Methods of German Miners.

In Germany when the miners go to work they take off their clean clothes at the mine's mouth and then bathe and change on leaving work. Shower baths and lockers by the hundreds are in the coal country of Germany, and miners are never seen abroad in working clothes. Perhaps the German miner is the healthiest in the world, some of the other countries being far behind the fatherland in furnishing accommodations and facilities for miners to take baths and dry clothes at the mine's mouth.

How Is Your Watch? If it is not running accurately perhaps it needs a little adjusting. Bring it in to us and we'll give it expert attention. A watchmaker should be a watchmaker, not a tinker. Ten years' experience in repairing all kinds of timepieces from the simplest to the most complicated have helped us to master the art of watch repairing. OUR WATCH WORDS ARE CAREFULNESS, COURTESY AND CAPABILITY. The owner of a much appreciated watch often hesitates about intrusting his timepiece to a repairer, and justly so, since a good watch may easily be spoiled by carelessness. W.
