It seems that C. D. Schumaker, who was arrested for breaking a window in an O. W. P. car, had a pal who was offended at the way Schumaker was treated in the matter. About noon Friday he hunted up Officer Shaw and began to tell him his opinion of Shaw, the whole police force and the better side of society in general. Invites G. A. R. to Church.

The members of the G. A. R. are in the habit of attending religious services in a body the Sunday preceding Decoration day. This year Decoration day comes on Sunday, May 30. With that in mind Rev. Robinson, of the St. Paul's Episcopal church, has extended an invitation to the old soldiers to attend his church on that occasion. Those who have been consulted in the matter are in favor of accepting the invitation, but the Post has not yet had time to act on it.

CINEMATOGRAPH FOLLOWS PROGRESS OF A BULLET.

Shows Air Waves That Deflect Course of Projectile.

A cinematograph apparatus which takes pictures with intervals of one five-thousandth of a second has been invented by Dr. Franz of the Military Academy of Berlin. A striking example of the power of the apparatus shows a bullet fired at a bladder of water that is hung on a string.

The eye only sees a little smoke from the pistol and a couple of holes in the bladder, from which the water runs, but when this is cinematographed and the film is shown slowly a very interesting series of operations can be watched.

First the bullet is seen approaching. It is traveling 1,000 feet a second, but it seems to move quite deliberately. In front of it and extending a long way above and below it is a dim line bent sharply immediately before the bullet. A bullet can no more pass through air than a vessel can through water without making a wave, and this is the air wave. It is made visible on account of its different density, just as the waves in air are seen above a chimney or over hot ground.

Behind the bullet come scattered grains of the powder that have not been burned, and traveling more slowly still comes the wad. The bullet enters the bladder and disappears inside, a little water spurting out of the hole it makes. Then it reaches the other side, but it no longer cuts through at once, as it did when the bladder was backed up by the water.

Something like a finger seems to push the bladder outward into a long tube, then the tube opens and lets out the bullet, which gradually travels away. The tube does not at once collapse; its form is maintained by the stream of water which follows the projectile.

SEARCH FOR SUMTER'S GUNS.

Civil War Relics To Be Installed at West Point.

An effort is being made to locate such guns as saw service at Fort Sumter during the civil war with a view to having the ordinance mounted at the United States Military academy at West Point, N. Y. With this end in view Major E. W. Hubbard, commanding the Fort Mifflin army post at Charleston, S. C., is now prosecuting an investigation to identify and locate the guns for use by the Military academy.

At the present time there are two old guns and two thirteen-inch mortars at Fort Sumter, but Major Hubbard is inclined to the opinion that ordinance is of later date than the period of the civil war, and it may be possible that some of the soldiers who served at the fortifications in Charleston harbor may be able to furnish him with information.

Maryland Wildlife Hungry.

Wildcats are so numerous in Garrett county, Md., this year and are so fierce that in some sections it is not safe to venture out on the county roads after dark. The cold weather and deep snow have made foraging difficult and the cats are hungry. A wildcat recently attacked a rural mail carrier near Grantsville, and these animals have followed pedestrians and horsemen.

New York's Huge Debt.

New York city owes one-half as much money as the combined indebtedness of the twenty-seven next largest cities in the country.

RX: PIE.

(Give the boy all the pie he wants. When he gets enough he'll know it. He would not ask for it if his system did not crave it.—Dr. Woods Hutchinson.)

Let every little son Give praise to Dr. Hutchinson. For he can diagnose all right. A small boy's husky appetite. Where is the boy who likes to eat? You don't know one, no more do I. But he can't make that craving cease. With one small, narrow, stumpy piece.

He wants it cut in great big chunks Or broken off in large, fat hunks Or in long, wide, irregular slabs. Which from the pantry shelf he grabs.

Apple, pumpkin, peach and mince, Rhubarb, cherry, pear and quince. He likes them all (and so do I) And every other kind of pie.

O cruel mother, when you carve The darling pie that you remember not to starve.

Who passes up his plate for more? You need not fear that he'll be ill. He knows when he has got his fill Of juicy fruits and dainty crust. He may swell up, but he won't bust.

EYE TURNED INSIDE OUT.

Eye Specialist Rectifies Error After Several Weeks of Suffering.

Some weeks ago Frank Sajovie was engaged in blasting rock near the park on the hill when in an explosion he had his eye filled with dirt and as he supposed ruined for life. Finally the pain he suffered sent him to a physician who soon passed him to an eye specialist.

An examination by the specialist showed that Sajovie's eye had been turned inside out by the force of the explosion, that it also had been somewhat bruised. The eye was placed in position again and the young man is coming on finely.

It Wouldn't Pay to Advertise

The maker of a widely advertised article, or commodity, is always on trial for his business life. He cannot shirk, nor cheapen his product—and this is the best possible protection for the consumer.
