CITY OFFICIAL NEWSPAPER.

May 23 in American History.

- 1788—James Otis, patriot orator of the Revolution, killed by lightning at Andover, Mass.; born 1725. 1810—Sarah Margaret Fuller, transcendental writer who became Marchioness d'Ossoli, born in Chambersport, Mass.; drowned off Long Island 1850. 1824—General Ambrose E. Burnside, eminent Federal soldier and United States senator from Rhode Island, born; died 1881. 1900—Francis Bicknell Carpenter, noted portrait painter, famed for his painting of the "Emancipation Proclamation," died; born 1850.

ASTRONOMICAL EVENTS.

(From noon today to noon tomorrow.) Sun sets 7:13, rises 4:21; moon rises 2:26 a. m.; planet Mercury visible rising before the sun.

Penny postage would be a Greek gift if it delayed the coming of reasonable parcel post rates.

It is said that "Champ Clark is maintaining an unusual silence since his presidential boom began." Being so well justified, let the boom go on.

WHERE THE CRUSHERS ARE.

Critics of the County Court's effort to introduce modern methods into road construction in Clackamas County have stated in a Clackamas County newspaper that the county has six rock crushers and have intimated that some of them are idle. The Enterprise has taken the trouble to ascertain the truth of this statement and finds that the county has five crushers, all of which are being utilized, as follows: Henri's place on the Highland road. Myers' (Josi & Scherruble) place, at the junction of the Molalla and Highland road. Oak Grove. Springwater. Near Stafford. If, as stated, the county has six rock crushers, The Enterprise has been unable to find the other one. There is every reason to believe the authorities would have it working, if it existed.

HOME GROUNDS INVITING.

All other questions sink into insignificance when compared to home and its environment. Intelligent citizenship and domestic tranquillity ultimately depend upon home training, and home training is largely influenced by the environment of the home. Every boy and girl should have the advantage of a neat, attractive and comfortable home. The expense required in beautifying home grounds is so small that it is difficult to see why so many people are contented to live and rear their children in unattractive surroundings. The residence may be a log cabin, yet it can be made attractive by trees, vines and flowers. It is remarkable how much plants and trees add to the charm of the home.

Those who do not own their homes should make an effort to secure them. Home always endears one to the country in which he lives and insures greater interest in its social and political affairs. The home owner is more contented and can be a more useful citizen to the commonwealth. Let us take more interest in making home life better and its environment more elevating. Build according to your means, then beautify and embellish with trees, plants and vines. Give thought to your plantings and intelligence to home arrangement. Build not only for yourself, but for your children and their ancestors.

WILLIAMS' MEN GIVE VICTORIA DRUBBING

ROADSTERS MAKE 12 RUNS TO ISLANDERS 2—BEAVERS AT HOME TODAY.

PORTLAND, Or., May 22.—(Special)—The Portland Roadsters administered a sound beating to Victoria today on the latter's grounds. The score was 12 to 2. Nick Williams' men got 13 hits while the Islanders got only five. Sage struck out five Portland batters and only six men went to bat in the two opening innings. Tonneson was steady throughout the meleé. While the Roadsters were earning their salaries McCredie's boys were coming home to meet San Francisco today. The results Monday were as follows: Pacific Coast League—No games scheduled. Where they play today—San Francisco at Portland; Vernon at San Francisco vs. Oakland; Sacramento at Los Angeles. Northwestern League—Portland 12, Victoria, 2; Vancouver 8, Spokane 3; Tacoma 4, Seattle 3. American League—Boston 2, St. Louis 0; Philadelphia 9, Cleveland 3; Washington 7, Detroit 3; Chicago-New York game postponed—rain. National League—Chicago 6, Philadelphia 2; St. Louis 3, Boston 1; New York 5, Pittsburg 1; Brooklyn 4, Cincinnati 3.

Giant Shark Had Jaws Large Enough to Swallow Men Whole

THIS mouth of a gigantic shark, in which several men are able to stand upright, is a "restoration" made by scientists, who used the teeth as a basis from which to construct the jaws. The teeth—200 of them—were found in a perfect state of preservation in a phosphate bed in South Carolina. Their size enabled students to tell accurately the size of the jawbones that held them, and in the same way they decided that the shark that once used them was at least eighty feet long. The teeth were sent to the Museum of Natural History in New York, and there they were set in plaster jaws in the order they originally occupied in the jaws of a shark that could truthfully be called a man eater. This huge fish lived during the eocene epoch, at a time that the Atlantic coast was slowly rising from the ocean and the American continent was assuming its present form. Contemporaneous with this huge shark are found bones of the "cehippus," the earliest known direct ancestor of the horse.

45 Years Ago

From The Enterprise of October 27, 1866. Grain Shipments.—There is now a large quantity of grain coming down the Willamette River, besides which so much merchandise is going up that it has been found necessary to keep all the boats employed that are able to make the trip in low water. The Echo and one other have averaged three trips each to Salem for some weeks, and they will soon be running to Albany, and other places farther up. A friend at Albany writes us that every farmer in that vicinity has his granary literally full of grain awaiting shipment. A vast amount of the products of Oregon this year ought to find a market in China and Europe. The bulk of wheat being sold is for home consumption, or stored for speculative purposes.

