A DOUBLE **PART**

lutionist With Serious Results

By PETER VALOVITCH Copyright by American Press Asso-

I began my career as a revolutionist by acting as a pretended spy for the government. Working in secret on two sides I found to be doubly perilous. On one occasion I made a narrow escape from being put out of the way by the very men I was serving. I was working in the interest of the prime minister or pretending to work in his interest and at the same time was a member of a secret revolutionary circle. In order to guard against danger from the circle I chose one of its members. Michael Orloff, for

my confidant, trusting to him in case

was working a deep laid scheme in the interest of the revolution.

I laid a plan which I felt sure would give me the entire confidence of the minister. I told him that I had discovered the meeting place of a circle whose members were conspiring to assassinate him. My intention was to have him send a force to arrest the circle, of which I was a member, while they were in session. But I intended that the force should arrive after the meeting had broken up. At the proper moment I would announce to the circle that I was a pretended spy for the government and inform them of the plan I had laid. They would disperse, leaving documents to show that the place had been used by revolutionists. but nothing to incriminate any one of

It was a hazardous scheme, but Johnson aready has many fruit trees felt that if it were successful it would give me a footing with the government on which to found a still greater benefit to the revolution. But I dare not tell the members of the circle be forehand what I was about to do, for was not sure but that some one of them was a government spy, such as I pretended to be. Such things now and then occurred.

On a certain day I told the minister that the revolutionary body whose members were conspiring to assassinate him would meet at a certain place at 11 o'clock at night. If he would send a force there at half past 11 he would capture them. The meeting hour was really 10 o'clock, and I intended by 11 to have warned my associates. I charged the minister to have the force at the meeting place at the exact hour and minute I had given him, else the plan would go amiss And so it would, but for the circle in

stend of the government. Though by keeping the matter a se cret from my comrades till the last moment I headed off any one of the members who might be a government spy, there was another danger, but it did not occur to me. Suppose one of our number should secretly be playing

the same game I was. Our ctrcle met at the appointed hour 10 o'clock. I waited anxiously for Orloff to come in, since if my scheme should react upon me my life would depend upon his evidence. But the president called the circle to order, and Orioff had not arrived. Half an hour elapsed while we were in session, and still he did not come. Then suddenly something happened which filled me with consternation. Peter Vronsky. one of the circle, came in hurriedly and said

"We are betrayed." Every man started from his seat but the president directed that we re main where we were.

"By whom?" he asked. "One of our number." "Which one?"

"I do not know." Fortunately the eyes of the members were concentrated on the man who rave the information, so that no one noticed the pallor that spread itself over my face when the words "I do not know" were spoken. I recovered myself, for I inferred that some time would elapse before I should be identi

Every possible precaution had been Heeliese Slipper Once More the Vogue-Smart Bash Effects. taken since our first meeting to insure against surprise and to deceive any force which might come upon us as to our real character. There were several scientific men in our midst, and like effect is produced. certain instruments and books used by them were kept on hand to be pro-

inating documents burned. We had barely got things in order when there was a sound of footsteps without, and a man wearing a heavy beard that concealed his mouth and chin and with his hat drawn down over his eyes entered.

duced in case of emergency to prove

that we were a society intended for

the advancement of science. These de-

vices were brought out and all incrim-

"You are my prisoners." he said. "Why so?" asked our president.

"You have been accused of plotting the assassination of a minister." "We are men of science met for its advancement." "You cannot deceive the government

by any such trick." "Surely we will be given an opportualty to prove what we are."

"You will be given an opportunity to prove nothing. You will be marched from this room to Siberia."

The man who arrested us, backed by force whom we could hear moving about in the hall, ordered us to stand up in line preparatory to being marched away. It seemed to me that the only thing for me to do was to declare myself a spy for the government. I beckoned to our captor and whispered in his ear that I had given the information upon which he acted and asked to be taken to the minister. Immediately a great change came over every one present.

