WILL TAFT PLAY POLICY?

President Taft, like Grover Cleveland, has many reasons to think of Congress as a team of poorly broken colts. What he wants done they all seem to refuse to do, and what he doesn't want done they seem to be anxious to do.

For we believe that down deep in his heart President Taft wishes to do right. He has disappointed many men, both Republicans and Democrats—the two different parties in different ways—it is true, and he has really disappointed many who have been honest in their desire to see him do right, and have had a willingness to aid him in any way within their power.

During the preparation and passage of the tariff there was a class of Republicans who were pleased with him and a class that was disappointed. His attitude on reciprocity has alienated those that loved him for his tariff moves, and it has not raised up friends for him among those who could not agree with him in his tariff stand.

While Taft is perhaps honest in his deepest desires, there are not a few who are led to think that he can, if occasion demands it, put off his deepest desires for a time and act and work as policy seems to tell him will win for him the most favor of the vote-producing populace.

WEEK PLACES IN OREGON SYSTEM

Thursday, however, hit the nail on the head the other night in his address at Chicago when he said that it was not the system itself—having reference to the Oregon system of initiative and referendum and the many good words that enthusiasts are saying for it—but that it is the men who put the system into practice.

Have Modern Labor Saving Devices Proved of Value?

Do They Give the City Man Advantage Over His Country Brother?

By Dr. LUTHER HALSEY GULICK, Formerly Physical Director of New York City Schools.

Modern inventions cost more than they are worth and labor saving devices add to the troubles of the average hard working citizen!

The object of life is to increase the sum total of one's spiritual experiences. To do this one must be in the thick of the fight. In no other way can one get the depth and breadth one needs for growth.

In the country men and women are POORER, have LESS COMFORT and GROW OLD QUICKER than city folk do.

THE DIFFERENCE IS DUE CHIEFLY TO THE MODERN DEVICES FOUND IN THE HOME AND THE OFFICE OF THE CITY MAN AND WOMAN.

ON THE MODERN FARM, WHERE SCIENCE HAS REPLACED TRADITION, THE PEOPLE AS WELL AS THE CROPS HAVE IMPROVED.
