CONGRESS FAVORS NATIONAL HIGHWAYS

Construction of national highways is a question which is slowly but surely forcing itself upon the National Legislature. Many Senators and Representatives now believe that the building of a system of national highways is of more economic importance than any other public work—more vital than the question of a large navy, more useful than any river and harbor improvement, more necessary than the Panama Canal. For highways are built and owned by the people and are free to all the people. A few years ago road bills had short shifts in Congress—at present there are nearly a hundred bills before Congress dealing with road building in one form or another.

Although the "good roads" idea has been gathering force and headway for many years, its advocates are still pulling in many directions. Some road associations want state highways with national aid. Others want state highways without national aid. Still others want good roads paid for by the counties through which they pass, without any aid. One, at least, believes firmly that the question is not only one for states, counties, cities and towns, but for the nation.

It is universal experience that one mile of good road breeds another mile. Put a state-wide, good road down anywhere in this country, and in ten years there will be dozens of good roads reaching it from all parts of the state. Put down a system of national highways, built and maintained by the national government and the various State Legislatures and county officials would soon see the advantages of connecting all parts of the state with those national roads.

France has national highways. These are immense trunk line roads, great arteries of commerce, and from these the smaller roads are built by the provinces of France, just as the states and counties of our states will build feeders and con-

SEE DILLMAN & HOWLAND Weinhard Building.

MAN WHO OFFERS BAD CHECKS JAILED

C. G. Kerr, of Molalla, was arrested Monday by Chief of Police Shaw on a charge of trying to pass worthless checks. He was bound over to the grand jury by Justice of the Peace Samson. Kerr tried to obtain \$20 on a check made payable to C. A. Larsen and signed O. E. Jones. It was indorsed "C. A. Larsen." George Ely, to whom the check was presented, refused to give Kerr the money, although the man wanted part pay in groceries, which he asked be delivered to his home on Molalla Avenue. Later the man tried to get money on a check from George Kloostera, the butcher. Chief Shaw was notified and arrested Kerr. The prisoner insisted that he had found the checks. He said that he was a son-in-law of William Allen, of Molalla. He said he came to this city Sunday.

PURE WATER THEME OF CHEMIST SOCIETY

A large number of Oregon City residents attended the meeting of the Oregon section of the American Chemical Society in Portland Saturday evening. Dr. van Brakle and F. A. Olmsted represented the local chemists and the Live Wires and E. L. Toose represented the Live Wires and the City Council. Superintendent Howell represented the Water Company. Professor O. F. Stafford, of the University of Oregon, gave an interesting and instructive address on "The Problem of Pure Water." He gave the various methods of supplying a pure water supply, and told how a contaminated stream may be made suitable for a water supply to be used for drinking. In addition to filtration systems, he spoke of other systems of purification, including sterilization, hypochlorite, the use of ozone and ultra-violet rays. Professor Stafford emphasized the importance of having all water systems under constant scientific supervision in order to keep their efficiency up to the highest standard.

A Liberal Offer. The undersigned Druggist is authorized by the American Drug and Press Association, of which he is a member, to guarantee Meritol Hair Tonic to give satisfaction or the purchase price will be refunded. This indicates the confidence they have in this preparation. Jones Drug Co. ***

A Threatened Divorce. "Hubby, I must have a walking suit." "You don't need a walking suit." "I do need a walking suit. Now, would you rather pay for a walking suit or a lawsuit?"—Kansas City Journal.

