## Cookery Points

Apple Cooking. Some people know only two ways of preparing apples-to stew or bake them. Try some of these old ways of presenting "the king of fruits:"

For float apple make a nice apple butter or puree from tart fruit, sweet ened to taste and flavored with the grated rind of one lemon and cinnamon or nutmeg. Put the puree on the ice to become very cold, then beat the whites of two eggs to a stiff froth, adding this to the fruit, which should now be in the serving dish, When it comes to the table cover the top with a cupful of rich cream.

To make fried apples wash and wipe dry some tart cooking apples, cut them in stices a quarter of an inch thick and fry them in butter until tender and brown. Dredge with powdered sugar and serve piping hot on warm plates.

Caramel apples may be made as follows: Into a skillet put one cupful of light brown sugar and one-half cupfu of hot water. Let boil for three or four minutes, then drop in five nice cooking apples which have been poeled, cored and balved. Let these stew in the strup until they are tender and fuffy, then drain them out into a glass dish. In another saucepan have ready one tablespoonful of butter melted with one tenspoonful of flour. and over this pour one-half cupful of cream. When hot add to the bolling strup, stirring briskly for several minutes, then pour over the apples and serve either hot or cold.

For dainty chiffon or silk dress waists instead of ordinary buttons brass rings of the proper size buttonholed over in silk of a color to match the fabric or the trimmings are being used. In white thread this is very nice for a lingerie blouse also and easier to make than crocheted buttons Siiks, challes and cottons show a tendency of having a supplementary border of solid tone. An idea of the most novel effects may be gained by mentioning a new tulle of white with a scattered pattern of dull red roses and soft green follage. The border was in Greek key effect, and beneath there appeared a band of solid black. Tunics continue to be exceedingly smart, and those of the present season are eminently simple. This one is plain, yet most effective when a bor dered material is used.
