**CHILDREN MENACED BY AUTO SPEEDERS**

Complaint has been made in the residence section of automobile speeding and during the past few days several accidents have been narrowly averted by careless chauffeurs. On Twelfth street near the junction of Washington street a collision nearly occurred between a motorcycle and an automobile Sunday. Many of the drivers of the automobiles fail to blow their horns when there is danger. Children playing in the streets have been endangered. A city ordinance fixes the maximum speed of autos in the city at eight miles an hour. Residents are complaining of the chauffeurs allowing exhausts from the engines, which makes unnecessary noise.

**BITULITHIC PAVEMENT SATISFACTORY**

Officials and Property Owners alike Recommend It. There is no more satisfactory way of judging the merits of any particular kind of pavement than to compare the amount laid year after year in the various cities where the pavement is subjected to all kinds of conditions. The varying climatic conditions of the United States and Canada, from El Paso, Texas, on the South, to Edmonton, Alberta, on the North, and from Atlantic City on the East to Portland, Ore., on the West, afford a severe test. Officials and citizens alike, in over 250 cities of the United States and Canada recommend Bitulithic pavement, where this class of pavement has been in use and the number of yards laid and contracted for has increased at a phenomenal rate during a period of ten years. Cambridge, Mass., an extreme Eastern city, shows an increase of approximately 110,000 square yards since the year 1901, and Portland, Ore., an extreme Western city shows an increase of 1,500,000 square yards in a like period. Throughout the United States the progress of a city can almost be determined by the use of Bitulithic pavement. Information gathered from city officials and unprejudiced business men in the various cities concerning Bitulithic pavement, entitles it to first consideration because of its many admirable qualities.

**The Tarantula.**

The sting of the tarantula (a name derived from Taranto, a town in Italy), the most venomous of spiders, was popularly supposed to produce a disease called tarantism, which could be cured only by music or dancing, and the dance which cured it was called tarantella. You can see the peasants dance the tarantella now, but without waiting for spider bites.

**Made Cubans Sit Up.**

When President Taft told Cuban revolutionists that he had an army of occupation ready to sail, they concluded to be good. The next time an American army lands in Cuba, permanent barracks will be constructed and the stars and stripes will permanently enhance the beauty of Cuban scenery.

**A Surprise**  
By MARTIN BRADFORD

I am a college professor and add to my income by lectures on astronomy. One November day I started to walk from the town of A., where I had just given a lecture, to the town of B., where I was to give one that night. The weather was Indian summer and delightful. Some of the trees were late in shedding their leaves, and the woods were here and there still decorated with patches of scarlet, brown and deep green.

On emerging from a cut through which the wood ran I saw a man walking ahead of me. I don't mind a companion now and then in my walks, so I hastened my pace and caught up with him. I found him to be about thirty years old, dressed in shabby genteel clothes and of an intellectual cast of countenance. I addressed him, speaking of the beauty of the scenery, the autumnal glow and the invigorating atmosphere. He responded appreciatively.

After chatting a while on general topics he asked me where I was going, and my purpose to give a lecture that night at B. on astronomy came out. He said that he had always had a desire to know something on that subject and regretted that his education had been neglected, for if it had not been he would certainly have devoted some time to the study of the stars. Would I tell him something about them?

It occurred to me that this would be a good opportunity to rehearse my lecture. My subject was to be, "The Solar System," and, beginning with the central orb, I gave its dimensions and weight and then passed to the planets in their order of distance from it, ending with an account of the discovery of the farthest, Neptune, by means of the perturbations of Uranus, then supposed to be the most distant satellite of the sun. My companion seemed greatly interested in this marvelous power of a man to reach out into space and take cognizance of a world invisible to the unaided eye had greedily absorbed all I told him, though, being expected to lecture to a popular audience, I did not enter upon the marvelous development of knowledge of the constitutional ingredients of our system with the interpretation of the lines on the spectrum. In other words, I contented myself with stating the simplest truths known half a century ago and within the grasp of ordinary intellects.

giddiness to which I am subject and which is always followed by a disability for either hours or days. My companion kindly guided me to a farmhouse beside the road and ministered to my wants. I told him that I was very much troubled at the prospect of not being able to keep my engagement to lecture, and in order to help me out of the difficulty, since he was going to B., he offered to call on the manager of the course and explain my unfortunate position. I told him to say that I would not be able to lecture the same night even if I were able to get to B., but the lecture might be put off till the next evening or such time as I had recovered. He promised to bear my message, but put a damper on my anticipations by asking for a small loan. I gave him what he asked.

In the course of a few hours I felt so much better that I made a bargain with the farmer with whom I was lodged to hitch up a team and drive me into B. I would reach the town too late for the lecture, but that would have been postponed anyway.

