

**A Little Beauty Talk.**  
Headache is often the result of indigestion. No woman, however perfect of feature, can be truly beautiful when a racking pain draws her face full of fine lines and dulls the expression of the eyes. The next time you are suffering with headache try drinking a half glass of cold water into which have been put the juice of half a lemon and a half teaspoonful of soda. The drink is not unpleasant, and in many cases it brings almost immediate relief.

A woman whose hair is always soft and glistening has disclosed the secret of her attractive coiffure. She buys a package of absorbent cotton from the druggist. Next she strips a layer from it and places the layer over the bristles of a wire hair brush, pushing it well down, until the bristles penetrate the cotton, which should lie close to the back of the brush. Then she strokes the hair, beginning near the scalp and giving a vigorous stroke to the ends. A few of these firm strokes will reveal how large a quantity of dust and smoke can be taken up by the cotton, the result being the same as the cold cream bath to the face at the end of the day.

Just as cold cream leaves the face bright and fresh, the cotton brushing leaves the hair with a brilliant sheen and a natural softness.

The cotton stroke should be administered every night just before retiring, an open window being the ideal place for the beautifying process.

Every woman has known the misery of needing a shampoo after a journey and not being able to have it at once because of lack of facilities. The hot and cold water may be handy, but not the shampoo medium. So prepare this before you leave home and carry it along in a tightly stoppered bottle—a three ounce vial will do.

Bull castle soap shaved to a powder, about two heaping teaspoonfuls in a little water, putting in about two saltspoonfuls of washing soda. When getting ready to wash the hair, massage a wee bit of cold cream into the scalp, then slightly wet the hair and work in the scalp jelly or liquid—into the scalp, of course.

Rinse as usual, trying to keep the successive waters at an even temperature. It is the sudden change from hot to cold water that makes the hair harsh, as it is so often found to be after the most careful shampoo.

The reason given by beauty people for boiling the soap used in shampoos is that this preparation makes it still more bland. If the hard cake is rubbed directly upon the hair it is bound to be harsh and less bright than if the head is washed by a regularly prepared soap as directed.

**Toothbrush Wisdom.**  
Tooth powders containing charcoal have the effect of whitening the teeth as well as purifying the breath. An excellent idea is to rub a little dry charcoal powder into the crevices between the teeth upon retiring at night, then brush it away in the morning. Charcoal absorbs all impurities, either solid or gaseous, leaving the teeth white and glistening and the gums clean and rosy. Any stray particles of charcoal that might be carried into the stomach would act as an aid to digestion rather than as a detriment. Bicarbonate of soda (common baking soda) has much the same effect, being a benefit both to the teeth and to the stomach.

**A Toilet Water.**  
A good toilet water may be made in the following way: Take six ounces of deodorized alcohol and two ounces of powdered Florentineorris root. Put the powder in a china basin and pour the liquid on gradually until the whole is well mixed. Then add six drops of essential oil of violets, and pour the whole into a bottle and cork it.  
This should be kept three weeks. When it is wanted, a little of the fragrant water should be poured into the bath.

**It's Good For Insomnia.**  
An entire milk diet is an excellent thing for the woman who is troubled with insomnia. It is also good for the one who is so nervous that when she does go to sleep she has the sensation of falling and wakes with a terrific start. When these conditions exist it is well to subsist on milk alone for some time. A grown woman should take a pint of milk as a meal, but to keep her strength she should take four meals a day instead of the usual three.

**Practice Ti is Stunt For Grace.**  
To correct the stooping that so often comes with age practice walking with a load on the head. When shoulder blades become too obtrusive stand with the back against the wall and stretch out the arms with the backs of the hands against the wall. Keep this position for a few minutes, then lower the arms and repeat the movement.

**Care of Face Chamoms.**  
When washing your powder chamoms do not rinse out all the soap or it will dry hard and harsh. Use a good soft soap and do not wring it out in clear water. This will bring forward the natural oils in the leather, and it will be soft and pliable as new.

**BLESSINGS OF WORK.**  
Thank God every morning when you get up that you have something to do that day which must be done, whether you like it or not. Being forced to work and forced to do your best will breed in you temperance, self control, diligence, strength of will, content and a hundred virtues which the idle will never know.  
—Charles Kingsley.

**The Child and Pets.**  
Don't you often feel sorry for the house pet when the house baby begins to notice it? Poor pussy, if pussy it be, is subjected to loving lugs that squeeze together its anatomy in most unnatural fashion or is picked up by its whiskers as its mother never thought of doing—and then, after the eager little fingers have mauled and pulled it, rubbing its fur the wrong way or hooding it with choking grasp about the throat, pussy is dropped with nerve-shocking suddenness as a new toy attracts baby's attention. The Teddy bear has been a boon to many an over-handled kitten, no doubt, but small children always have the living creatures until taught by scratches they would the soul as well as the tender flesh that give the Teddy bear impressive and enduring qualities. It makes it dangerous to show too much affection.

