## Graduation Held By Sandy Pupils

SANDY, May 29.—The commencement exercises at the I. O. O. F. hall Friday night marked another year of advancement for the union high school of District No. 2. The splendid program opened with "May Song" by the H. S. girls' chorus, which chorus sang very sweetly and presented a beautiful picture in their bright colored dresses. Miss Lippold's piano solo, "To the Rising Sun," was excellently played. Edith Hein's recitation well given and Dorothy Esson's solo, "An Irish Lullaby" was an attractive number. Miss Miller was in her best voice when she sang "Sunshine and Rain," which song was especially enjoyed. The speaker, C. B. Mitchell of the O. A. C. gave a splendid address on the subject, "The World Behind the Dollar." Casper Junker, president of the H. S. Board presented diplomas to the following: Ruby Dodd, Mildred DeShazer, Grant DeShazer, Carl Scharke and Bertha Hoffman, also giving each a bouquet of flowers. Mr. Junker also presented Bertha Hoffman with a conference scholarship, which will admit her to anyone of the five independent colleges of Oregon. This honor was conferred because of splendid scholarship and capable leadership in student activities. Mr. Junker also presided during the entire program.

The hall decorations were especially unique and beautiful. The stage was made into a semi-dome, covered with deep moss, the design being original with the class.

The hall was filled with an appreciative audience.

Miss Margaret Miller, who has been re-elected as principal of the union high school has gone to Portland to spend the summer at her home there. Miss Lippold has returned to Salem and will teach in the high school there. Her successor, and the commercial teacher have not yet been chosen.

## O. A. C. Man Speaks Of Old World Era

SANDY, June 31.—Prof. C. B. Mitchell of the O. A. C. in his address at the commencement exercises of the union high school here gave a portrayal of world conditions now existing first hand as he has recently returned from a tour of European countries where he made a special study of the psychological "atmosphere" of Russia, France and other countries, and has also kept up with the trend of things at home. Mitchell said the "dollar" is held so close to the eye, that the vision of the true and lasting things of life is darkened, giving many illustrations to prove his assertions. He referred to the Child Labor Law, which is now a dead letter, and already drives of little children from four years upward are rounded up in the cotton fields of the south. The struggle of greed to overcome the vital interests of life that the human desires and passions may be indulged to the exclusion of the Golly impulses were portrayed in a startling manner. Our leading magazines are publishing more articles on "financial success" than any other question. It was also suggested that only a change in fundamentals can save civilization from disruption.

Prof. Mitchell did not attempt to offer a solution for the problems of the sick self-illusioned world, but left it still gazing at the almighty dollar, saying, "conditions will have to work out."

A regret was expressed that too many students figure on taking only such studies as will bring quick financial returns, and were not willing to take the time necessary for a college education, judging the necessity of education from financial standards only, and urged the Sandy Class of '22 to enter college and hold the ideal of culture above the "dollar."

## The Woman's Column.

By Florence Riddick-Boys.

How much irritability we expose ourselves to and how much serenity we deny ourselves because of a dozen or more petty annoyances which we encounter habitually! It is a shame—also impractical, if, as our forefathers thought, "the pursuit of happiness" is really an end to the aimed at, why not hit some workable way of obliterating the peevish?

It's a pretty sensible sort of a plan. Not to worry over what we can't help—or can.

Let's see, what are the small peevish which make us explode into expletives about every so often? They are such as these: Johnny never empties the wash-dish, Susie leaves the soap soaking in the wash-water, Pa leaves his shaving mug out for Ma to put away, Ma hangs her dress on Pa's coat hanger, somebody always leaves muddy rubbers in the front hall, there's never a safety-pin to be found in emergencies although new ones are bought every now and then, someone leaves the tub dirty after his bath, somebody squeezes the tooth-paste tube from the bottom, and so on and so forth.

Could these occasions for the usual wail be eliminated?

It would do no harm to try. Call a family council and, by earnest conversation, agitate the matter. Start a systematic propaganda. Mutually agree upon laws and appoint detectives and executives to catch the culprit in the act, and administer justice. Then, when all is said and done, we may well do a little work on ourselves; toughen up the article that we will not be so sensitive, discard the chip from our shoulder abandon peevishness, cultivate a good forgivingness, and when it is wise to be a little blind or deaf or dumb, and, above all, adopt the smile that won't come off.

So may life become, indeed, "one grand, sweet song."

## WOMAN-TORIALS

Blessed is he (she also) who has found his work. Let him ask no other blessedness—Carlyle.

Buttonhole Contests

An interesting form of entertainment put on recently at a Farmer's Short course was a Button hole Contest with thimbles and sewing scissors as prizes.

Making Hats.

One hundred ten women made their own hats last winter in Nebraska under the guidance of the Home Millinery Project of the Agricultural College. These hats, which cost about \$1.50 apiece were valued at about nine dollars each.

Club Women Own Bird Sanctuary.

The Club Women of Florida own the four thousand acre bird reservation known as Royal Palm State Park. It has jungles vegetation like that of the West Indies. The Woman's Clubs started the park movement, later turned it over to the state, which now donates the park to the State Clubs.

Psychology As Is.

