DEEP INVESTIGATION OF GASOLINE PRICES MADE

WASHINGTON, Aug. 5.—The sweeping scope of the gasoline price investigation by the special senate committee was revealed today by Senator McNary, Oregon, as he announced hearings would be started Monday.

Five phases of the present situation, in which the country has a record-breaking reserve of gasoline with sky-high prices, will be investigated.

According to McNary these are:

- 1—Whether there exists unfair competition or monopoly in the industry.
- 2—Whether the fluctuations in export and imports have had a material effect on domestic prices.
- 3—Whether increased transportation costs, including installation of new pipe lines, have caused the recent "skyrocketing."
- 4—What is the present rate of consumption, which producers claim has increased enormously during the past few weeks.
- 5—Whether the portage of coal, due to the nationwide mine strike has, by creating new demands for fuel oil, had any effect in the price boosting.

Banks of Lorraine and Alsace Suspend German Payments

PARIS, Aug. 5.—Measures of retaliation against Germany for failure to promise payment of \$10,000,000 in pre-war commercial debts were taken at noon today.

The government ordered the banks of Alsace and Lorraine to suspend payments to German depositors.

Threats to seize and operate the coal and iron mines of the Rhineland and to make the disputed territory an autonomous state have not materialized.

The installment on the debt is due August 15 and Germany was given until noon today to state whether or not the obligation would be met.
