For the Children

A Pennsylvania Boy and His Queer Pet.

Children as a rule are interested in chickens, especially the wee "peeps" that have just come out of the shell. And what better fun for youngsters than the care of a flock? The crowing roosters, cackling hens and sprightly chicks are attractive, and the gath ering of eggs from their own flock and taking them to mother is joy for any boy or girl. Poultry care is a nature study and for that reason is good for the young folks. It is good for any child who can do so to have a few for their very own. The boy in the picture has made a pet of a big Brahms hen.

Caps For the Doll. When a doll's hair has been worn away around her forehead so that it is no longer pretty it is a good plan to put a narrow band of velvet or satin ribbon around the forehead to conceal the worn parts. The ends are fastened in the back with a little pin. The hair is puffed above this and made up in a kind of knot on the back of the head If the doll's hair has been entirely spoiled she will have to wear caps. Just now it is very fashionable to have a number of these caps, some for morning and some for evening wear. The morning caps are called boudoir caps, and those meant for evening wear are called theater caps. The caps are made of fine white material, net or chiffon. and they are exactly like the caps that real people are now wearing. There is a full crown and a ruffle of lace around the face. Small flowers and little bows of ribbon are used to decorate the caps. They may also be made of gold brocade or gold gauze over a colored silk lining.

"Did you find it on the beach, honest?" asked Dolly, looking up innocently.

"Honest." She dropped her eyes to the floor. Evidently she was affected by this unknown lover who was worshiping her from a distance. It did not occur to her that if he was forbidden to woo her he had better not have commenced to do so.

"Going to tell Billy about it?" asked the pretended finder of the bottle.

"I don't know. The rascal did not wait for her to make up her mind about the matter. He told Billy himself. The same afternoon when Billy met Dolly on the beach he looked out at the ocean. Dolly wilted. That evening Dolly was sitting on the beach doleful. It is singular that when a girl gets one lover she is surpassingly happy. Two invariably make her miserable. Billy passed on, but Dolly didn't call him. She was sure he was miffed about this new unknown lover. He would vex her with questions and she didn't wish to be questioned.

Detailed Criticism. The following is not an excerpt from report of a cruelty case, but a description from a South African paper of a violin solo at a concert: 'He whacks it and whips it, and wipes it and thumps it, and shakes it and squeezes it, and tickles it and lifts it. and lowers it and swings it, and plucks it and taps it, and raps it and pats it. and strokes it, and all the while the music goes on. It sings and it whistles. it means and it groans, it screams and it screeches, it laughs and giggles, and chuckles and snickers, it shivers and shakes, it shudders and trembles, it roars and it scolds, it burries and scurries, jumps, runs and tumbles, gets up and runs again."

Hearts of cold blooded animals will beat for a comparatively long time after death or removal from the body (if kept cold and moist) because of powerful internal collections of nerves known as ganglia, whose automatic impulses cause the regular contractions of the muscles. Similar ganglia exist in man and other warm blooded animais, but their action is less prolonged Scientists have as estained that a turtle's heart will beat after removal if put on a piece of glass, kept cool and moist and covered with a belt jar. I believe to has been known to best thiry-six or even forty-eight hours. Twelve or fourteen nours is a common record.
