

## One of the Most Sacred Things in Life

IS THAT LITTLE BAND OF GOLD WHICH SIGNIFIES MARRIAGE.

TO THE BRIDE, IT IS THE KEY TO ALL HAPPINESS IN THE WORLD—HER CONSTANT COMPANION THROUGH LIFE.

WHAT A SENSE OF SATISFACTION TO HIM WHO SELLS A WEDDING RING, WELL KNOWING THAT YEARS HENCE, THE SAME HAND, WITHERED WITH AGE, WILL WEAR HIS RING EXHIBITING LITTLE SIGN OF WEAR.

TO THE JEWELER WHO SELLS THIS RING COMES THE RESPECT AND CONFIDENCE SO ESSENTIAL TO SUCCESS IN THIS PARTICULAR FIELD OF ENDEAVOR.

NO RING CONTAINS GOLD MORE THOROUGHLY WROUGHT, MORE THOROUGHLY WORKED ON THE GRIND TO WITHSTAND WEAR THAN OUR RING. THOUSANDS OF WOMEN IN THE AUTUMN OF LIFE ARE THE PROUD OWNERS OF THE BURMEISTER & ANDRESEN RING.

WE WOULD BE PLEASED TO SHOW YOU OUR STOCK OF ENGAGEMENT AND WEDDING RINGS.

The Householder—Can't you do something to kill the echo in this garden? The Landscape Gardener—I think it adds charm to the spot. The Householder—But I spend a great deal of time here with my wife, and it doubles everything she says.—Chicago News.

### LOCAL BRIEFS

Miss Emma Webber, who has been chief operator for the Home Telephone Company for two years, has resigned. Her sister, Miss Louise Webber, who has been assistant operator, has been given the place. Miss Emma Webber was one of the most popular telephone operators in the city, and her friends regret that she has severed her connection with the company.

Phillip Sinnott, who for the past year and a half has been in the newspaper business at Klamath Falls, returned to this city Friday evening. He will visit his parents and friends in this city for several days before he returns. He states that he is much impressed with the climate and country about Klamath Falls and thinks it is a fine town.

The Busch building now being erected on Main Street, between Eleventh and Twelfth Streets, has been leased to W. J. Wilson, of the Mitchell, Lewis and Staver Company. He will sub-lease a portion of the first floor and the basement to the Pacific Highway Garage.

If you suffer from indigestion, constipation, nervousness and cross, no strength or appetite, your stomach is unhealthy. Hollister's Rocky Mountain Tea strengthens, purifies the stomach, regulates the system. 35c., Tea or Tablets. Jones Drug Co. \*\*\*

Many Oregon City people have availed themselves of the opportunity to see the Portland Automobile Show during the past week and the cars have carried large numbers down each evening.

Miss Nieta Harding will leave this city Saturday for Eugene where she will attend the Beta Theta Pi dance which will be given Saturday evening in the University City.

Puts light in the eye, tints the cheeks with Nature's bloom, loosens the tension of life, brushes the cobwebs from the brain. It's Hollister's Rocky Mountain Tea, 35c., Tea or Tablets. Jones Drug Co. \*\*\*

Saturday Club Easter Market Saturday, March 22, in lecture room of Congregational Church, 1 o'clock. Candy, cookies, Easter eggs, cakes, pies for sale.

Mr. and Mrs. Charles Canfield will arrive in this city Sunday morning after an extended visit to Panama, Cuba, New York, New Orleans, Montreal and Chicago.

H. P. Brightbill and family are preparing to move from their present home on Twelfth Street to Fourteenth Street.

County Commissioner N. Blair, of Hubbard, was in this city most of the week attending to court business.

Mrs. E. T. Fields, of Portland, was in this city Friday visiting friends and attending to business.

Earl Champion has returned to his home in Seattle after spending several days in this city.

William Wood, of Washougal, will

## CHRISTIAN SCIENCE PAPER LAUDS CITY

THE "BOSTON MONITOR" CALLS THIS ONE OF BEST TOWNS IN WEST

### INDUSTRIES GIVEN SPECIAL PRAISE

Scenic Beauty and Business Progress are City's—Beautiful Homes Also are Given Attention

The Christian Science Monitor, of Boston, in a recent issue, had the following article about Oregon City: For centuries the Willamette River poured its waters in unharnessed freedom over the falls between the mountainous bluffs that mark the present townsite of Oregon City. Perhaps the Indians who lived at the falls appreciated their beauty, but certainly after the Lewis and Clark expedition reached Oregon and white men explored the river there was no lack of prophecy as to the city that should be built by the falls.

