BEAVER CREEK GIVEN LIBERALLY TO ROAD

CLACKAMAS SOUTHERN RAILWAY RECEIVES LIBERAL SUBSCRIPTIONS TUESDAY EVENING.

Three of the board of directors of the Clackamas Southern Railway went to Beaver Creek Tuesday evening to hold a meeting for the promotion of the project of building the new railway out Beaver Creek way through to Molalla and the Molalla country. The meeting was held in the Grange Hall and there was a large and enthusiastic gathering.

Those who went to Beaver Creek were G. B. Dimick, O. D. Eby and F. M. Swift, and they were joined in addressing the men present by several residents of Beaver Creek and vicinity.

It proved a very enthusiastic gathering and considerable money was raised for the pushing ahead of the work on the line. In fact more money was raised at Beaver Creek and by subscriptions that came in voluntarily on Tuesday than the whole work of promotion and grading done so far has cost.

The people of Beaver Creek recognize what the improvement will mean to the county at large and to the section traversed. While the road will prove a great convenience to Beaver Creek citizens who wish to come to the city, or to ship their products here, still the further away from the county seat the greater the benefit to be received so that from Molalla way there should be added desire to see the road built. In fact the further from this city the road advances into the country the greater benefits that will come to those living in the section to be traversed.

Considering these facts the subscriptions from Beaver Creek are very flattering, and then when the promoters stop to consider the many promises of further support that is to come from this section there is every incentive to continue in the good work of raising funds for the additional work that it seems wise to do in fully equipping and operating the line as a contributory line to this city.

Love of the game and the comfortable emoluments which go with it are influences which keep a great majority of baseball players from retiring from the game in the heyday of their careers. Cases of players deliberately retiring while still with plenty of good playing left in them are few and far between. In fact, the number of players who have quit the big leagues voluntarily can almost be counted upon the fingers of one hand.

Every year a number of players announce their retirement from the sport, but at the opening of the season can

TAFT WON'T INTERFERE AS THINGS NOW ARE

BELIEF THAT FEDERALISTS AND REBELS WILL TRY TO AVOID FURTHER ENCROACHMENT.

WASHINGTON, April 18.—Positive assurances that the Mexican Government will adopt a "defensive, restrictive policy along the border," and news from Douglas that the rebel forces have evacuated Agua Prieta, did much today to relieve the high tension under which President Taft and members of his official family have labored for the last few days.

The assurances from Mexico followed the demands of the State Department that fighting which endangered American lives in the border towns must be stopped.

That the situation is not now regarded as acute is evidenced by the fact that leaders of both the Senate and the House, with whom the President conferred prior to the assembling of the Cabinet, declared that no action was contemplated by Congress at this time.

The President had extended conferences with Senator Cullom, of Illinois, and Representative Sulzer, of New York, chairmen respectively of the foreign affairs committee of the Senate and the House. Senator Cullom insisted he could see no reason for intervention, while Mr. Sulzer announced that Congress would not act hastily.

Sulzer is of the opinion that thus far there has been no overt act in Mexico sufficient to warrant intervention. He intimated, however, that a plan was being considered to relieve the danger to Americans near the border. This contemplates an agreement for a neutral zone from five to ten miles wide along the boundary line.

Congress, Sulzer said, will not act under any circumstance without a special message from the President.

To his callers today, President Taft said his telegram to Governor Sloan, Arizona, published today, reflected correctly his attitude. There was no intention on his part, the President said, to intervene in Mexico at this time, and the two big developments of the morning had strengthened him in that position.

System is the key note of the administration of County Clerk W. L. Mulvey of Clackamas county. Mr. Mulvey has just added a battery of V. and E. sectional filing cabinets to his office equipment and hereafter all papers will be filed vertically.

The cabinets were purchased through Huntley Bros. All public papers will be filed away in such condition that reference may be had to them at a minute's notice.

A Japanese Fable.

One day the monkey saw the ant climbing up a tall tree and thought that he would amuse himself at his expense.

"Look here, Mr. Ant," said he, "how quickly you are ascending the tree! Won't you have a race with me to the top of the tree? I am certain that you can beat me."

"All right," replied the ant, and both started to run up the tree from the bottom. In a minute the monkey had reached the middle branch of the tree, while the little ant had scarcely traveled an inch.

The monkey looked down haughtily upon the ant and then began to perform his favorite acrobatic feats upon one of the outstretching branches. Suddenly the wood snapped under his weight, and he fell to the ground. He was so badly hurt that it took some time before he could pick himself up. In the meantime the ant had reached the top of the tree and won the race.

The Walzing Egg.

Place a plate on the table so that it is near enough to the edge to be easily taken in hand. Then place the egg in the middle and with the help of the thumb and the index finger of the right hand, placed respectively at either end, give the egg a lively rotary movement. It will soon stand upright on its points and turn. Now seize the plate and all you have to do to make the egg waltz is to move your hand in a waltzing motion. The egg should be a hard boiled one and should while bolting be kept in a perpendicular position in the saucerpan. Try it and see the egg spin around the plate.—Magical Experiments.

It Wouldn't Pay to Advertise A Poor Article

Nor a proposition of doubtful merit or honesty—for ad-readers, nowadays, are DISCRIMINATING. They know values—they know GENUINE things, genuine opportunities.

Any article which can be sold by advertising is, by that test, a GOOD article. YOU are safe in buying a thing which has "stood the fire of publicity."

The maker of a widely advertised article, or commodity, is always on trial for his business life. He cannot shirk, nor cheapen his product—and this is the best possible protection for the consumer.

You are SAFE in buying advertised things—it's the logic of nowadays business conditions.