**Discretion.**  
A sound discretion is not so much indicated by never making a mistake as by never repeating it.—Rover.

**Growth of Rocks.**  
Rocks do not grow in the sense that a plant grows. They may increase by accretion, and they may undergo chemical change. The old sea bed, being lifted up, becomes sandstone and limestone. The volcanic ash and lava strewn over the plains become tufa, hard enough for building stone. The pebbly shore of a river becomes conglomerate. The simple mineral does grow, however, when it takes a crystal form. The sparkling prism of quartz increases from an atom to a crystal as large as a forearm by a process of addition and assimilation, wonderfully slow, but beautifully regular, exactly as crystals of ice form on the window-pane.

**The Best Light at the Lowest Cost**

**ELECTRIC LIGHT** is the most suitable for homes, offices, shops and other places needing light. Electricity can be used in any quantity, large or small, thereby furnishing any required amount of light. Furthermore, electric lamps can be located in any place thus affording any desired distribution of light.

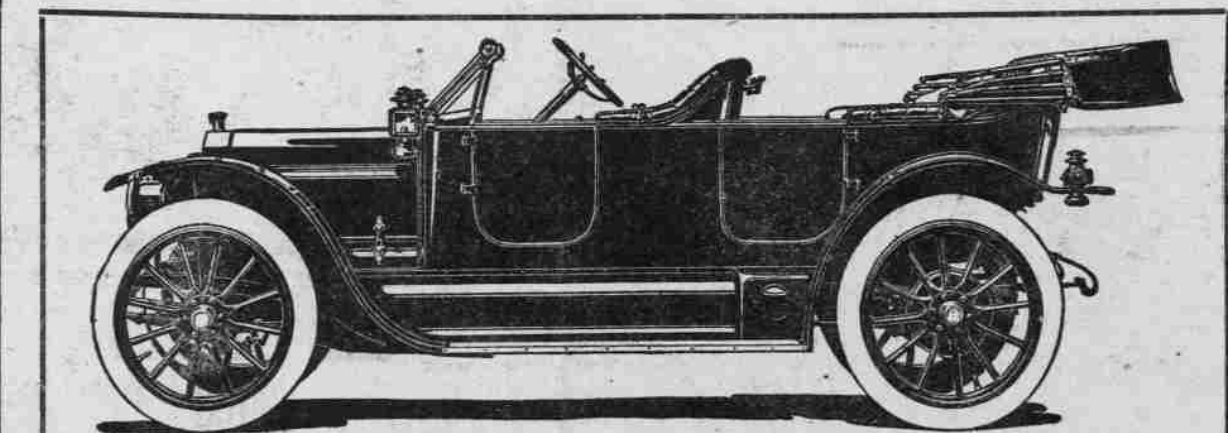

No other lamps possess these qualifications, therefore it is not surprising that electric lamps are rapidly replacing all others in modern establishments.

**The Portland Railway Light & Power Co.**  
MAIN STREET in the BEAVER BLDG.

Councilman Beard said he had at all times held that the charge should be a certain sum, and objected to the percentage charge. He then made a motion that the Portland Railway, Light & Power Company pay \$1,000 a year, payable \$250 a quarter, in advance.

Councilman Horton held that the percentage system was fair to both company and the city. He said that the representatives of the company were looking after the company's interests, and he thought that the city's representatives should look after the interests of the city.

Councilman Beard was not looking after the railway's interest, he said, and was not interested in the company. He said however, that this was like a contract and that they should meet the company in all fairness, and try to come to an agreement.

assessing the railway company any amount. For instance, he said, \$5 could be assessed for every car which entered the city. He wanted the council to fix a price and then assure the company that it would not assess any other taxes upon it.

Mr. Beard's motion was carried by a vote of 6 to 2. Councilmen Beard, Albright, Holman, Roake, Pope and Meyer voted yes and Councilmen Horton and Tooze voted no. After the vote had been taken, Mr. Tooze asked that the vote be made unanimous, at the next meeting of the council. Councilman Beard said that there was no work for Street Inspector Burk and made a motion that he be dismissed. Mr. Horton, in defense of Mr. Burk, said that he worked each day from early in the morning until late at night, and that there was a great deal of work for him to do. It was a saving to the city, he said, to retain Mr. Burk. Mayor Dimick ruled this motion out of order, explaining that a resolution had been adopted by the council giving the committee on streets and public property power to act, and that it was not in the hands of the council as a whole unless the resolution be withdrawn. Mr. Beard withdrew his motion.