Dr. John McLoughlin, the chief factor of the Hudson Bay Company, located at the present site of Vancouver, Wash., welcomed and fed the horde of those who, in the early 40's, journeyed across the arid plains and fairly tumbled down the Rockies into the large fur-bearing domain. Because of his kindness to these invaders he lost his position with the company, and so decided to make his home at the falls, where he had located a claim in 1829, and to cast his lot with the Americans.

About 1846 he went to live there, built a saw mill and grist mill and the great falls began their career of usefulness. That was nearly 70 years ago and now Oregon City with its population of 6500 is known as the mill town, a sort of suburb of Portland, the metropolis, with which it is connected by trolley.

But after taking one of the comfortable cars that run half-hourly from Portland, along the Willamette River, you discover that Oregon City has quite an independent life of its own, is proud of it, and has not relinquished the old pioneer dream of making it a great commercial city.

An escort tells you: "Yes, the mills are the backbone of the town, but let me first show you other features." You go along well paved streets to the court house—for this is the county seat of Clackamas County—and find it a large, two-story concrete building surrounded by beautiful trees.

Next you find yourself at the bottom of a flight of iron steps at the foot of an 80-foot bluff, and there are other skeleton flights of steps as far as you can see scaling it at short intervals.

"Do people go up and down these every day?" you ask. "Yes, for most of the residences are on this first bluff, some are on the second, and many are around that bend and down on the flat. But the view and good air up there are worth the climb, although an elevator is

under way for the trolleyfoot. The stairs are easy and they wind up through beautiful scenery—the massive rock-ribbed bluff a wonder of moss, lichens, wild flowers and ferns while graceful sycamore bushes, serinas and tall maples form a sower through which one catches glimpses of the busy town, the winding river and far away the blue hills and grand mountains. There are seats everywhere for rest along the way.

At the top of the bluff, where it overlooks the heart of the town is Meloughlin Park, donated half a century ago to the city by its generous founder—a place made and kept beautiful by the Woman's Club.

The old McLoughlin house, which originally stood downtown at the end of Main Street, was brought up to the park. It was a ruin but the club had it papered, painted and furnished as it was in the 40's. It is a substantial square white building set in harmonious surroundings.

The oldest churches are in the lower town and the newer ones on the first bluff. Nearly all have been remodeled in modern style and enlarged lately—ten in all, representing many denominations. There are two school buildings, three grade schools, the McLoughlin Institute, and a new high school, built where it commands a beautiful view of the river, a green wooded island and the heights of Portland, 14 miles away. The city school system is considered second to none in the West.

Among the points of interest pointed out is the home of the author, Mrs. Eva Emery Dye, who has written a history of the Northwest in romantic style. Edwin Markham lived down in the flat when a boy, and not far away Ella Higginson spent her girlhood and wrote short stories.

Mrs. Dye's endeavors started at Clatskanie in the town. The Clatskanie grounds are a mile or so below town in Gladstone park, where the town people, Portland people and hundreds from other places get pleasure, inspiration and new ideas every summer.

A Carnegie library building costing \$12,500, pending completion, is seen in a fine setting of trees with ample grounds. For years a reading room for the public which grew into a small library, also a rest room for country women and others, have been maintained in the town.

Besides the more stately residences on commanding heights, everywhere on the bluffs, down in the flat and business part of the place, are hundreds of attractive small homes, bungalows with their gay porch boxes, cottages with pretty lawns and abundance of flowers, roses in the parkings, the fruit trees and kitchen gardens.

From the Boulevard along the bluff one can appreciate the big suspension bridge which links the town to the west side which terraces back giving ample room for the big city of the future. The large paper mills that supply the coast with paper stand like massive forts at the river's edge. Steamboats puff off for Portland or make their way through the locks to the upper river. The falls, harnessed and subdued, pour decorously over the big dam made to give the mills more power. In this "Power City of Oregon," beauty is sacrificed to progress.

The fine new Elks' home, the Masonic temple, which also houses the wide-awake Commercial Club and its auxiliary organization, "The Live Wires," are pointed out. Below, on the Southern Pacific track, extends a long train loaded with immense logs 2 1/2 feet to 6 feet in diameter, giant logs to be ground into pulp for paper. A power house supplies Portland, 15 miles away, with its light.

West of the main fall is the fish ladder where, one month in the year, the Chinook salmon can find their way to the upper river. The Chinook run is from April to June 15. The average weight caught is 30 pounds, though the record runs as high as 65 pounds.

