CONTRACT IS LET FOR CITY HALL ON TENTATIVE BASIS

J. G. Smith and Company To Start Work As Soon As Bond and Alterations In Plans Get Final Approval.

OBJECTION MADE TO DEPOT COMPROMISE

H. C. Stevens Warns Council that Street Concession Will Be Fought by Injunctions.

The contract for the building of the city hall was tentatively awarded by the city council last night,

The original plans drawn by Edmund Bergholtz, Portland architect, will be followed, with some slight modifications, J. G. Smith and Company have arranged for the posting of surety bond for the construction of the building within the \$35,000 bond

At the special session called for the purpose of considering the plans. Bergholtz presented a draft for a bond for \$16,000 with the Aetna Casualty company to the effect that Smith would undertake the contract and carry it to completion within the limit given. The council had threatened previously to throw out the plans, and call for a new design unless the architect could guarantee that it be built within his estimates.

Heating System Included

The contract for \$35,000 includes the building at Singer Hill, the wiring, plumbing and installation of the heating system. The \$1,750 fees of the architect are in addition to the \$35,000. and will be paid through interest already accumulated on the unsold

The changes in the plan will include the leaving of the first and seond basements unfinished. The basement proper, containing the jall corridors, will be finished through minor changes, in the elimination of partitions and heating fixtures in unused portions of the space, will be made.

The construction in the main will be unchanged. The art stone which was provided on the exterior will be done away with and brick facing used in its stead. The scroll plastering work in the auditorium will be eliminated and smooth finish substituted. Charges in the columnar arch construction of the doors and windows will be simplified to lower the cost.

Conditions are Named

Thecontract is contingent upon the arrangement of the bond satisfactorily and the detailing of atl of the changes which are to be made in the design. Wm. Howell water commissioner

objected strongly to the contract. He objected to the site on which the building way to be constructed, objected to the changes in the plans and objected to the bond as not inclusive of the entire term of the contract. Dr. H. S. Mount voted against the con tract on the ground that the bond issue required the entire construction for \$35,000 and that the payment of the architects' fees in addition was without the spirit in which the bond issue was passed.

* Councilmen Metzner, Cross and Bridges defended the location and the contract, urging its adoption pending the arrangement of all of the necessary details. Van Auken, the fifth member present, also voted for the awarding of the contract. Carl Green speaking to the council, urged the completion of the hall at the earliest possible period.

Depot Plan Protested

Indication that a fight may be started over the plan for the new S. P. depot here was seen in the objection of H. C. Stevens to the proposal to allow the 41 foot extension of the present building, which would take small portion of Railroad Avenue and Sixth street. "Any attempt to encroach upon Sixth street will be met with an injunction and the matter carried to the supreme court," he said. The statement was made following a communication from the Live Wire committee asking that the council grant permission to the company to make the extension. A communication objecting to this move was presented by Wallace B. field, representing the Pacific Highway Garage. Both communications were filed and no action taken, upon pretty little antarctic titlarks, the only the suggestion of Councilman Metz- | land bird of the Far South, whose ner, pending the introduction of the necessary ordinances which would bring the matter up for formal dis-

A communication form L. T. Charman offering the city a 30 by 65 foot piece of property on Water street between Ninth and Tenth was consid ered. Charman made the condition that the space be used for the hous ing of fire apparatus and that a suitable building be built within a year. As a further condition he would re quire the pavement of Water street within that block without expense to the adjacent property. The tender was rejected on the motion of Councilman Cross, and an attempt to amend the motion so as to refer the matter to the fire and water committee, made by Councilman Metzner, was ruled out of order by the mayor,

The matter of the construction of a new bridge across the Abernethy was referred to the street committee and city engineer for/plans and a tenta tiv outline of procedure pending the arrangement of next year's budget. A petition for the improvement of Hilda street on the C. T. Tooze addition was referred to the same committee.

DEAN OF BRITISH JOURNALISTS DIES

William Burke, Infamous Irishman, Also Instrumental in Adding

MADE BUSINESS OF MURDER

Significant Verb to Language.

