How, indeed?  
The woman who had rented a suit at an uptown hotel is very flustered, but the manager felt when he looked at the rooms after a complete renovation that there was nothing she could find fault with. But there was. She looked carefully at every piece of furniture, scrutinized the decorations and looked at the position of the telephone in the bedroom. Then she went into the sitting room.  
"Why, you have not put a telephone in the parlor," she exclaimed. "Now, suppose I should fall unconscious in this room-some time. Will you tell me how on earth I am going to be able to summon assistance?" - New York Sun

### FASHION DECREES.

The Favored Styles in Suits—Pointed Trimming.  
The tailored suits shown in the shops for early fall and winter wear have skirts that measure from two and a quarter to two and a half yards in width. Many of these models have the tunic effect or show a side slashing. The coats are from twenty-eight to thirty inches in length and a number have a slightly raised waistline.  
Among the newest designs in trimmings, says the Dry Goods Economist, as well as laces and embroideries, are in long pointed effect. In the narrower effects these take the form of vandyke

**SMART SUIT OF SERGE.**  
points, but in flouncing and tunics the points are directed upward, frequently extending from the hem of the dress to the hips. These designs are somewhat newer than the bands.  
Blue serge is a favorite for tailored suits this autumn. One of the new fancies is to trim it with white cloth collar and cuffs touched up with a little black soutache braid. The suit picture is so treated. JUDIC CHOLLET.

These May Manton patterns are cut in sizes from 34 to 42 inches for the bust measure for the coat and from 22 to 30 inches waist measure for the skirt. Send 10 cents each for these patterns to this office, giving number—skirt 703, coat 704—and they will be promptly forwarded to you by mail. If in haste send an additional two cent stamp for letter postage, which insures more prompt delivery.

### MODISH MATTERS.

Crinoline Sleeve Comes to Relief of Present Styles.  
One of the newest fashion features of the fall is the crinoline or hoop sleeve. This is distended at the elbow with a little hoop of wire or whalebone. Nothing could be in greater contrast to the small sleeve of the past season or so than this new conception. The sleeve is built out at the elbow to give a pronounced balloon effect. The boopie part is made of gathered white

**SKIRT WITH TUNIC EFFECT.**  
net and is really an undersleeve, the bell shaped sleeve of the dress material falling over it.  
Among the new materials, of which there are many, are fancy velvets that look like corduroy.  
Here is a skirt with tunic effect, but is cut in one and may be successfully made in all weight and kinds of fabrics. The suggestion is as good for remodeling as for the new skirt.

**St. Cuthbert's Comb.**  
It was formerly the custom to bury combs with the dead, which clearly shows that these articles of the toilet had sacred significance in the eyes of the people of the old world. The comb buried with St. Cuthbert and now preserved at Durham, England, is of ivory and measures six and one-quarter inches in length and four and one-half inches in width. It is ascribed to the eleventh century and has a double row of teeth, divided by a broad, plain band, perforated in the middle with a round hole for the finger.
