the House that he would vote for the NEW RAILROAD LINE SHOWS WELL IN PICTURE-INVEST-ORS SHOULD VISIT IT.

> Several photographs of the work as it is progressing were taken along the line of the Clackamas Southern Railway Tuesday and show up in good shape what is being done along the rightofway on this new enterprise. Cuts and fills are depicted in the photographs taken, and the disputed rock pile of G. W. Bigham shows plainly in one of the pictures. In fact almost every detail of the topography of the country is brought out in the photograph of the lands in dispute, and the barren nature of that rocky hillside shows almost as well as if one stood on the hillside itself.

All the men at work have crossed over and are putting in their best licks on the line across from the Bigham property, the work having been completed to that property itself, Workmen are strung out almost to the Nash property, a mile from the city limits

The work of grading is progressing nuch faster than was anticipated much when the building of the line was under discussion. And at that it is costconsiderable less mile for mile than was anticipated. The weather has been such that the work has gone forward very fast and the quality of the work has been better than the ordinary. Within two weeks, if there is no special hindrances arise, the first mile of the grading will have been finished. There is but one trestle to be built between the city limits and Newell Creek, which must be constructed about half way out. The heaviest grade on the whole line has been made

and comes within the city limits. Yet, with all that has been accom plished, and with the possibility that one has to go out on the line and see what is being done and how much is being accomplished, the builders of the road say there are a few knockers who are still trying to discourage people from investing and making this a

Several auto loads will run out Mulino this evening to attend the meeting in the Grange hall there, and short addresses will be made by men who have subscribed and are interested in the success of the enterprise. Those who have any doubts as to the progress made and the prospects which past efforts assure have but to go out on the rightofway and see for themselves. Doubting Thomases can see for themselves, and if they cannot believe their own eyes they are in a bad way sure, and should at least hold their peace until they do know what there is to talk about.
