And there are people who speculate about the cause of the many cases of domestic infelicity.

Trim Your Winter Hat, Hat trimming nowadays is such a simple matter that almost any girl

who can sew at all will be able to trim her own hats for the winter season. Just now it is the fashion to wear hats almost devoid of any trimming whatever, but a cluster of flowers or a wing placed in a jaunty manner at one side or in the center of the front will be all that is necessary as trimming for one of the new felt or velours hats. Hats having turned up brims are ex-

ceedingly fashionable and very often are trimmed with two small wings. one sewed on the under brim and one on the upper directly over it, so that it appears that the wings are simply fold ed over the edge of the brim. When sewing feathers or wings on

a felt hat catch the threads through from the inside of the brim, then take a small stitch in the feather back to the inside again. Always use single thread that has been waxed. The stitches can be concealed under the fronds of the feather or a single feather sciousness: "My book, my book! I if it be a wing.