Three great paper mills produce annually 75,000 tons of paper, or 235 tons daily. They employ more than 1000 people and distribute \$800,000 in wages annually. Their combined investment is almost \$6,000,000. The largest mill has started many admirable reforms and the men are given a percentage of the profits.

The Oregon City woolen mill, said to be the largest west of the Mississippi, employs 250 people. Then there are sawmills, an iron foundry, steam laundry and other enterprises.

Everywhere in the town one hears expressed the desire for newcomers.

Let, that substance from which many articles of ornament are made, very closely resembles ordinary coal. It is formed, like coal, from wood and vegetable matter. It differs from coal in that it contains a much smaller quantity of earthy impurities. There is soft jet and hard jet, but only the latter is of much use in the making of ornamental articles.

EVERYBODY Needs a genuine Anti-Septic in the home. There is hardly a day that some member of the family doesn't suffer from Burns, Cuts, Scalds, Chapped Hands and Feet, Testes, Sore Head, Eczema, Sun Burn, Corns, etc. Dr. Bell's Antiseptic Salve is an old-time fully guaranteed remedy for these troubles. 25 cents a box.

Covered With Sores But Entirely Cured Gentlemen—After spending many dollars and trying many doctors in treating my little boy, I saw your Dr. Bell's Antiseptic Salve advertised, purchased a box, and though he was covered with sores from head to foot, he was entirely cured after using only two boxes of Dr. Bell's Antiseptic Salve. Very truly, MRS. S. M. G. BYRD, Route 3, Box 2, Blackstone, S.C.

## OGLE MINE STOCK FINE INVESTMENT

THIS IS A REAL GOLD MINE, NOT A STOCK JOBBING PROPOSITION

If you are looking for a sure thing, sure thing that the stock will be off here are a few things for you to think over. It is a sure thing that a plant is going to be put on the property that the Ogle Mountain Mining Company. It is a sure thing that our home people have furnished the money to put the ore in sight. It is a sure thing that the same people have signed for a good block of stock to install the plant. It is a sure thing that one is going to furnish the balance. It is a sure thing that if our home people don't furnish the balance some one will, and it is a sure thing that if outside capital furnishes it, ment with their own money are the just that much of the output will be sent away from home. It is a sure thing that the price of stock is going higher, and it is a sure thing that the market as soon as we have the required amount to install the plant. Under these conditions don't you think it would be a wise idea to get in and help finance the proposition? We are not here to beg, but are here with a business proposition that will stand the test of any reputable mining engineer. This we know as the mine has stood the tests and been pronounced all O. K. by reputable engineers. You don't need to be afraid to pay 70 cents a share, for it is going higher beyond all question of doubt. The men that back their own judgment with their own money are the men to place your money with if you want to win and if you place your money with us that is what you will be doing. Look out for the men that do all the talking and never put up their own coin. The men at the head of this proposition are putting up what they can and are going to put in their time installing the plant. Besides this we have men that are going to furnish teams to help do the hauling and take their pay in stock, also men that are going to work on the construction work and get their pay the same way. These men see a future ahead or they would not do this. They are not doing this for their own health or for fun. Under these conditions don't you think it would be a good place to invest a few dollars on the following terms?

**Coupon**  
STOCK FULLY PAID AND NON ASSESSABLE. CAPITAL 1,000,000 SHARES, PAR VALUE \$1.

I hereby subscribe for and purchase \_\_\_\_\_ shares of Treasury Stock of the Ogle Mountain Mining Company at the agreed price of 70 cents a share, total \$\_\_\_\_\_. I hereby agree to pay for same on the following terms: 25 per cent when the machinery is ordered and work starts, and 25 per cent on the first of each month thereafter until full amount is paid, said stock to be issued on final payment.

### HIGH PRICED FEATURE No. 2

Be sure that your car is Thermo-Syphon cooled. Most popular priced cars depend upon the centrifugal pump—but not the Overland. By the latter system, cooling is taking place with the first engine revolution—when HEAT is required for the development of the engine's best work.

With the Thermo-Syphon system, cooling varies, NOT WITH SPEED, but directly with the temperature of the cylinder walls. Thus the Overland Motors do not heat climbing hills.

In the Thermo-Syphon system, a circulation is set up ONLY WHEN THE CYLINDER WALLS HAVE BECOME HEATED.

Neither is there any pump to get out of order in this Overland system of cooling.

A 1913 catalogue on request. Please address us.