"Enough!" excinimed the president. "Our ruse has been successful." Looking at his watch he added, "We still have an hour to get away, and before we go it behooves us to make way with the traitor." Then addressing me: "Vronsky, who has been pretending to be a government spy, learned this morning that some one of our number had betrayed us, and we were to be arrested tonight at half past 11 o'clock. Since he did not learn the name of the informer we adopted a ruse to discover him. This man who has made the arrest is Schierlieff, one of our number, and those in the hall are other members of our circle." Schierlieff pulled off a false beard,

and I recognized him at once. "Comrades," continued the president, 'It is necessary to put the traitor out of the way at once, for we must leave this place within a very short time. We will draw lots as to which one of us shall stab him to the heart, s method of execution that will be with out noise and attract no attention."

But one person could interpose be tween me and death—that was Orloff. Why he was not at the meeting I knew not. I had charged him to be there, but had not told him why it was essential. I hurriedly told the circle every circumstance that had led me into my present position, but not one of them believed a word I said.

"If this is true," cried one of them. you are at least a fool not to have made some arrangement by which you could prove your case. And a fool among us is as much to be feared as "Orloff's my confederate." I said.

"and he is not here. Send for him." "We have not time. Before he could reach us the hounds you have set upon

us would be here." "Come." said the president, "prepare the lots."

The secretary hurriedly scratched the name of every man present on a separate piece of paper, and they were placed in a hat. Then I was required to draw the name of my executioner. put my hand in automatically, for it seemed that the currents of my feelings neutralized one another, and drew out one of the slips. The presiden seized it and read out a name, but I was too overcome to hear what it was. I saw my executioner take off his coat and roll up his shirt sleeves. Then one of the circle handed him a long dagger. I was setzed by two others. led to one end of the room and turned about. I saw as if in a haze my executioner standing at the other end. looking pale and sick at beart at the work he was about to do. Then, at a word from the president, he advanced toward me.

There was a sound of footsteps without, the door was opened and Michael Orloff strolled in leisurely. Seeing me standing where I was and one of the circle advancing toward me holding a knife in his hand while the others looked on, some vengeful, others shrinkingly, Orloff's face took on an expression of surprise.

"Orioff." I cried, "save me!" "Hold!" said the president to the ex-ecutioner. Then to Orloff, "Are you a depository for a secret concerning this

"What is it?" "Shall I tell?" Orloff asked of me.

"For heaven's sake, yes, tell all." "He has been pretending to play the part of informer for the government

His beart is really with us." "Can you prove that he has really been acting for us?" "How?"

"By documents he has left in my pos "Very well. Let us go at once.

in twenty minutes our retreat will have been cut off." We left the apartment at once, but I was kept in the center of the others and carefully guarded until it became possible to examine the document that I had left with Orioff, after which I was exonerated from the charge of being a spy. But I never again attempted to play a double part.

One day a farmer entered a hardware store and asked if he could exchange some butter for hardware. The

humor of the thing appealed to the "Why, certainly," he said. "Take the butter right up to the bouse.

The farmer looked him over slowly and critically from head to foot and then drawled out: "Land o' Goshen! I should say . not l'-Los Angeles FADS OF THE MOMENT.

VIOLET BEAULIAU

A jolly party of young folk gathered at the home of Mr. and Mrs. A. C. Beauliau, when the ninth birthday of their daughter, Violet, was celebrated, and the little hostess was the recipient of many handsome gifts. The house decorations were very pretty, the predominating colors being white and pale blue. Carnations and ferns were used in abundance. The table was one that attracted the eyes of the little ones. These decora-tions corresponded with those of the in vocal and instrumental music and games. Misses Gwendellyn Trudell, Bergie Johnson and Wilma Myers

assisted Mrs. Beauliau in the enter taining Present were Velma Randall, Ruth Schuebel, Geraldine Schwab, Lucile Theressa Stuart, Margaret Simmons Helen Andresen, Margaret Beatle, Marie Audresen, Florence McGeehan Ruby Long, Elva Erickson , Haezl Miller, Fayne Burdon, Emma Brech, Frances Andrews, Dorothy Stafford, Marie Walker, Mildred Hall, Agnes Percold, Marjory Reed, Frances Bow land, Elda Baxter, Gladys Blount Helen Seeley, Ruth Shubel, Glyde Landsborough Shubel Margaret Katherine Eastham, Letha Cross, Vio let Beauliau, Mr. and Mrs. Lou Dockstader, Gwendellyn Trudell, Bernice Johnson and Wilma Myers.
