TWO COWS ELECTROCUTED.

Animals Come Into Contact With Live Barb Wire Fence at Gladstone.

Two cows were electrocuted Sunday at Gladstone by coming into contact with a barb wire fence, that had been connected with the trolley wire of the Portland Railway Light & Power Company's line on the spur running into Gladstone Park. One of the animals belonged to F. S. Baker

and the other to Mrs. T. M. Davis. Investigation proved that the ani-mais were killed through carelessness on the part of the company, which will make good the loss of the cows to their owners. The fence is a three-wire and it has been the custom of some of the neighborhood children to crawl through on their way to and from school. It is remarkable that more serious fatalities did not result.

BARCLAY ANNEX CLOSED AND ROOMS FUMIGATED-DIPH-THERIA CASES ISOLATED.

TO STOP INFECTION

Two cases of diphtheria have developed in this city within the past few days. Friday Evedne Harrison, living on Monroe street, was taken sick in the evening and the doctor pronounced it diphtheria. Miss Harrison was a student in the high school but she did not attend on Friday and it is believed that in consequence no one was exposed through her ailment. Della Woodfin, daughter of John Wood fin, living on Jefferson street, was sent home from the Barclay yesterday and the annex, where she recited, was closed and later in the day given a thorough fumigation.

Prof. Tooze and his teachers are Prof. Tooze and his teachers are taking every possible precaution to prevent the spread of contagious dis-cases. Every few days the rooms are fumigated and then in a few days the rooms are treated to a course of dis-infection. Whenever any child mani-fests any indisposition it is at once sent home, and the case watched to are if other children were exposed. sent nome, and the case watched to see if other children were exposed. Where a room has been the scene of the school work of a pupil that is tak-en with a contagious disease the room is at once treated to special fumiga-tion and disinfection. Carelessness on the part of certain patients has more to do with the

Carelesaness on the part of certain patients has more to do with the spread of contagious diseases many times than do the schools. The charge is made that parents are often remiss in their duly, allowing the children to run into exposure and then when the child is sick blaming it to the school.