Burke and Hare were two notorious

body-snatchers, or resurrectionists, who carried on their infamous trade in Edinburgh. William Burke was born in Ireland in 1792, and went to Scotland as a laborer about 1817. In 1827 he was living in a cheap lodging house kept by another Irish laborer named William Hare, About the end of 1827 one of Hare's lodgers, an army pensioner, died, and Burke and Hare sold the body to Dr. Robert Knox, an Edinburgh anatomist. Hare thereupon suggested body-snatching as a business and Burke agreed. The two men then started in to entice poor travelers to Hare's or some other cheap lodging house. The victims were plied with liquor and then suffocated under mattresses, without marks of violence. Doctor Knox took the bodies and paid up to £14 (\$60) for them. At least 15 people had been murdered in this way before Burke and Hare were arrested. Hare turned king's evidence, and Burke was found guilty and hanged in Edin-Hare burgh on January 28, 1829. found Scotland too hot for him and went to England, where he is believed to have died under an assumed name. focate, to strangle, to suppress, or to put out of the way secretly, had its origin in Burke's method of doing away with his victims.

WHERE GREAT EXPLORER LIES

South Georgia Island, Tomb o Shackleton, Lonely Spot in the Great Antarctic Region.

An interesting picture of life in

South Georgia island, the "Gateway of the Antarctic," where Shackleton was buried, was given by an explorer who made a research expedition there a few years ago. At that time there was only one woman on the island, and she was the domestic in the household of Capt. C. A. Larsen, a former Antarctic explorer who had settled down as head of a Norwegian whaling station on the island. "Below my solitary tent," the correspondent writes, "the grassy bank sloped sharply to a milk-colored glacial stream entering an inlet of the sea only 50 yards away. A quarter of a mile across the inlet stood the perpendicular front of a beautiful valley glacier, coming down between peaked hills from the lifeless, silent Interior. Penguins bobbed out of the sea below the glacier and were my most interesting callers for their curiosity could not resist a human being. Sea elephants crawled unconcernedly up the stream below me and went to sleep among the hummucks on the beach. Above the tent, on the plateau of the little promontory, seven pairs of albatrosses carried on their courtship and nesting, along with giant petrels, skuas, kelp gulls and the cheerful song was almost the sole homelike sound."

Details Needed.

A woman, blessed with a masterful disposition and considerable property. died, leaving behind her a will in which her husband was cut off with a dollar, on the ground that he had deserted her a year before.

The lawyer finally located the man and broke the news gently by telling him that he had received only a small bequest.

"How much?" carelessly asked the

"One dollar." With the same carelessness, the man turned toward the door. Just as he' reached it, however, a sudden thought

struck him. "Say," he called back anxiously. "Did she specify what I was to do with this dollar?"

Sarcasm From the Grave. The will of Alexander Louis Teixelra de Mattos, the English transla tor of Fabre, Maeterlinck, Couperus, Zola and many other continental writers, contains one bequest that will

interest a good many booklovers who have loaned their favorite volumes not wisely but too well-at any rate, too generously, says the Living Age. The estate of Mr. de Mattas was not large, its gross value amounting to less than £3,000 (\$15,000), and many of his bequests take the form of books, He leaves books to many of his friends. One volume in particular is left to a certain friend and is described as one "which he borrowed many years ago and has not returned."

Increased Tractor Power. A new attachment designed to give the small tractor greater bearing area and increased pulling power, replaces the round wheels with two large sprockets, according to an illustrated article in Popular Mechanics Magazine. Outside of each sprocket is a cast-steel arm which projects forward and downward, carrying at its front end a smaller idler wheel. A track tread passes around the sprocket and idler wheed, giving the tractor increased bearing area.

Lightest of Liquids Many experiments here and abroad have shown that liquid hydrogen is by far the lightest of all known liquids. Its density is one-fourteenth that of water, and, curiously enough, this happens to be the same ratio of density that hydrogen in the gaseous state bears to air. For long the lightest liquid known was liquified marsh gas, which possesses about two-fifths of the density of water.-Washington

POSSIBLY SLIM WAS RIGHT Come to Think of It. His Inamorata Hardly Displayed the Ardent Love

He Had Looked For. "Funny how a guy makes up his mind to enlist," remarked Slim, the company clerk, to a bunch of his buddies in the bunkhouse.