Worst Smashup on New York Elevated System In Years

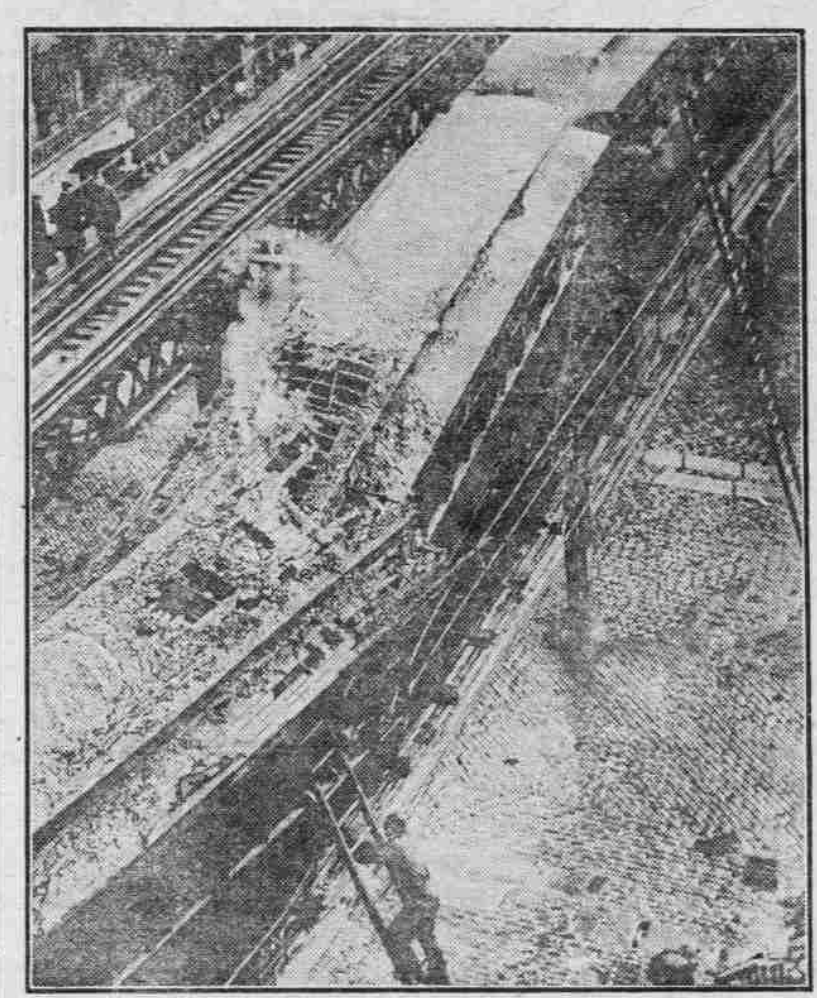

Photo by American Press Association.

ONE of the worst wrecks of recent years on the New York city elevated railroad system occurred when two Third Avenue trains crashed while crowded, killing one man, outright and injuring a score of other passengers. Fire broke out and partly consumed two cars, threatening to spread to buildings on either side of the street. Passengers were rescued by firemen's ladders, and the injured were also carried down them to ambulances waiting in the street. Steel cars would probably have prevented most of the casualties and done away with the danger of fire. The picture was taken shortly after the accident and shows how the cars partly telescoped and were burned. Thousands who use the elevated roads shuddered at the accident.

BOWLAND IS HEAD OF LITERARY SOCIETY

The Willamette Literary Society held its regular meeting in the school house Friday evening, an excellent program being rendered by the school. Many of the numbers caused much mirth while others were serious. After the program was rendered the election of officers was held, the following being elected: President, Professor J. R. Bowland; vice president, Elizabeth Rea; secretary, Mable Larsen and critic, William Snidow. The question for the next debate, March 7, was read and the debaters chosen. The question will be, "Resolved That the United States Has Reached Her Zenith." Affirmative—J. R. Bowland, William Snidow, Professor Thompson. Negative—Professor H. E. White, Deamer Garmire, A. J. Brady. Much interest has been shown in the debates.

REAL ESTATE TRANSFERS.

Swords Bent Double to Test Them.

If you have an opportunity at any time of examining a sword such as is used in naval and military services you may notice that just below the hilt, an inch or two down the blade, there is a small disk of brass welded into the blade. The meaning of this brass might well escape any one not possessed of a well developed sense of curiosity. Swords are subjected to very severe tests before being issued, and this brass piece indicates that one of the tests to which the sword was subjected was to have its point bent right back until it touched the hilt at the brass spot. Swords that have successfully withstood this severe test are trustworthy.—London Chronicle.

Wants, For Sale, Etc.

NOTICES under these classified headings will be inserted at one cent a word, first insertion, half a cent additional insertions. One inch card, \$2 per month; half inch card, (4 lines), \$1 per month. Cash must accompany order unless one has an open account with the paper. American Women the Best Standard of Femininity By Prince GENNARO CAROCCIOLO of Italy, Who Recently Visited This Country

WOMAN is indispensable. In a land without water there is no vegetation, and so is life without woman. In truth, all seeking for something higher, all yearning desire for the ultimate good, comes from the ideal, and THE IDEAL IS WOMAN. The crystallized cry of mankind is "give me the love of a woman and I can defy the world and win all for her sake." The spur of woman's inspiration MAKES A MAN INVULNERABLE. I do not need to say more. My enthusiasm sufficiently expresses my opinion of the eternal feminine. AMERICAN WOMEN ARE THE BEST STANDARD OF FEMINITY. The youngest daughters of the gods, heiresses of all the hopes of the ages, healthy offspring of a young nation, they have been gifted lavishly by Dame Nature. To their christening came all the good, came EVERY GIFT—of CHARM, GRACE AND ATTRACTION. In their presence it is impossible not to become dizzy, realizing the power they hold carelessly, so ingeniously in their delicate
