EYES OF ITALY ON TRIPOLI.

While the greater part of Europe is suffering from disturbances due to economic causes, and Italy herself is scourged with cholera, the land of the Caesars, taking advantage of the dispute between France and Germany over Morocco has again begun to think of realization of her old ambition for the possession of Tripoli.

Italy has not fared so well as other European nations when she has ventured on land-grabbing ventures. She occupied a portion of the Red Sea a few years ago and the result was an encounter with Abyssinia that eventuated in a humiliating and disastrous defeat for the Italian arms.

Italy has ever had her eyes upon Tripoli, and every time the other European land-grabbers have got busy Italy has concentrated her thoughts upon Tripoli. It lies directly across the Mediterranean from Italy and is rich in traditions of the days when many Roman ruins.

Tripoli is a nominal possession of Turkey, as is Egypt, but it is left very much to itself. While the greater part of the country is a desert, there are still some rich oases and the coastal plains support a fairly numerous population.

Champ Clark and his fool annexation speech must not be forgotten in summing up the contributing causes.

Premier Laurier was made a Knight by King George. Wonder what in the name of goodness he'll make Mr. Borden, hero of the landslide?

William James Conners is not at all sensitive but Tammany domination proved too strong for him.

If King Alfonso wants to know what real trouble is let him undertake to run a newspaper.

Still, there are ninety millions of us and nine millions across the line, so we ought to be able to worry along.

Claus Spreckles says sugar will go higher yet. Sugar must be angelic.

In Kansas they fined a preacher for flirting with his wife. He was lucky they didn't imprison him for marrying her.

Our idea of the way not to test the speed laws is by stepping in front of a rapidly moving automobile.

LIVE WIRELETS (BY EDGAR BATES.)

Much abuse and criticism have been hurled at Governor West regarding his policy of dealing with state convicts. While the onward march of civilization has changed our methods of handling prisoners at state penitentiaries, yet we cannot be in full accord with the policy of our present state executive. The state owes to its citizens a certain amount of protection, a protection which will instill into their minds the fact that their lives, the lives of their children and their property are safe from harm.

How much money do you spend every day on things that you do not need? If you are a man and only smoke one cigar a day at a cost of ten cents, do you realize that this habit will smoke up over \$36.00 a year or enough to buy a good suit or overcoat for better, yet, this ten cents a day will more than pay the premiums on a \$1,000 life insurance policy. No, we don't practice what we preach in this instance, but facts are facts.

The fact that a large number of married women and some of our single ones who hope to be married soon, are so anxious to take up the course of domestic science at the high school ought to give all the girls who are at present attending the high school the "hunch" that this is really the most important thing that is in the course of study. Of course we realize that opinions differ, but speaking from a somewhat selfish standpoint it is certainly better to learn how to cook "before" than "after." This will save many a heartless joke about the "bliss-cuits that mother used to make" and "things were never like this even at the boarding house," and "who told you that this is cake." Don't pass up domestic science, girls.

We predict that before very long the state will furnish all grammar grade pupils with free text books. A large number of states have adopted this policy and in no instance where the plan has been tried has there been a return to the old system of the parents of the children buying books. Of course this matter has two sides to it, but the "school book" question is a very serious one. Already we have a provision made for the furnishing of free books to destitute children, but fathers and mothers will go to extremes before they will admit to their neighbors over the proper officials that they cannot afford to buy books for their children. The books for the eighth grade cost \$6.45; for the seventh grade, \$6.65; for the sixth grade, \$4.50 and so on down the list. So when a man has two or three children to provide for and is working for \$2 a day it is really a serious matter. Washington provides books for her school children and we venture to say that it will not be long before we follow her example.

Speaking of school books, things are not the way they used to be. In the days of "readin', writin' an' rithmetic," which was not so very long ago, three or four books were all that were necessary for a grade. But now the story is different. The little ones just starting must have their water colors and two kinds of readers, those up a grade or two must have their music books, and sewing books. Then comes the call for an agriculture book and so on.

The employees of the paper mill who are affected by the new bonus scheme got busy the first day that the plan was in effect and earned a bonus of 3 per cent by producing 195 tons of paper in a day of twenty-four hours. The men declare that they are going to earn the 10 per cent bonus every day this week. By the way, the local mill has the second largest output of paper a day of all the mills in the country.

It is predicted that the Live Wires will have their hands full this winter. This matter of the locks is at the present time "at the bat," the commission plan of city government "on deck." Other things to be taken up by this organization are the county support of the county fair, the dredging of the rapids, the public dock, and other things in mind that will be sprung at the proper time.

