The Receipt for Getting Something for Nothnig Has Not Yet Been Discovered

Nearly everyone is given an opportunity these days to invest money in doubtful investments offering high rates of interest. Some few people are taking their hard earned money to buy stocks in enterprises that promise big returns in their glowing prospectuses. Others-and happily the great majority-prefer to keep their money in the bank, where they know it is absolutely safe, constantly earning interest and ready for them when they really want it. If you are approached by someone who offers amazing profits just remember that the recipe for getting something for nothing has not yet been discovered. Be safe. Don't Be Sorry
