

# For Young Men Who Care

Society Brand Models are up to the minute in style. Young men who once wear them will prefer them to either any ready-made or tailor made clothes. They are entirely different from any other clothes made. Try them on—you will see the difference.

Society Brand Clothes exactly suit the young man's personality, tastes and clothes ideas. They are designed of patterns and fabrics especially to his liking. They are suitable for any and all occasions. They are sized, cut and styled to fit his build perfectly, because they are YOUNG MEN'S CLOTHES.

Oregon City's Leading Clothier

## HOP CROP IN OREGON HAS BEEN PICKED

With the exception of fragments of the crop here and there, the most of which will be taken tomorrow, the pickers have finished the harvest of the Oregon hop crop. Last week was all that could be desired by either the growers or pickers and the work of getting the product under cover has proceeded without interruption. There are no developments of any kind to affect adversely the quality of the output and in the yards where the hops at the opening of the picking season showed up well the harvest has been completed in the best of shape.

The size of the Oregon crop is not yet to be accurately determined but the chances are that it will run little above or below the present general estimate—115,000 bales. In quality the 1912 output compares fairly well with those of recent years, according to samples of the new crop thus far received by local dealers. A portion of the crop of course is moldy and otherwise inferior but it believed that close to 80,000 bales of this year's growth will grade as choice to prime. This estimate, however, is subject to revision but in any event the portion of this year's crop that will pass muster as good to choice will probably equal the total output of last season.

Prevailing Oregon City prices are as follows:  
DRIED FRUITS—(Buying), Prunes on basis 6 to 8 cents.  
HIDES—(Buying), Green hides 6c to 7c; salted 7c; dry hides 12 c to 14c; sheep pelts 30c to 35c each.  
EGGS—Oregon ranch eggs 30c case count; 24c candeled.  
FEED—(Selling), Shorts \$27; bran \$25; process barley \$38 per ton.  
FLOUR—\$4.60 to 5.50.  
POTATOES—New, about 50c to 60c per hundred.

POULTRY—(Buying)—Hens 11c; spring 17c, and rooster 8c.  
HAY—(Buying), Clover at \$9 and \$10; oat hay, best \$10; mixed \$9 to \$12; alfalfa \$15 to \$16.50; Idaho timothy \$20; whole corn \$40, cracked \$41.  
OATS—(Buying) \$28; wheat 90c bu.; oil meal selling about \$55; Shay Brook dairy feed \$1.30 per hundred pounds.  
Butter, Poultry, Eggs.  
BUTTER—(Buying), Ordinary country butter 25c and 30c; fancy dairy 80c role.  
Livestock, Meats.  
BEEF—(Live Weight), Steers 5 1-2c and 6 1-4c; cows 4 1-2c; bulls 3 1-2c.  
MUTTON—Sheep 3c to 3 1-2c.  
VEAL—Calves 10c to 12c dressed, according to grade.  
MOHAIR—33c to 35c.  
Fruits  
PRUNES—1c; apples 75c and \$1; peaches 40c and 50c; Damson plums 2s lb.; crab apples 2c lb.  
VEGETABLES  
ONIONS 1c lb; peppers 7c lb; tomatoes 40c to 50c; corn 8c and 10c doz.

# At The Portland Theatres

### Last Car Leaves for Oregon City at Midnight

"THE HEARTBREAKERS" AT HEILIG THEATRE—SEP. 26, 27, 28. George Damerel and a splendid supporting company will be seen in the first musical comedy of the season at the Heilig Theatre, Seventh and Taylor Streets, for 3 nights, beginning Thursday, Sep. 26. Special price matinee Saturday.

"THE HEART BREAKERS" Headed by George Damerel, last seen as the Prince in "The Merry Widow," through which he became famous, and now the latest aspirant

for stellar honors in the musical comedy line, "The Heart Breakers" will be seen at the Heilig Theatre, Seventh and Taylor Streets, three nights beginning Thursday, September 26, with special price matinee Saturday.

The piece is under the direction of Mort H. Singer, who has sent, in the past few years, some of the best comedies that have gone out of Chicago. It is in two acts; the first taking place at the Saxon Club in New York

and the second at Munter Catstle, in the Ariondaks. Unlike most musical comedies of the present day, "The Heart Breakers" has a clearly defined plot, and a very pretty love story running through it.