"What made you decide to take the big plunge?" asked a buddy.

"It was this way," explained Slim, "I had a little squabble with the girl. and I told her I was going to join the marines. Just to make it sound as if I meant business I wrote a letter to the nearest recruiting station, and before sealing the letter up I let her read

"Did she say anything?" asked the

"Not a word. So I went out and posted the letter. A little later I gets the answer back, saying I could enlist for two, three or four years, and I shows it to the girl. There you are, says I, 'If you don't treat me different from now on, I'll go straight out and enlist for two years."

"'Two years,' says she. 'Two years! Ah, don't be a piker, Slim, why don't you make it four? "Come to think of it," concluded

Slim, "I don't think that Jane was as bughouse about me as I calculated."-The Leatherneck.

CALLS FOR NERVE AND SKILL

Hunters of the Sword-Fish Find Their Prey Altogether "Worthy of Their Steel."

Sword-Fish schooners are the fastest fishing-boats under sail in the world. They have to be, for the sword-fish is a fast mover. He is a fighter, too. Often has he charged a ship and driven his "sword" through her stout planking. When a school of sword-fish is sighted, the spearman goes for ard to the end of the bowsprit and gets into the "pulpit," an iron fitting at the end of the spar, where he stands to drive his lance into a fish. The line attached to the spear rushes out of the tub in which it is coiled, and the tish makes off, doubling his speed in a vain effort to escape,

A good-sized fish will often fetch as much as \$40; but it is a hard life, and it needs fine seamanship in the chase amid the huge seas of the

Atlantic when bad weather prevails, The swo di is widely distributed in the ocean, but is most common off the North American coast. Its average length is 7 feet, but some are 12 feet or 15 feet. The "sword" is used to spear its prey, such as cod, tunny and mackerel, and even to attack whales. REHOWNED AS GREAT RULER WILLARD P. HAWLEY JR. Roman Emperor, Trajan, Spread the Boundaries of the Empire and Governed Justly at Home.

The Roman emperor, Trajan, whose full name was Marcus Ulpius Trajanus, was born about the year 56 at Italica in Spain, which was then a Roman province. He was trained for a military career and gained distinction in the Parthian and German campaigns, and after holding two civil offices was adopted by the Emperor Nerva, whom he succeeded on the imperial throne in the year 98. The greater part of his time as emperor was spent in the field commanding his troops. His first campaign was carried on beyond the Danube against the Daelans, whom he conquered after a long struggle. In the conquered country he planted a Roman colony, and the descendants of those colonists are the Roumanians of today. Trajan's next war was carried on in the East. He made Armenia and Mesopotamia into Roman provinces, but suffered defeat at Cteslphon, not far from Kut-el-Amara, where a British force was cut off and compelled to sur render during the World war. In his rear the Jaws of Cyrus and Cyrene rose in revolt and made fearful massacres, and disorders also arose in the West, Trajan returned to the coast and took ship for Italy. His health was broken and while on the journey he died at Selinus in Cilicia, Asia Minor, in August, 117. Trajan found time to accomplish much in the internal improvement of the empire. He beautified Rome; he constructed canals, great military roads, and harbors, and built up towns. Law was enforced and justice fairly administered.

FISH MISTAKEN FOR VESSEL

Peculiar Appearance of Swordfish Gave Rise to Many Strange Stories Concerning It.

In the warm waters of the Indian ocean there lives a strange mariner, who is the cause of many tales among the natives of the near-by coasts. They tell of a wonderful sail often seen it the calm seasons, when not a breath disturbs the water, and the sea rises and falls like an immense sheet of glass. Suddenly a sail appears, apparently driven along by a mighty wind. This sail glistens with rich purple and golden hues. On it comes quivering and sparkling as if covered with gems; then, suddenly, it dis appears as quickly as it came!

Many travelers have listened with unbelief to this strange tale, until one day, this beautiful craft passed directly under the stern of a passing vessel, and it was seen to be a gigantic swordfish which is now known as the "sailor-fish." The sail was really an enormously developed dorsal fin, over 10 feet high, and richly colored with blue and iridescent tints. As the fish swam along near the surface of the water this great fin waved to and fro, so that from a distance it was easily mistaken for a sall.

