WATCHING THE COST The DEMON OF LIVING. cratic party has undertaken to prove that the price of food can be reduced by lowering the tariff duties and treating tariff protection not only to as a public injury, but as a policy that violates the constitution. As the party that takes this stand is in full executive and legislative control, and is at work on the task it has courted, it must now proceed to make good, or run against a failure, which will not be its first. It must show at the start that it is capable of a sufficient degree of harmony to carry through a tariff program. Next must come the lowering of prices promised, and without evil results that would more than counterbalance the advantages, whatever they might be. Consumers are looking on and are in constant touch with the cost of living. They will know exactly what happens in this respect.

Supposing that the Democratic party will pass the tariff law its leaders have framed, will it bring a fulfillment of what is pledged to the people without any serious disturbance of industry, wages and opportunities for employment? Will general prosperity continue, and consumers rejoice in a lowered cost of what they eat and wear, with no impairment of their means to pay? Will purely an article on the free list surely reduce correspondingly its price to the consumer? These are questions about to be answered by practical events. Throughout the world the cost of living is high. A tariff revision in the United States will not revolutionize world-prices, nor bring a world-wide upheaval in the laws of supply and demand. The people of this country can only wait now for results. They will know ex-

NEW POTATOES ARE COMING IN FREELY

Front-street dealers in Portland report new potatoes coming in from the south much more freely than heretofore and a decided improvement in the quality of the offerings as well. In the market district there are considerable quantities of Californians of very good size and fine appearance, and the wholesalers reported a brisk movement of the commodity, generally at 6 to 12c to 7c a pound. The coming of new stock of course to some extent affects the trade in old potatoes, though in a less degree than will be the case a few weeks hence, when new crop offerings will be more plentiful and available at lower prices. There will be some demand for old potatoes for two months but the jobbers who are in communication with the outside markets at all times say there is no hope for anything like a cleanup of the 1912 stocks still left in the state. In a very small way they are buying for shipment out of the state, at 20c to 30c a hundred, but then only when they have already secured an outlet for the product.

ADVERTISING TALKS NO. 28

(By Ralph Kaye.) In selling women's suits be merchant has three things to specify in order to interest his readers—women first want to know the kind of cloth. Is it domestic or imported? All wool or all cotton? Or a mixture of both? Second the style, what design is it—something new? What effect does it give the wearer? Where was it made? What kind of lining, etc.? Fourth—What is the price? If it's reduced, why? You have a keen market to cater to. Not every woman is up on fashion, materials, etc. You must show her she is getting what she pays for. If your suits possess points over those of your competitors—play them up so they will be sure to meet the feminine eye. Then leave it to your customer to act. You can be sure these extra points will be seen and weighed.

Young Men Ought to Study Politics By Professor HARRY T. NIGHTINGALE of Evanston Ill. Academy

IF THE YOUNG AMERICAN IN HIGH SCHOOL MUST CHOOSE BETWEEN HISTORY AND POLITICS I WOULD HAVE HIM STUDY THE LATTER. HE SHOULD KNOW MORE ABOUT WHAT THINGS ARE AND HOW THE GOVERNMENT WORKS IN THE PRESENT THAN WHAT MEN DID IN THE PAST.

In mechanics a workman must know how the machinery works rather than who invented the various parts and processes. Even so should the American citizen, a participant in government, KNOW AND UNDERSTAND ITS MECHANISM and keep it furnished for the general good and not only, as too often happens, for special and particular interests only.

And I should hope that some day we might thus have in this democracy SCIENTIFIC MEN IN GOVERNMENT as we already have in electricity and bridge building.
