International Bankers

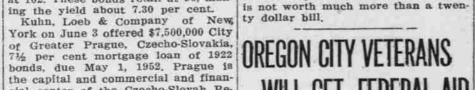

An international commission of bankers, appointed by the Allied Reparations Commission, met in Paris the last week of May. For the purpose of attending this meeting, America's foremost financier, Mr. J. P.

Morgan, went abroad, and Paris dispatches stated that Mr. Morgan "was seated at the right hand of Chairman Delacroix." The stated purpose of the meeting was "to investigate the possibilities of an international reparations loan and temporary settlement of the reparations problem," and the application of Germany for a loan of drants. The solution is made from pure bark and scrap rubber. The experiments so far show that this solution is easier to handle than tar. It is secret formula and the inventor is still working toward its perfection. The idea of using rubber for roads has been almost exclusively confined in the past to rubber blocks, the cost being very high. The cost of the liquid-rubber road dressing is 50 to 75 per cent more than that of tar. but it is found that a tar dressing in Ceylon must be renewed every three or four months, while rubber dressing is expected to last from eight to nine months or longer. It is anticipated that a slight difference in the cost of material, in favor of the rubber dressing, will be found that labor cost will be reduced 50 per cent at least, and that a better road surface will be procured.