Father of Three Kings.

Charles Bonaparte, father of the great Emperor Napoleon, was a humble lawyer, with no very extensive practice, in the sleepy little town of Ajaccio in the isle of Corsica. He seems to have been a most affection ate and exemplary parent, and as the father of three sons who became kings (Joseph, king of Naples and Spain Louis, King of Holland, and Jerome, king of Westphalia), and a fourth who became the greatest military com mander, monarch and king-maker of nodern times, he holds an unique place in history.

There were thirteen children in the family, Napoleon being the second. Charles Bonaparte, although hardly well-to-do, strove to give his sons the best possible education, and had he not decided to send Napoleon (then aged ten) to the military school at Brienne, the whole course of the world's history might have been changed.

Word "Lot" of Puritan Origin.

The use of the word "lot" to designate a field or plot of land, is universal in the United States. It had its origin among the Puritans, and was the product of their strict adherence to Biblical customs.

Among the early settlers of New England the extensive salt-marshes from which the salt-hay was cut, were owned in common, every man helping himself to as much hay as he wished. As the population increased this condition could not prevail with general harmony, and it was agreed to divide the marshes equally among all the families. This was done by the Bib- 3,400 machine, and 2,100 hand lical fashion of lot and the portion which fell to each man was known as "his lot." In a short time the word came to apply to any piece of land, and finally reached the meaning of any great quantity.

Survival of Old Roman Custom. The custom of appointing prominent citizens to act as a guard of honor at a great man's funeral is the survival of an ancient Roman custom. The name "pallbearers" also descends from the old days in the "City of

the Seven Hills." "Pall" comes from the Latin word 'palla," the long sweeping robes worn only by priests and men and women of the highest standing. When a great personage died his "palla" was thrown over his coffin and a number of his distinguished friends were permitted to "bear the palla" to the grave and to act as guard of honor to the dead.

Breadened Observation. "A statesman has to be a profound

student." "No doubt about it," replied Senator Sorghum. "Time was when a good campaigner could get by if he kept his eye on the map of his own state. Now you've got to be an expert in the geography of the world,"

World's Largest Reservoir. In about two years London's reser voir at Littleton will be the largest artificial reservoir in the world. It will I hold water to supply London for a month, or 6,500,000,000 gallons, Its surface will cover 800 acres.

TO WED PORTLAND GIRL

Engagement to Daughter of Phil Metschan Announced at College Club Luncheor.

The engagement of Miss Dorothy Metschan, daughter of Phil Metschan, president-manager of the Imperial Hotel, Portland, to Willard P. Hawley, Jr., was announced yesterday at a luncheon at the University club in Portland. Miss Metschan is regarded as one

of the most beautiful and popular young ladies of Portland's younger! set and was chosen as queen for the 1921 Rose Festival. She is 21 years of age and is a graduate of Mills col-

Hawley is general manager of the Hawley Pulp and Paper company, of this city, and the son of Mr. and Mrs. Willard P. Hawley, Sr., of Portland,

WOMEN'S TENNIS TITLE WON BY VIRGINIA SHAW

Miss Virginia Shaw won the men's singles championship in the Baraca Club tennis tournament by defeating Mrs. Gladys Fuge 6-2, 6-0, and A. Locke and J. Trimble defeated G. Hankins and Virginia Shaw 8-6, in a one set exhibition doubles match. The tournament is drawing to a close and although delayed by rain

during the earlier part of the week it is expected that the final matches will soon be played in both the men's singles and doubles.

ORIGIN OF "BULL AND BEAR"

These Common Terms Go Back to the Early History of the British Stock Exchange.

So well established have the terms "bull" and "bear" become that they are defined even in the least colloquial of dictionaries as "one who speculates or wagers upon a rise in stocks" and "one who speculates or wagers on a fall." The commonly accepted explanation of the use of the terms formerly was that the bear claws or pulls the stock down, while the bull tosses it up, at it were, on his horns, But this is really nothing more than a guess, and the real origin of the phrase "bull and bear" is buried somewhere in the early history of the British stock exchange.

Here, says the Detroit News, it appears that the earliest use of the idea was in the proverb about "selling the bearskin before one has caught the bear," which was applied to all transactions on the exchange or elsewhere where there was no immediate transfer of goods, but only a payment to be made at some future time according as the goods had advanced or receded in price.

