RECIPROCITY TALKS GIVEN LITTLE TIME

WASHINGTON, April 21.—Six days of debate on the Canadian reciprocity bill came to an end in the House of Representatives this afternoon with the speech of the three leaders in the fight—Representatives Underwood of Alabama, McCall of Massachusetts and Dalsell of Pennsylvania.
Crowded galleries heard the concluding speeches, Mrs. Taft occupying a seat in the executive gallery.
The House then began the rapid-fire consideration of the bill under the privilege of the amendment and five minute speeches.
Strenuous efforts are being made to force a vote before adjournment today, Chairman Underwood, of the committee on ways and means, exerting all possible pressure to compel action.
It had been agreed at a conference between Mr. Underwood and Representative McCall, of Massachusetts, and Dalsell, of Pennsylvania, that general debate would close at 3 p. m. and remarks under the five-minute rule would be in order.
That no amendment will be allowed to the reciprocity bill was indicated late today, when one offered by Representative Martin, South Dakota, to put fresh meats on the free list, was defeated overwhelmingly.
McCall urged the Republican members from the Northwest border

HOUSE IS NOT DISPOSED TO PERMIT ANY AMENDMENTS AT THIS LATE DAY.

States to support the reciprocity agreement. Any attempt to tack on a free list as an amendment, he cautioned, would completely upset the whole reciprocity arrangement.

RUN INTO FISSURE AT STONE OIL WELL

ROCK VERY HARD AND CRACK IN IT PERMITS DRILL TO TURN ASIDE.

STONE, Ore., April 21.—(Special.)—There has been little progress downward for the past few days at the oil and gas well here. The drill ran into a fissure in the rock—into a crevice cracked by the glacier that plied down the high peaks that were smoothed off in those by-gone ages of long ago—and because of this crack in the rock through which the drill is passing the drill itself was led to follow the crevice and not go straight downward.
This would not have given any trouble in the soft formation that was encountered some fifty feet higher up in the well; but at the present time the rock through which the drill is passing is very hard and flint-like and the drill makes little impression and naturally is inclined to follow any opening left by nature.
In consequence the drill has progressed but a few feet within the past few days and the drillers have been up against many annoyances. But the drill still goes down and at this writing the trouble is about fanned. The drill is down a depth of 135 feet, in the hard rock, but drill and machinery are working fine and the trouble with the crack in the rock being practically ended the drillers are feeling that they can report progress more pronounced from this on.
