Road Work Rushed On All Contracts

SANDY, Aug. 30.—The road up the mountains is the best now it has been at any time this season.

The prospect for getting the lower unit of the highway rocked from the Multnomah county line to Sandy is considered good by F. D. Eason, resident engineer. A special plant is being put in at Bell station, to furnish gravel and the rock will be hauled by train to Boring where bunkers are being fixed up to receive the gravel, and will be distributed from Boring by trucks. Rocking is expected to begin in a few days, and, as the contract calls for a minimum of 300 yards per day, the work will be rushed. There is a fine prospect that this lower unit may also get a top course on this fall. Sub-contractor Williams has charge of the work.

A. D. Korn is putting up a crushing plant for surfacing the third section from Cherryville to the forest boundary.

J. W. Dixon is "subbing" for J. F. Clarke, and is grading south of Mt. Hood on Salmon river, and according to report hopes to finish about three miles before the weather gets bad up there.

The Sandy rock crusher was closed down again the first of the week, the crew quitting, although Palmer came out and urged them to stay with the job. The road was rocked as far as Carl Alts, the first of the week.

SENATE IS EXPECTED TO PASS SOLDIERS' BONUS

WASHINGTON, Aug. 30.—An air of confusion over the soldier bonus bill enveloped the senate today as it prepared to take a final vote on the measure.

While passage of the bill was expected before adjournment tonight, its supporters feared that the unexpected tactics of the opposition in effecting adoption of the McNary \$350,000,000 reclamation fund amendment and the proposal of Senator Simmons that the bonus be paid out of the interest of the \$11,000,000,000 allied debt, made it certain that President Harding would veto the measure.

Oswego, Aug. 29.—Last Monday night a large meeting of citizens was held to arrange for the investigation of the proposed water district. The meeting was adjourned after the appointment of an investigation committee until this forthcoming Monday evening to hear the findings of the committee as outlined. It seemed to a number of the people present that the water rate to be charged plus the additional taxes to defray cost of the plant would render the use of water prohibitively costly to nearly all taxpayers of the district. Another thing that came up before the meeting on which no action was taken was the granting of the power to a water commission the right to spend any part or all of \$20,000 in making preliminary investigation and preliminary plans, as proposed under the measure to be voted on at a special election to be held September 15.