### LOCAL BRIEFS

Dr. van Brakle, Osteopath, Masonic Building, Phone Main 359.  
Francis Hoult of Beaver Creek was in this city Saturday.  
Mrs. William Stewart of Carus, was in this city Friday.

The following is a list of unclaimed letters at the Oregon City postoffice for the week ending September 20, 1912.  
Woman's list: Hull, Mrs. R. J.; Jarrett Mrs. Flora; Wemmer Olivia (2); Stenholm Mrs. Emma.  
Men's list: Ellsworth Geo.; Hamilton Perry (2); Hubbard Wm.; Jones James; Liangsi Frank; Martindale Charlie; Parberry Jack; Powell E. C.; Reiches Christ; Wallaun E. F.; Walters George L.

### THE OSTEOPATHIC PRIMER THE THEORY OF OSTEOPATHY

Osteopathy contends, and has proven so often that it can no longer be a matter of doubt, that the human body is a complete mechanism containing within its tissues all the remedial forces essential and necessary to the cure of disease. Furthermore, if all the parts that go to make up the human body are in normal relation, that is, if every bone, ligament, muscle, nerve, blood vessels etc. are in their proper places and working order then no such condition as disease can prevail.  
Read this last statement again. It becomes self-evident, does it not? Certainly it is true, that if every part is exactly where it belongs, and discharging its duty just as it should, health must be the result. Health depends, then upon the normal relation of the anatomical parts that go to make up the human body.  
Disease must follow whenever this normal relation is disturbed; must follow whenever the organs of the body are prevented from discharging their normal physiological functions.  
Now I realize that I am carrying your thoughts along pretty rapidly, but read it again, it can't help but be clear to you.  
It is the osteopathic conception—to repeat for the sake of clearness—when disease is set up anywhere in the body that something has occurred to arrest or blockade the body's life giving and healing impulses, its blood and lymph streams, and that the proper sort of treatment is to remove these obstructions. Nature's vital fluids and forces will then usually work recovery.—Osteopathic Health. (To be continued.)

### CORRESPONDENCE

HAZELIA  
Mr. and Mrs. F. W. Lehman and children spent Sunday in Oswego with Mrs. Lehman's mother, Mrs. Shipley.  
Miss Nina Hays went to Sherwood recently to visit friends for a few days, before returning to Walport.  
Misses Harriet and Lucile Duncan left Monday for Portland, where they will stay during the school year.  
Mr. and Mrs. Alfred Thomas, of Stafford, are staying this week at the farm of Mrs. Thomas' father, Mr. Steinhilber, while he is at Hot Springs, and while her mother is visiting friends in Portland.  
Miss Ethel Baker and Mr. Will Cook spent Sunday afternoon at the John Wanker home.  
A baby girl was born to Mr. and Mrs. A. Davis last Monday.  
Mrs. S. S. Boutz spent Friday afternoon with Mrs. F. W. Lehman.  
Winfield and Harold Baker and Mrs. Boutz returned from the hopfields the first of the week.  
Mr. and Mrs. Anton Nielson entertained friends last Sunday.  
Miss Lulu Wanker has been ill for the last few days.  
Mr. Knowles, the former principle of the Stafford school, and his daughter, Nellie, visited recently with Mr. and Mrs. John Wanker.  
Mr. and Mrs. Becker and children spent Sunday with relatives in Montavilla.  
Miss Ethel Thompson, of Oswego, visited her cousin, Miss Ethel Baker, last Sunday.  
Mrs. Robert Brymer, accompanied her husband last Saturday evening in his church services.  
Church will be held a week from next Saturday at 7:30 p. m., in the Hazelia schoolhouse, for the first time after the annual conference. Sunday School every Sunday morning at 10:30.

MARJORIE CORTLAND Who will again be seen in the Margaret Maya comedy "Baby Mine" which comes to the Heilig Theatre Sunday September 22 for a four night's engagement.

