velvet and gun metal pumps
and oxfords, sizes 3' and 4,
widths B, C and D, to be sold at

HALF PRICE

The Pygmy Hippopotamus.
One of the animals least known to
the outside world is the pygmy hippo-
potamus of West Africa. It is just
what its name implies, a pygmy hippo-
potamus. It is much smaller than the
common hippopotamus, being no larger
than an ordinary or fair sized hog. It
differs somewhat from the common
hippo in the character of its teeth, and
instead of spending its time in the riv-
ers and lakes in large herds it wanders
about through the jungles singly or in
pairs, much after the manner of swine
in search of mast.

Marines.
Marines—soldiers serving on ship-
board—date back to the year 1664,
when an order in council, dated Oct
16, authorized 1,200 soldiers to be
raised and formed into a regiment.
More regiments were later on formed,
and by 1759 the marines numbered
18,000 men. In the latter years of the
French wars they numbered 32,000.
The marines are today a feature of
every navy, and in most countries
officers of the marines are equal in
rank with those in the army and
navy.—New York American.

All Feet.
"In a large city like New York one
may find many queer names, particu-
larly of people," said a license clerk
at the city hall, "but seldom does one
find the succession of names in the
same family continue in this odd
groove. I came across such a case the
other day. George C. Foote and Miss
Mary Stocking came to me for a li-
cense to wed."
"Out of curiosity I asked Miss Stock-
ing for her mother's maiden name.
She said it was Miss Shoemaker."—
New York Press.

The Peanut.
The peanut is a mine of riches, con-
taining more protein, or lean meat val-
ue, than any other nut known and an
immense store of fat, so that as a food
it is a rich treasure, but it should be
recognized and used as a solid food
and not as a between meal tidbit, for
it is anything but a delicate or light
food. This, however, may be said of
all nuts, and one should avoid over-
loading the system with them, for by
this is indigestion formed and unde-
served reproach to nuts as foods.

Beliefs About Waves.
The Persians believe that the waves
of the Persian gulf are caused by air
entering caves which have subterra-
nean outlets under the ocean. One of
the most curious beliefs of all—one
closely akin to a certain ancient orien-
tal hell belief—is that of the south sea
islanders. According to their notion,
the rolling of the sea is caused by a
"thunder god." In old times this
"thunder god" killed the chief deity of
the islands and was confined under the
ocean as a punishment. His rolling
with rage causes the waves.

Some Men Do That Anyway.
"What would you do if you had \$1-
000,000?"
"Nothing."—Detroit Free Press.

LOWER ELECTRIC RATES

As a result of economic methods and the acquirement of additional facilities, the
PORTLAND RAILWAY, LIGHT & POWER COMPANY takes a great deal of pleasure
in announcing to the citizens of Oregon City and the surrounding territory an impor-
tant reduction in its electric light and power rates.

IMPORTANT

It has been the constant policy of the Company to give good service at reason-
able rates. The Company is more interested than anybody else in building up a bigger,
busier and better Portland, and it fully recognizes the important influence of low rates
and good service. The new lighting rate is 9, 7 and 4c per kilowatt hour. Details of
this reduction and the conditions involved can be secured upon application at any of
the Company's offices. Several months will be required to change over the 31,000 ac-
counts which this reduction in lighting rates will affect. In order that our patrons may
be put to the least possible inconvenience, new contracts will be mailed beginning May
1st. The Company earnestly requests that these be signed, witnessed and returned to
the Company's representative in Oregon City as promptly as possible, thus avoiding
the possibility of waiting in line at the office.

**Portland Railway, Light
and Power Company**

MAIN OFFICE SEVENTH & ALDER STS.
PHONES MAIN 6688 AND A. 6131.

A Pound of Coal.
One pound of good coal has sufficient
energy to lift a man fourteen miles
high.

Thumb and toe nails.
A lost thumbnail will be generally re-
placed in five months, and a great toe
nail requires twice as long.

Baldness.
According to a Parisian physician,
premature baldness is the result of
some teething trouble.

The Greyhounds of the Road

Price \$685

F. O. B. Oregon City, Fully Equipped

YOU have seen the big pretentious, showy
cars clattering noisily up the hill on low
gear, like taking a big freight elevator to the
sixteenth floor---the idea has gone out of date.
Henry Ford exploded it long ago. He brought
out cars of ample size, but built the bodies, as
well as other parts, light in weight, and put in
motors of ample power. Now Ford cars are
the greyhounds of the road. They take hills on
the high gear. They are noiseless and vibra-
tionless. Easy to run and inexpensive to operate
