SCHOOL EXHIBITION IS SURPRISE TO ALL

Wood from the wrack of the Marquam building, in Portland, is on display in Oregon City, and is calling forth the enthusiastic exclamations of all who see it. Not, however, be cause it is wood from a Portland landmark of former days, but because it has been transformed by pupils in the manual training department Oregon City schools into beautiful tables, neat writing desks, comfortable Morris-chairs, artistic tabour-ettes and old-fashioned footstools. It is on view at the annual school hibit, and is proof of the skill and proficiency of the youths who have under the direction of Prof. Peter E. Forbes and his assistants.

While this display of furniture. fashioned by the boys in the higher grades, was perhaps the most striking display of the exhibition, it was not "the whole show" by any means, Every study taken by the pupils, from play. The keynote of everything, however, was practicality, and the relation of the study to every-day life. From the simple mat and basket weaving of the lower grades to the designing of the higher grades, every

was excellent in form. The exhibition was throughout the hours that the Barclay school gymnasium, where it was held, was open, and parents and pupils alike gathered to see the comprehensive display. A GAME OF BLUFF

By ESTHER VANDEVEER

Adrian Oglethorpe, a stendy, matter of fact fellow, was engaged to Lucy Ashurst, a butterfly. Oglethorpe was much in love with his fiancee, but one thing about her troubled him very After settling his affections upon one girl he had no desire whatever to pay any attention to any other and could not see why Lucy must needs accept the attentions of other

One day he remonstrated with her learned practical lessons in utility upon what he called flirting after her engagement. A young girl-Lucy, at any rate-is like a child whose ruling passion is to carry disobedience as far as possible without getting a whipping. Lucy let her lover "scold," as she the simplest studies of the entering called it, to his heart's content without classes, to the involved problems making a reply. While he was "laying which the high school students have down the law to her"-this was also to solve, found their places in the dis- an expression of hers with regard to ed seed corn, sufficient to plant an his lectures-she was laying plans for breaking his infunctions.

During the next few weeks after this "laying down the law" Lucy flirted more than ever. Adrian bore it stoicalitem of the exhibit was practical, and ly till he had made up his mind to carry out his threats, then wrote her a crowded note breaking the engagement.

Lucy, who had expected something of the kind and was prepared for it, paid no attention to his note whatever. That which a child most dreads is "the dark." On the same principle him, upbraided him, even scorned him, to be left without any notice whatever of his discarding her was like the child In the dark-it appalled him.

But Oglethorpe was a methodical chap, and as soon as he got on his thinking cap he solved the problem. Either Lucy was ready to break with him for some other man or she was bluffing. If it was for another man the fact would soon be apparent; if she was bluffing that was a game at which two could play. Moreover, if she had replaced him in her affections again, for, he argued, women who apt to return to an old one. They must have something new.

Adrian waited for developments. Lucy when under his observation at functions would look lovingly upon her benefit. Time passed, and he did not hear of her encouraging any particu lar man. Then, beginning to tire of the estrangement, he began to lay his plans to bring about a more definite situation. He had thus far treated her as an acquaintance, a friend. He now iness. Most of these, however, were began to bow to her when he met her road will be in excellent condition for After a few more games the field will retaliated by out Heroding Herod. The panic induced by the thought that he had raised an insurmountable barrier between them baving been allayed, Adrian determined to play a card that up to this time he would have scorned to play. Indeed, he had never thought of playing it till it had been suggested to him.