In "The Anatomy of 'Change Alley," published in 1719, occurs the sentence: "Those who buy Exchange Alley bargains are styled buyers of earskins," and in 1744 the terms ap pear to have come into common usage for the London Magazine of that year refers to "bulls and bears," while George Coleman, in his "Man of Business," uses them in precisely the same sense in which they are employed at the present time.

HOW MANY STITCHES IN SUIT?

Some Patient Person Over in England Has Estimated That They Number About 45,000.

There are approximately 45,000 stitches in the average man's suit of | change. clothes, according to an announcement recently made in an English paper by some amazingly patient and observing person, presumably a tailor. This result is reached by the following calculation:

To the average-size pair of trousers, 8,000 stitches are allotted. Of this number about 5,800 are machine made, the rest being made by hand, chiefly in the form of finishing work to the waist, pockets and turn-ups, or

"cuffs." In the vest or waistcoat there are, he declares, roughly, 5,500 stitches, in this garment than in the trousers, the lining usually being put in entirely by hand-made stitches, as well as the finishing work. The figures are

stitches. But it is in the coat that the big totals come. In that garment, he says, there are, on an average, 30,000 stitches. The pockets and the large number of seams account for much machine work, while the lining and refinishing entail many hand-made stitches. Of the latter there are more than 8,000 in the average coat. There are also to be taken into consideration the tacking and fitting stitches, which, as above announced, brings the total up to something like a round

-The Bello-Pacifist.

"H. G. Wells is known in Europe as a bello-pacifist, and truly his recent peace articles have stirred up a lot of bitterness and strife."

The speaker was Stephen Lauzanne, the French publicist. He went on: "Wells reminds me of the cantankerous individua! who was about to be married. When he came to the church on the wedding morning he warned the minister beforehand that Molalla Highway he didn't want any fuss.

"He consented, however, to station himself in due form at the flowerdecked altar, but as the minister proceeded with the ritual he got more and more impatient. Finally, when he was asked if he, Henry, dill take closed to traffic yesterday for an inthis woman, Jane, to be his lawful wedded wife and so on, he gave a snort before the question was half through, and then turned to the congregation and said in a loud, jeering

voice: "Well, I guess I came here with that intention."

FEARED BAD LUCK PERIODS Aztecs Believed That Evil Fates Ruled

World During the Last Five Days of Year.

The Aztec calendar consisted of a year of 18 months of 20 days each, which it was believed all the bad luck of the year was crowded. No one started upon a journey during these five days, for fear some misfortune would befall him; no woodcutter ventured into the forest to hew wood during this period, lest wild beasts should devour him; the houses were left unswept; the housewives made no pottery vessels; children so unfortunate as to be born on one of these five days were by that very fact predestined to misfortune for the rest of their lives.

The next, and among the Aztecs the only time period higher than the year, was the xihuitlmolpia, or cycle of 52 years. It was held that at the close of one of these periods would some day come the destruction of the world.

On the last night of the xihuiti molpin fires were extinguished on the hearths, and the inhabitants of Tenochtitlah (City of Mexico) moved out of the city and took up positions on the surrounding hills, waiting feverishly either for the destruction of the world or, in the event of sunrise, the dawn of another xihuitlmolpia. Once the sun had arisen, however, great were the rejoicings. Fires over for another 52 years.

NONE CAN EXPLAIN "AURORA"

Northern Lights Said to Be Due to Passage of Electricity Through the Air.

The aurora borealis (or northern lights) is occasionally seen in the north temperate zone and frequently in the polar regions. It is said to be due to the passage of electricity through the rarefied air of the arctic zone. The name "aurora borealis" was first used by Cassendi, who, in 1621, observed one in France, and wrote a description of it. The "aurora" is periodic in its manifestations, the finest displays being at intervals of 60 years, and less marked ones at intervals of 10 or 11 years. It is also asserted that these greater and lesser displays correspond with the increase and decrease of spots on the sun. The phenomenon is generally manifested in the following way: A dim light appears on the horizon shortly after twilight, and gradually assumes the shape of an arch, having a pale yellow color, with its concave side turned earthward. From this arch streams of light shoot forth, passing from yellow to green and then to brilliant violet. The name aurora australis (or southern lights) is applied to a similar phenomenon visible in the vicinity of the South pole.