### "BABY MINE"

A few hours of joy dispels many of the cares and mental sufferings of life. Pleasure is the reflex of unimpeded energy, and when it is reinforced with unconstrained laughter and fun the whole stimulates nature to a health-giving condition. When it is agreed that all that is given above, is what affects an audience that sees and hears the effulgent and invigorating comedy "Baby Mine", it is clear why Manager William A. Brady has scored such a glorious victory with his new big play.  
"Baby Mine" will be presented at the Heilig Theatre, Seventh and Taylor Streets, four nights, beginning Sunday, September 22 with a special price matinee Wednesday.

### Bowled Out.

The village wise man was holding forth on the subject of old sayings and how often they proved true. "An' lookee 'ere," he went on decisively. "There's that saying 'United we stand; divided we fall.' Now, ain't that true? It applies to everything equally. We can see just for ourselves 'ow true it is. Everything obeys that law, whether hauniate or hianimate."  
He paused for the applause which should have followed this display of wisdom, but before it had come there sounded a soft voice from a dark corner: "Humph!" it said skeptically. "What about a stepladder?"—London Mail.

### THE BAKER PLAYERS IN FARCE

Seven Days to be Given a Great Production at Popular Playhouse  
This Week  
The first great laugh of the season will be opened at the Baker this week when the popular Baker players present the famous farce "Seven

Days." It will be an unusually bappy combination—a clever company like this and one of the greatest comedies ever written and the flood gates of fun will be turned loose in real earnest. The play has just been released for stock and was grabbed by Manager Baker without a second's hesitation for successful farces are scarce as hen's teeth these days. It will open today matinee and continue all week with the usual matinee Wednesday and Saturday.

### Some Definitions.

A preparatory school magazine vouches for the following, which are certainly up to date: "Gargoyles—a verb meaning to make a noise inside. The sound is like the word. It is caused by the displacement of food. Tripoli—a small town on the coast between Turkey and Italy. Salome—a girl who dressed in beads and danced before Herod's. Adjectives from nouns: Clergy—celestial. Milan—misanthropist. Earwigs are good for the soil of the garden."

### A Costly Mistake.

Witberby—I made the mistake of my life this morning. I told my wife I didn't like her new gown.  
Plankington—What, was she angry?  
Witberby—Oh, no; it wasn't that. But she wants another.

### Hardy.

"Many hands make light work."  
"Not when they all go on a strike together."—New York Press.

## Milady's Mirror

Home Massage.  
Probably there are more queries as to the use of massage at home and what it can do than any other process in connection with the care of the face, so that a few words on the subject may not be out of place.  
In the first place, it is difficult to set a limit as to the powers of face massage when employed by skilled and properly trained people. One hears of really remarkable achievements in muscle building and facial restoration by its means, and sees the results, too, while as an ordinary means of toning up the skin and improving the surface circulation its benefits are manifested daily.  
Home massage does not always meet with success. Caution is most necessary. It is only too easy to do considerable harm to the skin by the casual rubbing it about, which is as a rule the process untrained hands perform, for wrinkles are deliberately induced by this treatment, and other blemishes, too. Therefore the best advice is as a rule to leave massage alone altogether, save in specific cases, for which proper instructions can be obtained.  
But there are a few ends which can safely be attained by faithful persistence at home, and for these a few suggestions may be useful. To begin with, much can be done to maintain the contour of the face, and this is perhaps one of the most important things, for it is the almost imperceptible change in this which marks the passage of years most distinctly.  
Every one who has any care uses face cream or skin food for cleansing and nourishing her skin, and this can be so applied that the desirable end is encompassed. When once extreme youth is passed, slight sagging of the face commences, and to guard against this is easy enough in the majority of cases.

### Beauty Tips.

Flesh color is the best powder tint for most complexions. A plain rice powder can be bought for 25 cents a box. It is generally pure and sticks to the skin better than ordinary talcum powder.  
Miniature silk roses, perfumed with any desired sachet powder, come all ready to sew in the top of the corset, within the top of a sleeve or anywhere where a bit of perfume may be concealed to lend its sweetness to the costume. These little sachet roses come in white and in pink, and a set of them make a charming gift for a dainty girl.  
Peroxide of hydrogen, combined with salt, is a powerful bleach, but should be used only in extreme cases. Wet the brush with peroxide and sprinkle on a little dry salt. Do not use this bleach oftener than necessity demands. Powdered charcoal is not so powerful, but is much safer.