ARE THERE ANY RECORDS LEFT FOR LAJOLTE?

Larry Lajolte of the Cleve-lands says he is out for more batting and fielding marks this year. Records already held by Larry are as follows: In 1888 he accepted 188 chances at second base, the greatest number of chances ever handled by a major league second sacker in one season. In 1904 Larry cracked out fifty two-base hits, a high water mark for doubles in the majors. In 1903 Larry made forty-three three-base hits, the greatest number of triples ever made by any major leaguer better in one season. To top this off, in 1906 Larry had a fielding average of .991, the best ever made by a major leaguer at the second sack.

FOR RENT—Liner space in this column.

A few lines may rent that house, store or farm; they cost you but a few cents.

NEW POTATO CROP IS TAKING PLACE OF OLD

SHIPMENTS RECEIVED FROM TEXAS BEST BROUGHT TO THIS SECTION.

The demand for old potatoes was strong Monday with scant offerings. In fact the market is fast passing out of the old into the new crop. Two carloads of potatoes from Texas were unloaded in Portland. The shipments were in bags and were in excellent condition, although the season is still so young as to make bag shipments very hazardous. The potatoes were of good size and were far superior to the arrivals from either California or Mexico. Sales were reported at \$4.50 to \$5 per central, according to quality. New potatoes from Florida are finding a fair sale. These supplies are said to be of the best quality thus far received here this season, but the price at 6c a pound is so high as to exclude the general public. The Florida stock is packed in barrels. California new potatoes are in larger supply with the price still held high. The competition of Texas stock is expected to pull down values generally.

Quotations for Oregon City.

- POTATOES—Best, \$2.50, good \$2.25; common, 2. Buying, earload, select, \$2.10; ordinary, \$1.90. FLOUR AND FEED—Flour in steady, selling from \$5 to \$5.50; very little of cheaper grades. WANTED—A RIDER AGENT. COASTER-SHAKES. \$10.00 Hodgethorns Puncture-Proof \$4.00 Self-healing Tires. J. L. MEAD CYCLE COMPANY, CHICAGO, ILL.

Oregon City Stock Quotations. HOOGS—Hogs are quoted 5c lower. From 125 lbs. to 150 lbs. \$19c. From 150 lbs. to 200 lbs. \$19c. VEAL—CALIF.—Veal calves bring from 8c to 10c according to grade. BEEF STEERS—Best steers for the local markets are fetching \$14 to 6 1/2c live weight. SHEEP—Are firm at 8c to 10c live weight. BACON, LARD and HAM, are firm.

CATTLE MARKET IS STRONG.

Large Number of Bidders Keep Prices at High Mark. The Portland Union Stock yards reports as follows: Receipts on this market for the week ending Saturday have been 104 cattle; 16 calves; 2065 hogs; 2011 sheep; 37 H. & N. The cattle market has remained steady to strong and the level of prices has caused killers to buy the least possible quantity. The presence of more than the usual number of competitive bidders, has in a measure explained the high line of prices. The hog market has remained fairly steady. Some killers claim that there has been a weakness but as compared with the river markets the local shows a strong condition. The sheep market was strong with an active demand and a clearance was made of the entire offerings. The horse market has been slow and the transactions indicate a lower range of values. Representatives sales have been as follows:

Table with columns for Animal Type, Quantity, Price. Includes entries for 100 Steers, 224 Steers, 226 Steers, 205 H'ers, 1 Cow, 4 Cows, 5 Cows, 15 Yearlings, 4 Bulls, 1 Bull, 3 Calves, 4 Calves, 142 Hogs, 108 Hogs, 60 Hogs, 6 Hogs, 300 Lambs, 743 Yearlings, 403 Wethers, 250 Ewings, 4 Drafters, 3 Drafters, 2 Chunks.

Aeroplane's Chief Use In War Will Be to Transport Troops

By HUDSON MAXIM, Inventor

WAR always has been an attempt to get BEHIND a wall, a hill, a battle line, a city wall or a line of ships on the two dimensional surface of the earth, but with the aeroplane the barriers of gunpowder can be BLOWN OVER, and in the next great war the WHOLE COUNTRY will be attacked. The aeroplane takes war into the third dimension. It is very easy to imagine an army of aeroplanes, say twenty thousand in number, bearing one hundred thousand troops from London to Paris, or vice versa. Accidents would happen beyond question, and many would be killed, but think how many more lives it would cost to get the same number of troops from one city to the other by present means! It has been claimed for many years that they will counteract the effectiveness of these "birds of war," but I do not think they can ever COPE with aeroplanes high in the air and traveling forty miles an hour. THE TRUE SERVICE OF THE AEROPLANE WILL BE IN TRANSPORTING TROOPS.
