IN FASHION'S MART.

New Lines In Fall Tailor Mades-Serge

One or two tailor mades have been een with bell skirts, and in all probability this will be a favorite model. The truth is every one is tired of the tight skirts, and there is a decided leaning toward skirts with a slight flare at the bottom, but tight about the hips. Serge de sole and satin felt are named as two of the leading tailor materials. The names indicate the textures. Both are silky in feeling and luster, yet have a wool body.

Some of the new materials being made up for autumn show reversible One is a fine satin cloth with one side plain and the other side plaid. A navy satin cloth costume has a rich plaid facing and is made with a tunic skirt, the tunic being turned back from the feet in front to show plaid revers. The coat, much longer than those worn during the summer,

has plaid revers, which hang wide and soft, and the long set in sleeves have turned back points like the one on the skirt. Plaid buttons fasten the coat. and smaller ones trim the revers.

Long coats with loose fronts are greatly liked. The one illustrated has an empire back that gives exceedingly smart lines. The sleeves are cut in one in peasant style, and the big collar may be made either round or pointed. JUDIC CHOLLET.

This May Manton pattern is cut in sizes 10 cents to this office, giving number, 7128, and it will be promptly forwarded to you by mail. If in haste send an additional insures more prompt delivery.

FRIBBLES OF FASHION.

Frenchwomen Wear Jeweled Crosses With Tailor Mades.

A French fad that has recently crossed the water is that of wearing a huge cross of precious stones or one of the large French disks suspended on a chain outside the coat just below the revers closing in suits of heavy rough goods such as tweed and Scotch mix-

tures. The fashion has been revived of suspending a small bead or mesh purse the purse to be modish should be set with jewels to match those of the

DART FITTED DRAWERS.

chain. The purse is hung just below the bust or as far as the waist line,

never lower. Women who motor are wearing white ratine coats with roll collars and cuffs of some brilliant shade and buttons to match.

The new fillet lace jumpers showing a design worked out in wool embroidery are very smart, and any girl who embroiders can make a waist of this kind with little trouble.

Dart fitted drawers are worn by the smartly dressed woman nowadays. The illustration shows a good design for this article of underwear. Any kind of trimming may be used. JUDIC CHOLLET.

This May Manton pattern is cut in sizes from 22 to 32 inches waist measure. Send 10 cents to this office, giving number, 7126. and it will be forwarded to you by mail. If in haste send an additional two cent stamp for letter postage, which insures more prompt delivery.

A Danger Averted

By IOSEPH C. CRANE

From my first meeting with Agnes Myrtle she showed a partiality for me. I was fancy free, but I did not fancy Miss Myrtle, Circumstances threw us together a great deal, but I never really made love to her. Nevertheless she persisted in assuming that there was more between us than a mere acquaintance or friendship. I should have scented danger. Indeed, I did at times realize that I was drifting into trouble, but the only way for me to break with her was to go to live in another place. This was scarcely practicable.

How long matters might have drifted between me and Agnes Myrtle had I not fallen in love with a girl whom I desired to make my wife I don't know. Agnes heard of my attentions to the lady I admired, but she did not evince any jealousy. I became engaged, but still Miss Myrtle did not show any signs of making trouble for me. I was congratulating myself that she would be above annoying me or was, after all, indifferent to my engagement when one day I received a telephone message from her saying that she was not feeling well and would like me to call upon her profes-

I wished she had called in some one else. Indeed, I was surprised at her calling upon me after she had so often assumed that we were lovers and I had become engaged to another. Nevertheless I thought it better to make the visit. I found her becomingly dressed in negligee costume lying on a lounge. She told me that she needed a tonic, and I prescribed one that was perfectly harmless. She asked me what it was and when I told her said that she needed something stronger. She had once taken arsenic in small doses for the purpose of building up her strength and preferred that I should give her some compound of which arsenic formed a part.

Arsenic is a common medicine to give for tonic purposes, so I wrote just such a prescription as I had written many times before. Agnes took it, folded it carefully and put it in her corsage. Then she began to upbraid me with what she was pleased to call my treatment of her. I disavowed her charges, but as our talk proceeded 1 saw in her eye a vindictive look that frightened me. Then suddenly it flashed into my mind why she had asked for a prescription for a drug which was a deadly poison.

"Well," I said, rising, "it would not do for me, you feeling as you do, to treat you professionally. I must withdraw from doing so. I will trouble you for the prescription I have given

She hesitated for awhile, then threw off all disguise. "I shall keep the prescription," she

"What for?"

"I decline to say." What I feared was that she might change the infinitesimal quantity of ar against me a charge of an attempt to poison her, the motive being that I wished to get rid of one girl in order to be free to marry another. For a moment I lost my prudence.

"If you don't give me that prescription I shall take it from you by force," said.

For reply she coolly pointed to an electric button in the wall within easy reach. If I attempted to possess myself of the prescription she could easily summon some one who would be witness against me on another charge. It was now evident that the only

chance for me to get out of a scrape that would ruin me would be by dufrom a long neck chain. The top of plicity. But for my life I saw no immediate method except to pretend to gradually see my relations with her in another light-to appear undecided and at last ready to give up my engagement and engage myself to her.

I sat down by her and began a more frightful string of lies than were ever told by the father of lies himself, the purport of which was that I really loved her, had always loved her and would never love another. The only possible reason for her believing me was that she wished to believe me. "Why, then," she asked, "have you treated me so badly?"

"Because," I replied, "you are doomed. I do not believe in a match between two persons, one of whom has but a short time to live." "I? A short time to live!"

"Yes. You have a disease that will kill you within a few months." She was very much frightened. She had a high opinion of my professional

skill and considered me truthful. "Can't you do anything for me?" she sked bastily.

"Are you sure?" "Your disease has always been regarded as incurable, but a friend of mine has been experimenting to discover a serum for it and, I believe, claims to have found one. I will see him, and if he has been successful I

will apply it in your case." I turned to go. I did not dare to ask for the prescription I had given her, though I boped to get possession if it in time. She called me back and handed it to me. Crumpling it in my hand, I said:

"Thank beaven! With that paper you could have ruined me, the girl I bve and yourself. Now I defy you!"

The Wiscom of Pools.

Folly, in the abstract, has been denounced alike by Scripture and ancient heathen sages. "If I wish to look at a look. I have only to look in a mirror." The Emperor Maximilian distinguished the dullest of his counselors by the title of the king of fools. Once when he ad dressed a prosy adviser by this title the gentleman neatly enough replied: wish with all my beart I were king of fools. I should have a glorious king
