Ancient Money.

In 200 B. C. money was five times more valuable than it is now. In the eighth century, after the abandonment of the mines of Spain and Attica, it had risen to six and a half times. In the seventeenth century It got up to times our present scale. Soon after the discovery of America, when great quantities of metal began to circulate in Europe, it rapidly declined. In 1514, only twenty-two years after the first voyage of Columbus, it had fallen to four and a half times. In 1536 it went down to two and a quarter times, and in 1640 was nearly at our present day value.-New York American.
