The third anniversary of the Firwood Progressive Association was celebrated in an appropriate manner Saturday evening. A nice program was given and a fine supper served by the ladies. All had a most enjoyable time.

At this time of year one's thoughts tend to look backward and this affords occasion to look back over the year's work and to think of the many things in the line of advancement and improvement which we have to be thankful for. It would be well for those who were living here three years ago to stop and compare conditions. For instance the meeting of last Saturday evening with the first meeting, when about thirty met in the old store building, sitting on counters and boxes. All were requested to bring their lanterns with clean chimneys to light the hall. Everyone went to see what some one else would do and it was almost impossible to get anyone to voice their sentiments.

The idea of forming an association was devised by A. C. Milliron. He pondered over the conditions of the community in general for some time and talked it over with a few friends and they decided something ought to be done toward furnishing amusement and instruction for the young people, as they were growing up with no chance for development except in hard work. There were no musical instruments to speak of in the country; no music in the schools, no libraries, etc. The country needed a waking up. After formulating plans Mr. Milliron set out to canvass the country and take up the subject of cooperation, etc. He visited every home within several miles and found the majority in favor of the idea, but they had no encouragement to offer, and looked upon it as visionary. They all voiced the same sentiment—it would be impossible to get the people to hold together or do anything—but as in every new undertaking if two or three set out with a determination to win and make a success of a project, not stopping to falter, it cannot help but succeed, and so it has been with this. Much might be said of the difficulties encountered, but they were all met and overcome and we now have the desired result. The object of the association, as announced in the start, was to secure the services of the Farmers' Institute, obtain a library, raise funds to procure an organ for the school and to be used by the association providing it held together. All of this was accomplished within a very short time. Since then the telephone company was formed and there is scarcely a home in the country that is not connected with the outside world by phone. We were also able to have a small road district set apart, whereby we could improve our own roads, and not have to go eight or ten miles. The country has undergone a wonderful transformation; much benefit has been derived through the bringing of our country to public notice through the Oregon City papers, all of which they have done free of charge and we are most grateful for this and appreciate their favors.

The Morning Enterprise has purchased from the Elliott Garage a new 1912 Model T five-passenger Ford automobile to be given away as a premium in a circulation contest to be inaugurated soon. There is no car manufactured that exceeds the Ford in popularity, and last year the Ford factory sold one-fifth of all the cars purchased in the United States. The car is built for durability and is a roadster par-excellence. Grant B. Dimick, W. A. Huntley, J. E. Hedges, C. Schuebel, Captain J. T. Apperson, F. M. Swift and E. P. Elliott are some of the users of Ford automobiles. There is value in a Ford car and the Morning Enterprise proposes to give one away. We want more circulation and we have spent \$785 at one throw to help get it. Watch the Morning Enterprise for future announcements. The field is open. Everybody is going to have a chance to win this fine machine.