On driving into B., which I reached about half an hour after the hour set for the lecture, I was surprised to see the hall in which it was to be given illuminated. I asked the farmer to pull up. I got out and entered the hall. To say I was astonished conveys little idea of my condition. There on the rostrum was the man who had taken my message, speaking easily and gracefully on the solar system. In short, he was delivering my lecture, but so much more easily and gracefully than I could have done it, so enriched with entertaining facts and with so much poetic inspiration, that I sank into a back seat and listened spellbound.

No one present had ever seen me. The man had palmed himself off for me and was speaking for me far better than I could have spoken for myself. When he came out I joined him. He felt very uneasy and drew me aside as quickly as possible to tell me that he had not been paid for the lecture and had no idea of perpetrating a swindle.

He turned out to be an Oxford graduate who had come to America and got run down. I took him with me to my college and succeeded in getting him a chair which for awhile he filled ably. But there was a screw loose in him. One day he disappeared, and I never heard from him again.

**Cracking a Nut.**  
The force required to crush an ordinary nut, such as one too often sees cracked between the back teeth, has been shown to be equal to a weight of more than 110 avoirdupois pounds directly applied.

**Connecticut.**  
Connecticut, a name so baffling to foreigners, is Indian and means "land on a long tidal river." The Indian form of it is Quin-neh-tuk-quet. In some of the early records it is spelled Quinetuckquet.

**Their Use.**  
"What is the object of repeating rifles?" "Of course, to make every shot tell."—Baltimore American.

**WALTER M. PIERCE TO SPEAK HERE SATURDAY**

Walter M. Pierce of Hot Lake, candidate for the Democratic nomination for United States Senator, will speak in the interest of his candidacy in this city Saturday evening. Mr. Pierce is one of the best known men in the state, and his friends are confident that he will be the nominee of his party. He is opposed by Dr. Harry Lane, of Portland; O. P. Cashow, of Roseburg and M. A. Miller of Lebanon. Mr. Pierce will be accompanied to this city by Frederick J. Phelan, secretary of the Jackson Club, of Portland, and his advertising manager, Frederick Curry, of Hot Lake. Mr. Pierce is an engaging speaker, and it is expected that a large crowd will hear his address.

**Look at This**

"A littl nosense now and then With every change of season, Is relished by the host of men Who read the Appeal To Reason. "MR. DOOLEY. "Said Mike to Pat, begobbs, I think I'll go to Hollihan's raising, Said Pat to Mike, I'll stay at home And read the Appeal To Reason. "MR. DOOLEY."

**WOMAN'S CLUB TO HAVE MEETING THIS AFTERNOON**

The Woman's Club will meet in the Commercial Club parlors this afternoon, the hostess of the afternoon being Mrs. S. S. Mohler, Mrs. T. E. Beard will have charge of the literary program and the subject will be Oregon products, industries and resources. Mrs. Beard will be assisted in her part of the program by Mrs. Anna Downey, T. J. Gary, county superintendent, will talk on "How to Interest the Children in Beautifying Their Homes and School Grounds." Mr. Gary will tell how to interest them in this line. Mrs. Mohler will have charge of the musical program. This will be one of the most profitable meetings held by the club, and no doubt will be interesting and well attended.

**MRS. ADAMS HONOR GUEST AT PARTY**

Mrs. L. E. Jones was the hostess of an informal Wednesday afternoon bridge party at her home on Seventh and Monroe streets. Her guest of honor being Mrs. John Adams, who leaves the latter part of this week for Portland, her future home. As Mrs. Adams is a member of several clubs of this city the members, friends of Mrs. Adams, were the guests on this occasion. Mrs. Jones proved a most delightful hostess. Prizes were given the winners in bridge, and a delicious luncheon was served. The decorations were of Lauristina blossoms and jonquils, these being arranged in the living rooms in a most artistic manner.

Watch the automobile contest. The Morning Enterprise is the best breakfast food you can have.

**STOP! LOOK! Listen?**

Working for the other fellow and Get Busy for Yourself  
What can be won with a little work a fine prize every 10 days  
To what people are saying and you will see how popular you are THEN GET IN AND WIN

Yours for the asking

Don't it look good to you

To stimulate interest in the voting and to give each one a chance to profit by their work we will give a prize every ten days. These prizes will not affect the final count in any way as all votes will count on

**THE GRAND AUTOMOBILE**

These prizes will be given to the one that hands in the largest number of votes very ten days.

The Third Special Prize for the best 10 days showing will be an order on J. Levitt's Popular Store. This order is good for anything in his store worth up to \$15.00 or can be applied on a larger account. This order had ought to be worth every effort you can put forth.