### The Small Waist.

Unusual and constant pressure on the stomach is certain to bring on dangerous attacks of indigestion by crowding the gages up into the lungs.  
All of these ills are so many enemies to a clear skin, bright eyes and vivacious manner. The chronic sufferer from indigestion is often dull in mind and body. Sick headaches rob the cheeks of their natural color and hysteria draws deep lines into the pliable muscles of the face.  
Fortunately the day is past when my lady beautiful boasts of a waist no larger than the hands can span. Abrupt curves of the hips have given place to the straight lined figure, which, contrary to former belief, give a much more slender effect than the wasp waist. Moreover they are more youthful.

### DISK HARROW; BERMUDA GRASS

The Disk Harrow is indispensable and Should Be on Every Southern Farm (Reply to F. L. Webb, Lee Hall, Va.)  
You can not invest the same amount of money to better advantage than by purchasing a good disk harrow.  
The difference in the working of a cutaway and a solid disk is that the cutaway penetrates the ground much deeper and throws it up in a much coarser condition than the solid disk. The solid disk pulverizes the soil much better.  
The double disk harrow is desirable for farmers who wish to do two diskings at the same time. The front harrow can be set to out-throw and the rear harrow to in-throw. This will thoroughly pulverize the soil and leave the field level. The main advantage of the double disk harrow is that if you desire to use the regular disk, you can remove the rear attachment very quickly and easily.  
This will depend on the nature of the soil, the angle given the disks, and the weight of the man on the harrow. As a rule, it is not advisable to purchase a disk harrow with more than eight 16-inch disks for use on a three-horse farm.  
Bermuda grass will probably make a good pasture on your land. The Rhode Island bent (Agrostis Canina), creeping bent (Agrostis Stolonifera), and common redtop (Agrostis Vulgaris), form one of the most dense sods known. The chief value of these grasses is for pasture. They are especially valuable for making pastures in sandy, moist places. The following mixtures are frequently used in your section of the country: (1) Timothy, 16 pounds; redtop, 16 pounds; red clover, 4 pounds—per acre. (2) Redtop, 13 pounds; orchard grass, 18 pounds; meadow fescue, 9 pounds; and red clover, 4 pounds—per acre. (3) Tall oat grass, 28 pounds; red clover, 8 pounds—per acre.  
The arsenical solution is used by the United States Department of Agriculture and is probably the best solution to use. Write Dr. A. J. Kiernan, Federal Building, Nashville, Tenn., for bulletins on the eradication of the cattle tick, the extermination of fleas, lice, etc.  
The mangels should be pulled before heavy frosts, the leaves cut off to within an inch of the crowns and the roots stored in a cool cellar or in pits in the ground, and covered over with straw and earth deep enough to prevent freezing. It is not advisable to feed your stock on frozen mangels.  
I H C SERVICE BUREAU.

### SQUARE SILOS.

Ira Wampler, Carthage, Missouri, writes as follows: "I wish to build a square silo in one corner of my barn, but do not know the best way to proceed. Any information you can give will be appreciated."  
The square silo is fast going out of use, because of the difficulty in constructing same in such a way as to make it profitable. Several years ago, or in other words, when silo building was in its infancy, a good many square silos were constructed, but they were soon abandoned for several reasons, mainly because it was impossible to prevent leaking at the sides, and second, the silage spoiled in the corners. The next step of advancement was to board up the corners, which made the silo more of a round structure, and the latest development has been the round silo, which is considered far superior to the square type of construction.  
We are sending you under separate cover our farm barn plans, and you will note that there is a plan for a silo. This is a concrete silo, which is similar to many that are being built in various sections of the corn belt. When properly constructed, the concrete silo is more permanent than the wooden silos, and preserves the silage equally as well as the other types. The first cost may be a little bit more, but the permanency offsets this objection. There is another type of silo which is being built very extensively throughout Iowa, which is known as the Iowa silo, and is built of hollow tile or hollow building blocks. For further information on this silo, we suggest that you write to Professor M. L. King, Ames, Iowa.
