Heart to Heart Talks.
By EDWIN A. NYE

WIRELESS TO THE BRAIN.
At the dedication of the Roosevelt dam in Arizona a few weeks ago it was stated not only would the water from this one of the biggest dams in the world fertilize thousands of acres of semiarid land, but—
The power derived from the fall of its waters would be made to light the city of Phoenix and turn the wheels of its industries, seventy-five miles away.
That would have been wonderful indeed fifty years ago.
But it is only half the feat of transmission involved in lighting the city of Syracuse, N. Y., bringing light and power over a thin wire from the harnessed forces of Niagara falls, 150 miles away.
Electricity has become the obedient slave of civilization, taking the place of the shackled slaves of the older day.
One by one masterful man is hitching his machines to the forces of earth and air and water. The time is coming when he will be almost free from manual labor, giving him leisure and strength for the exercise of those qualities of mind and heart that shall transform the world.
But—
There is a more wonderful thing than all this advance of science, and it will always be more wonderful.
More mysterious and more powerful than the transmission of light and heat over a slender wire is the wireless transmission of the light of human intellect and the power of human fancy that comes to the brain of man.
From where?
We do not know where the great power house is located, but we do know that somewhere is a vastly greater power than puny Niagara; somewhere is resident a tremendous reservoir; somewhere is a mighty source of intellect and of love.
There is, however, this difference: The more kilowatts electric you use the less you have to use. There is just so much manufactured. When that is gone all is gone.
But—
The strange thing about the use of the intellectual and moral kilowatts is that the more you use the more you have to use.
Do you not see you are getting outside the realm of science—outside material things and their laws?
Now—
When the force that comes over the wire to the dynamo stops, the dynamo stops. But you cannot predict from that material law that when the force that comes over the wireless to the brain stops coming the mind will forever stop.
The mind is different.

Specially interesting to Women.
Few women are physically perfect and, in fact, medical records go to show that perhaps, the great majority of women suffer from some more or less serious ailment peculiar to her sex.
To place a reliable treatment within the reach of such persons—one that did not contain anything in any way injurious to the system—Rexall Vegetable Compound was first offered for sale.
Practical demonstrations have since proven that this preparation, having for its basis the formula used by a reliable physician who made a specialty of such cases, is all that has been claimed for it, and we offer you Rexall Vegetable Compound with the assurance that it will prove beneficial in the treatment of such cases, or we will promptly refund any money you may have paid us for it.
Rexall Vegetable Compound can be obtained only at our store—The Rexall Drug Store. Price, \$1.00 per bottle. Huntley Bros. Co.

BIRDMAN MAKES FAST FLIGHTS IN PORTLAND
CHARLES F. WALSH SOARS EIGHT MINUTES AND SIXTEEN SECONDS—CONTROL PERFECT.

PORTLAND, Or., May 22.—(Special.)—Rising from the ground with the ease and grace of a gull, Charles F. Walsh of Los Angeles, made a successful aeroplane flight at the fair grounds near Rose City Park this afternoon, flying for three and one-half miles at the rate of nearly a mile a minute.
The flight took place shortly after 2:30, and was witnessed by a small crowd of spectators who enthusiastically cheered the daring young aviator as he successfully and with hardly a jar brought his machine to earth and alighted from the seat.
The machine used was a Curtiss biplane, and is one of the three used by the Pacific Aviation Company, who will give an exhibition of flights in the northwest, today's being one of the preliminary flights.
The exact time for the flight of three and one-half miles was three minutes and 16 seconds.
Shortly after the first flight, he again rose, making long swings to the east and west, coming down after 8 minutes and 16 seconds, which breaks the seven minute Portland record made by Hamilton.

POPE IS SAVED FROM TESTIFYING BY LAW
"LAW OF GUARANTEES" PLACES PONTIFF BEYOND COURT'S JURISDICTION.

ROME, May 22.—But for the fact that the "law of guarantees" places him beyond the jurisdiction of the Italian civil courts, the Pope himself would have been summoned as a witness in the case of Briccarelli vs. Verdesi, the trial of which began before the tribunal of Rome today.
Verdesi, the defendant, is a former priest who published an interview in the Milan Secolo accusing the Jesuit father, Briccarelli, of having violated the secrecy of the confessional by revealing to him by Verdesi. As a result of these revelations Verdesi said Briccarelli compelled him, under threat of severe spiritual punishment, to tell his confessor the names of five priests still in the church fold but of advanced modernistic tendencies.
Briccarelli replied by suing Verdesi for libel.
Among the witnesses summoned are several high Italian officials and aristocrats to whom Briccarelli is confessor.
