to remove any sand or grit that may be present. A single sharp pointed grain of sand between the casing and the tube is very likely to force its way through the tube, causing a puncture. This is the real cause of many a mysterious puncture.
