

According to the Book.

Husband—What a peculiar dish! Wife—I did the cooking myself, and in turning the leaves of the cookbook I turned two at a time, and I cooked the herrings in apple jelly. But you don't mind, do you?—Satire.

Altitude and Temperature. The lowest temperature yet found in the upper air is below zero 119 degrees F., at an altitude of twelve miles, and this over Central Africa. At an altitude of six and a half miles in different stations cold ceased to increase, and stationary temperature or a slight rise of thermometer occurred. The highest sounding balloon so far is 18.9 miles and highest kite 4.5 miles. It appears that at great heights some gas exists of great tenacity, and this name for it has been proposed, "geocoronium," to correspond to the corona around the sun. At a height of eighteen miles the air is one-seventy-sixth as dense as at sea level.—New York American.

A trimming line of buttons and loops runs along the closing of bodice and tunic. These also trim the lace cuffs on the sleeves. Smart pleated white hat of taffeta ribbon with dainty wreath of white roses.

CATTLE MARKET CONTINUES STRONG

The Portland Union Stock Yards Company reports as follows:

Receipts for the week have been: cattle 1380; calves 163; hogs 1808; sheep 2342; horses 41.

There was no appreciable change in the cattle market and the receipts did not give buyers an opportunity to have much to say about the prices. There was active competition for anything that was offered and the market reporters are constantly directing attention to the great difference between the cattle prices on this market and similar market centers at Eastern points. This information has no influence with the regular patrons of this market who have been coming regularly since it was established but country buyers use this in keeping shippers away from Portland. As a matter of fact, quality considered the average cost of cattle droves purchased by packers and killers on this market are higher than at any other point in the United States. It must be borne in mind that an exceptionally low price does not constitute the market. The bulk of the sales made constitutes the market. For instance, the top steers sold for \$7; the bulk of the sales were around \$6.75 for grass fed cattle.

The hog market took an upward turn and tops sold at 10c above the high point of the week previous. The bulk of the sales were around \$8.33 to \$8.40.

The sheep market was a trifle easier. The average quality of the offerings were not as good as the week before, but even at that there was a lower tone throughout.

Prevailing Oregon City prices are as follows:

SINGLE TAX HIT BY LEGISLATOR

(Continued from page 1)

Remember, you can not vote for the graduated land tax without voting for single tax. They are both in the same amendment.

In the single tax Broacher No. 3, is the statement that Governor West favors the graduated single tax. Governor West advocates classifying properties for tax purposes as I outlined in my article last spring. He does not advocate any such a tax as the graduated single tax.