Hardly a day goes by that new accounts are started at the local post-office savings bank. The success of these banks all over the country in bringing into circulation money that has been hidden away for years has proved the wisdom of the move.

Frenchwoman Holds Distance Flying Record For Her Sex

Photo by American Press Association.

M LLE HELENE DUTRIEU just now holds the long distance flying record for her sex. She recently made a flight of 140 miles, just twice the distance that had been previously covered by a woman in an aeroplane, and she says she is prepared to do still better if some daring American woman will surpass her achievement. Miss Dutrieu was a trick bicyclist before taking up flying. She was one of the first women in the world to operate an aeroplane, and she soon proved to be daring and skillful. She recently came to the United States and has been making exhibition flights. In the picture above she is seen seated in her aeroplane wearing the garb that she devised for flying.

POCAHONTAS ORDER PLANS TO GIVE BALL

The second annual ball of the degree team of the Pocahontas Order will be at the Busch Hall, Saturday night, November 17. The music will be furnished by Parsons' full orchestra, of Portland. This promises to be one of the social events of the season. There are to be twenty dances on the program, and all the latest dance music will be played. The committee on arrangements consists of Mrs. Effie Bittner, Miss Rose-Tamschki, Miss Amanda Zak, Miss Gertrude Guvaliska, Mrs. Mary Cannon, Mrs. Ida Stums, and other committees will be appointed at the meeting to be held next Wednesday night, and further arrangements will be made.

WILLIAMS FAVORS WOODROW WILSON

MERIDIAN, Miss., Oct. 11.—(Special)—That he will support Woodrow Wilson, governor of New Jersey, for the Democratic nomination for President of the United States, is the statement made here today by Senator John Sharp Williams of Mississippi, one of the most prominent figures in national Democratic politics. "After giving the subject careful thought," said Williams, "I have concluded that Wilson is the best man to nominate. I think he would be able to carry the west and would stand better in the north than any other available Democrat. He would be strong in the south."

SERVICES AT GLADSTONE.

Rev. L. F. Stephens and wife, of Portland, are holding meetings at Gladstone and will probably continue them for some time. Their friends have been looking forward to these meetings for some time and splendid results are expected. Mr. Stephens is an able preacher, a ripe evangelist and his wife is a splendid singer. Friends of the Christian church consider themselves fortunate in securing such a splendid evangelistic team.

The Enterprise has a position open for you. Call at once.

REACHING OUT FOR BUSINESS

Every effort to attract trade helps, even if it only draws a child's wish for candy. Electric light for windows and signs should be given a chance to be useful. Every merchant can now get double electric light at no increase in cost for electric current by using MAZDA lamps. Made in all sizes. We have them and will be glad to tell you about them.

Why Americans Do Not Profit by Higher Wages

By GEORGE GEARING-HIATT, English Sociological Student, Now in This Country

AN American girl will wear a plume costing from \$15 to \$25, more than an English girl earns in a MONTH. CHILDREN have much MORE MONEY to spend.

The American spends more on food. I think he needs more. It seems to me, though, the food here is not so NUTRITIOUS, due, I believe, to COLD STORAGE.

The wages of American workers are from TWO to THREE TIMES as much as those of the Britisher, but at the end of the week the AMERICAN toiler is NO BETTER OFF than the BRITISHER.

SHIP SHORTAGE IS CAUSING BIG LOSS

The great shortage of ships available for grain shipment to Europe is causing the loss of thousands of dollars to farmers of the Pacific Northwest. Sailing vessels are being generally quoted at 3 1/2 and are very firm at that figure while at the opening of the chartering season ships were obtained as low as 27.5.

This great advance in the price of freights, due to the scarcity of tonnage, is causing weakness in the grain trade and strength abroad. While further liberal advances have been forced in the price of wheat at Liverpool and at other European centers Pacific Northwest markets are rather dull. Prices are being barely maintained at 78 to 79c for club, based on track delivery tidewater. Not only has the advance in freight charges caused a weakness and lower

An Umbrella Joke.

Gotham town is easy or not, just as Gotham town is in the mood. A practical joker had made for him a property umbrella which wouldn't open or do anything else a well brought up umbrella ought to do, honestly owned or wicked stolen. Then when the rain was coming down heavily one day he set it outside the door of his office in the corridor of a populous skyscraper for somebody to pinch when the force of water was to follow the malefactor down the elevator and jeer him as he tried to put it up in the downpour. The umbrella stayed there all day. Not a soul would touch it. Oh you New York!—New York Press.

Double Work.

First Decorator—I advised him to have his house decorated during his wife's absence as a surprise. Second Decorator—Good! Then we'll have to do it all over again when she gets back.—Lita.