Doctors Baldwin and Stecher, of Iowa State University, are going at it right to study child psychology. They have a real-furure laboratory with twenty-four actual kiddies from two to four years of age in attendance three hours daily. These are observed, measured, medically inspected, played with, taught singing, rhythmic exercises, and stories. All sorts of devices, toys, tools, and pictures are provided to interest them and records are kept of how they react toward them, both individually and in groups. When they get through these doctors will be likely to know as much about children as the keen mother of a large family learns in her life time of experience. The idea of studying psychology out of a book!

Love of Children

There has been some anxiety, notably on the part of those who do not know the woman-heart, lest the new freedom reached by woman will unsex her—at least, will submerge her innate mother-love. Sociologists, scanning back over the ages, are not afraid. They tell us sex instinct and mother love are constants. Different forms they may assume from age to age, but

## Building Contract For Hi School Let

SANDY, May 29.—Sealed bids were opened Saturday morning at a special meeting of the union high school board of district No. 2 and the contract for a building was let to Frace and Proctor of Sandy. Six contractors of Portland were present, but their estimates were far beyond those of the local firm. Frace and Proctor expect to use local products and labor as much as possible. The plumbing contract was let to a Portland firm.

The building will be one story with full basement, and the basement will contain a basketball court, three recitation rooms and a heating plant. The size of the building will be 156x95 ft. Work will begin at once. C. Chappelle Brown of Portland is the architect.

Much favorable comment has been heard because of a local firm being awarded the contract.

Work on drilling the well was begun the first of the week, also the excavating for the basement.

## Attractive Region Will Be Opened Up

SANDY, May 30.—A. G. Jackson of the forest superintendents office and C. L. Henson, district ranger, were working on the first leg of the Salmon river trail last week. Construction work will begin in June. When completed, this trail will give increased fire protection to Salmon river water shed and will open up region of unusual attraction. The main Salmon river trail, beginning at the forest boundary, (which is near Tawney's mountain home) to Frog lake is approximately 21 miles. Only the first section is to be completed this season. The total estimated cost for the entire trail is to be \$16,600.

The crew, under foreman Ernest Harris of Sandy have completed the clearing on the Vine Maple Grove road. This road leaves the Mt. Hood Loop road one half mile above Rhododendron Inn and crosses both Ziz Zag river and Still creek. The Still Creek bridge is nearly completed, and stringers were cut for the Ziz Zag bridge last week.

## School Districts Form Federation

SANDY, May 29.—The Greenwood, Hillcrest and Sandyridge school districts were absorbed into the union high school federation Saturday by a majority vote of the seven schools comprising union high school district No. 2. Special meetings were also held at the incoming districts, Sandyridge voting against the union by a majority of one vote. However, the favorable vote of Greenwood and Hill Crest, which were unanimous, were sufficient to cement the union. As the union district now stands the valuation is over one million dollars, which will give financial solidity to the union, and will assure the building up a splendid high school.

With bids let for the new building and these districts coming in school interests are booming here, which is the surest base for the development of the young people, and for the general building up of this section of Clackamas county.

# To Finance the Farm

A record of income and outgo is just as necessary to the farmer as to the business man in order to figure profit on each year's operations.

The farmer who checks his money through this institution establishes a simple and correct record of his farm finances; provides banking protection for farm proceeds; enjoys convenience in the transaction of financial affairs, and indicates business methods and precision.

We invite the farmers of this community to thoroughly investigate this phase of our banking service.

## HOUSE CLEANING

Mix one part raw linseed oil with two parts turpentine. Add a little melted bees wax if you want more body to it to cover scratches.

Another furniture polish is made by using a light mineral or motor oil diluted with kerosene or gasoline. This is inflammable and must be carefully guarded as gasoline.

Scrub brushes or hair brushes may be washed with luke-warm water and a little ammonia or borax. They should be rinsed in clear water. Take care not to wet the back of the brush in which the bristles are set or this may loosen the bristles. Have the water shallow in the basin and souse them up and down. Dry the brush with the bristles down or the brush tipped on side. Do not dry in intense heat. Sunbaking whitens the bristles and is a sanitary agent.

Empty the box of the carpet sweeper over a dampened newspaper and then roll the paper and contents up to be burned. Oil the mechanism occasionally and remove the brush and clean it. Pull the strings and hair from brush with a button hook or clip them with the scissors. Investigate the hubs of the small wheels at the sides. These are likely to be wound around and clogged with string and hairs which should be clipped and pulled out.

Mix a little powdered sugar with boracic acid and put around baseboard where roaches and water bugs collect and it will kill them off.

TWO DAYS ONLY

No Charge for Consultation

Dr. Mellenthin is a regular graduate in medicine and surgery and is licensed by the state of Oregon. He visits professionally the more important towns and cities and offers to all who call on this trip free consultation, except the expense of treatment when desired.

According to his method of treatment he does not operate for chronic appendicitis, gall stones, ulcers of stomach, tonsils or adenoids.

He has to his credit wonderful results in diseases of the stomach, liver, bowels, blood, skin, nerves, heart kidneys, bladder, bed wetting, catarrh, weak lungs, rheumatism, sciatica, leg ulcers and rectal ailments.

If you have been ailing for any length of time and do not get any better, do not fail to call, as improper measures rather than disease are very often the cause of your long standing trouble.

Remember above date, that consultation on this trip will be free and that his treatment is different.

Married women must be accompanied by their husbands.
