visible setting after the sun.

Admiral Togo of Japan, who because of his famous victory over the Russian fleet in the Russio-Japanese war is known as the Nelson of Japan, has taken particular pains to make clear his friendship for the American people and his desire for peace,

Even before he had set foot on American soil the admiral by wireless sent a message saying he realized "that the American people are the best friends of Japan. The Japanese people feel this affection and look on America as the brilliant preceptor ond in national development."

This expression of friendship was supplemented upon his landing by unqualified approval of the arbitration treaties signed as the result of President Taft's labors.

Togo's name will rank with the great naval heroes of history, but he recognizes that war is cruel and unnecessary and that universal peace is one of the greatest blessings that can come to mankind.

LUCK AND SUCCESS.

"Sixty per cent intelligence, 10 per cent industry and 30 per cent luck" is the definition given by Professor Richet of the Academy of Medicine. Paris, in answer to a periodical which asked as to what part luck had played in his success in life. Work alone, other distinguished

Europeans declared, had been the factor in their cases. Maeterlinck planed his faith to luck. Jules Clare Vernon tie and Maurice Donnay leaned to the Portland work theory. Massenet, famous com- Oakland poser, believes in luck, but mainly for others

Temple said that before the 100 lb. sacks. formation of the United States Steel Corporation, H. C. Frick had visited J. P. Morgan with an option on the Carnegie Steel Company for \$160,-000,000. Morgan said the price was too high, but six months later paid \$500,000,000 for the same property. Mr. Temple explained that they were preparing to give a "magnificent play down in Wall street."

"Everything was in hand." added Mr. Temple, "the most accomplished actors, the most expensive scenery and most fantastic costomes were ready, but they had to have a Hamlet. Father and Mother Should **Encourage Inquisitiveness** In Children

By Dr. BORIS SIDIS of Harvard

HERE is a period in the child's life between the ages of five and ten when he is very inquisitive, asking all kinds of questions. It is the age of discussion in the child.

THIS INQUISITIVENESS AND DISCUSSION SHOULD BE ENCOURAGED AND FOSTERED.

We should aid the DEVELOPMENT of the spirit of inquisitiveness and curiosity in the child, for this is the acquisition of control over the stored up energies of man's genius.

I appeal to you, fathers and mothers, asking you to turn your atntion to the EDUCATION of your children, to the training of the sung generation of future citizens. I do not appeal to our official ators, to our scientific, psychological pseudagogues, to the clerks our teaching shops, for they are BEYOND ALL HOPE.

Try it for your Miss Florence Sutton, a sister of May Sutton, who won the tennis championship in 1909, is looked upon in the sporting world as a coming woman eral housework, good wages and permanent place in small family among tennis players. The younger Miss Sutton has been doing splendid at Portland; must be experienced. Apply 593 East Salmon street, work with the racket since she came from home in California early in the eason, and she bids fair to uphold the family reputation for expert jennis play.

Tennis is being taken up by girls more strengously than ever this summer, and it's a fine game for women but it takes incessant practice and superb health to make a strong player. and a sure eye, a quick and decisive brain and unerring judgment to make a clever one. Some of the attributes may be acquired by training, but not all of them; still, any girl, blessed with normal health and strength may become, with little effort, a better than the average tennis player and de rive some of the real benefits of the game.

Egyptian Women Run Newspaper. Egyptian women have a sewspaper, owned and edited by women. The appearance of the news paper is regarded as a favorable sign of the development of the women of that country and as a promise of the regeneration of Egypt. The purpose of the paper is to improve the condition of the Moslem women, to educate them and to fit them to earn their own livelihood. It is expected to develop their standard of thought and intelligence and to train them to think and act for themselves. Egyptian women are employed as writers, and the week ty paper relates the society affairs of Cairo, tells of fashion and prints fiction.
