Oregon citizens up and down the Valley, where rolls the Willamette, were pleased to hear Oregon City take the stand for the Locks on the East Side as arranged for. Never let a \$2,000,000 junk talk scare the project away from the people's opportunity. We can have the mills and we can have Locks and the West Side can have this unmoisted water canal and no one's invested rights and properties are going to be ruined.

The new Locks will redound to the benefit of the greatest number—even will beautify and enhance the value of the surrounding and abutting property, giving everything a more substantial appearance and wonderfully assist in controlling the floods in the great gorge of the Willamette—We don't want to keep the people of the upper Willamette bottled up forever and make them pay tribute to the cents per ton every time the "cock" is drawn (West Side Ditch). Good common judgement is going to adjust this East Side Lock proposition just as the wise people of old Oregon City are telling you and you remember that.
