Frantic appeals by our State Department are being made on the Navy Department to rush additional marines to both coasts of Nicaragua and these are being sent forward as rapidly as possible. But they are not

getting to the front early enough. The moral effect of the early arrival of AMONG THE CHURCHES American troops at the danger points would be great. The massacre of the First Bapist Church-Dr. W. T. But the killing of peaceable Americans or other foreigners by either Mena or Diaz would raise up a more serious issue for our government, And the danger increases instead of de-

A year and a half ago, just after the Madero rebellion in Mexica started, our government found it necessary for at least two reasons-to enforce our neutrality and to prevent outrages on our side of the border by the rebels-to send troops to the Rio Grande. But the 56,000 soldiers of all arms in the United States were scattered over such a wide area that the work of mobilization at the danger zone was slow. A force of about 12,000 of 14,000 was mustered in Texas and New Mexico after a few weeks but the demonstration was far from being satisfactory to us. In the rebellion of Orozco against Madero, when the same issue is at the front, out troops along the border are too few to do the work which they are expected to perform. ### Women Should Have More Manly Qualities

By Mile. VALENTINE DE SAINT-POINT, Granddaughter of the Poet Lamartine

O give back something of manliness to our races, swamped in femininity, we must TRAIN WOMEN IN MANLI-NESS, even to the point of brutality. Every woman ought to possess not only feminine virtues, but manly qualities, without which she is a weakling.

THE REAL WOMEN ARE THE FURIES, THE AMAZONS, THE JOAN OF ARCS, THE JUDITHS, THE CLEOPATRAS AND THE MES-SALINAS. THEY ARE THE WARRIORS WHO FIGHT MORE FIERCE. LY THAN MEN, THE SIRENS WHO INFLAME, THE DESTROYERS WHO, BEATING DOWN THE WEAKEST, AID IN THE SELECTION OF THE FITTEST.

Why Eyes Get Red. The eveball contains a high percentage of blood, and why, wherefore, is it white? The answer is that the blood vessels which supply its surface are so exceedingly minute that usually they to which the ordinary red appearance of the blood is due. Blood without these corpuscles is colorless or, at most, of the faintest yellow tint. But occasionally when the eye is irritated or when there is any slight or considerable derangement of the system certain of the little vessels enlarge sufficiently to allow the corpuscles to enter, thereby producing the well known red streaks or inflamed appearance of the eveball.
