**Makes Sewing a Pleasure**

If you could eliminate the tiresome drudgery of pedaling--wouldn't sewing be a pleasure instead of a task?

An electric sewing machine motor attached to your machine does all the WORK, giving any speed desired by the mere pressure of the foot on the treadle.

Current can be drawn from any one of your electric light sockets--at any time--in any room--at a cost of but a half-cent an hour.

Let us explain how simply the motor is attached--how easy the control--how safe the operation. Ask us today.