When Joking Is Dangerous. Husbands should be careful how they spring jokes at the table. And wives should be alert on guard against the consequences of a surprise that amounts to a shock in certain cases such as that at New York re-

cently, for instance. Men who toss off jokes at the table nd cause their wives to laugh so suc denly that they pull a piece of meat into the trachea and choke to death have a grave responsibility. Of course, the habitual loker who gets a fresh stock every week runs no such risks. His wife is immune to laughter at his "funny cracks," and stands in no dan-

But fellows who are pleasant only once in a long time, and who "pull a joke" perhaps twice in a lifetime, should time their efforts so that their wives have not a mouthful of meat handy to pull into their windpipes. For that is not what windpipes are for, and FOR RENT OR SALE-Farm in Canthey resent intrusion of solids.-Ex-

Joke on Famous Composer.

A certain newly rich person with nore money than culture called on M. Massenet and said that he had seen his photograph in a paper and had read that he was "a clever planist." Would M. Massenet play a few pieces at a little party? He would be well pald of course!

The world-famous musician was greatly amused. "Certainly!" he replied. "What night?" "Thursday." "Thursday? What a pity! I am engaged on Thursday. But I can give the address of a friend-an excellent planist, who can play all the modern dances beautifully." So saying, Massenet gave the un-

fortunate newly rich the address of-Saint-Saens! Obviously the victim of Massener's joke had never heard of Saint-Saens, for he called on the distinguished composer and was promptly. kicked out. Suint-Saens brooded over the insult for some hours before he saw the joke.

Belong in High Places As with the evergreens so it is with all trees that dare the heights.

Some, like the hemlocks, remain far below. The little gray birches stop in the pastures of the foothills. The high, clear air of the range is not for them. The yellow birches fare on to the lower slopes of the high hills. There they quit; but the canoe birches go on. The great trees of the lower reaches of the bowlder path are these, their paper-white bark showing through all dark woods of the north. Then climb valiantly. It is as if the trees were thrilled with that eager desire to reach the summit which possesses all mountaineers.

The Oregon City-Molalla road was determinate period pending the construction of the new mile of cement pavement which is being laid. Traffic to Molalla is being detoured over the Mt. Pleasant road and traffic to ick Schwartz, deceased. Beaver Creek is routed via the Jones Mill road up the Abernethy.

LAD FALLS FROM BIKE: ARM BONE FRACTURED

and a closing period of five days, into Velmore Cox Hurt in Accident With Wheel; Thrown from Seat by Hitting Curbing.

> Velmore, young son of Mr. and Mrs. Roy B. Cox, fell from a bicycle while riding near Eleventh and John Adams street on Tuesday evening, and broke his right arm near the elbow. The accident occurred when the wheel of the bicycle struck a pear on the sidewalk, throwing the lad to be pavement.

> The child was removed to the Oregon City hospital, where an X-ray picture was taken, but later removed to the Cox home on Eleventh and John Adams street, and reported to be resting comfortably Wednesday night,

Dempsey-Brennan Fight Prohibited

INDIANAPOLIS, Ind., Aug. 16,-Jack Dempsey, world's heavyweight boxing champion, will not meet Bill Brennan in a title bout at Michigan City on Labor day, Governor Warren were rekindled and the crisis was T. McCray decreed today Acting upon an opinion rendered by the state attorney general, the governor declared the encounter would not be a boxing exhibition, but a prizefight, and as such is in violation of the laws of the state of Indiana,

Chicago in Grip of Heat Wave; 1 Dead

CHICAGO, Aug. 16 .- No relief was n sight today from the heat wave which held the lake states in its grip, the weather bureau announced. One death from heat prostration was reported here yesterday when the thermometer climbed to 90.

STAYTON, OREGON, FIRE DOES \$75,000 DAMAGE

STAYTON, Aug. 16.-Fire early this morning destroyed a block in the business district here, injuring at least two persons and causing losses estimated at \$75,000. Incendiarism is suspected.
