Heart to Heart Talks

By JAMES A. EDGERTON

A REPUBLICAN OF THE LONG AGO. Girolamo Savonarola was the John the Baptist of the reformation. He was a republican before the world knew any true republics.

Savonarola preached in the end of the fifteenth century. At the very time Columbus was discovering a new world this Dominican monk was gaining his great hold on Florence. For eight years he was the head of the priory of San Marco and virtual ruler of the city. Yet he never held a secular office and scarcely ever went outside of his pulpit to give his political message.

He found Florence in the hands of the powerful Medici family. Lorenzo the Magnificent was then at the height of his power. The fearless preacher would have none of him, although Lorenzo made advances. Savonarola uttered his denunciation of tyrants, and his description of a tyrant left no one in doubt as to whom he meant.

At Lorenzo's death the Dominican friar proved the only safety of the city during the French invasion. People in a fury turned against the younger scion of the Medicis and drove him from Florence. Then Savonarola became supreme. He appounced to the people that Christ was the head of the city and that they should seek no other ruler. He brought back the old republic. He wrote essays on govern-ment that are good reading today. He drove out corruption and caused the people to turn from their vanities. The whole city was swept by a religious revival. The fearless preacher was offer ed the red bat of a cardinal, but refused. He desired to be independent, and his independence at last caused his downfall. In the end he was tortured. hanged, and afterward his body was burned and his ashes scattered in the river, but his influence was felt not only in Florence, but throughout Burope. Luther heard of him before he preached the reformation, and today the name of the fearless Italian preach er has become the synonym for those who combine the political and spiritual vision and in eloquent speech advocate reform and proclaim God's kingdom on earth

Yet in his early days Ravonarola smoke to empty benches in Florence. His congregations dwindled to not more than twenty-five bearers, and it was not until he had gone forth into other parts of Italy and established a name that Florence would bear him at all

Although intensely Christian, this religious and political reformer was no meek saint. He prophesied the sword. and the sword came. He also prophesled a better day, and this also came. but not for Italy.

His voice was perhaps the most elequent of those that he sided the new dawn that broke over the world in the wonderful era of the renaissance and the reformation

TEACHING YOUTH.

pel rudeness, with which young wits ought to be well furnished in schools, but so us that their teaching be-1, truth; 2, full; 3, clear; 4, solid

1. It will be true if nothing be taught but such as is beneficial to one's life, lest there be a cause of complaining afterward We know not necessary things because we have not learned things necessary

2 It will be full if the mind be polished for wisdom, the tongue for eloquence and the hands for a neat way of living. This will be that grace of one's life-to be wise, to act, to speak. 3, 4. It will be clear, and by that firm and solid, if whatever is taught and learned be not obscure or confused, but apparent, distinct and articulate as the fingers on the hands.-Johann Amos

The Stuff Successful Men Are Made of

summer. All of our truly ambitious students those who think more

about the increased salaries their studies will qualify them to earn, than of the imaginary discomforts of summer study—devote a part of

Why? Because he takes two or three times as long, in preparing him-

self to earn more money, as the student who studies from a half hour

to an hour per day all the year round. We have enough letters on file

to make several very large books, the general purport of which is:

"Oh, if I had only taken up that Course when I first wrote you about

cause I wasn't prepared to fill it. I lacked just the special knowledge I could have had from the Course." The writers of these letters never have to be coaxed to study in summer NOW. They knew what delay

same bitter medicine yourself?

Persons that suffer most from the heat are those that have noth-

ing else to occupy their thoughts. A man who is interested in his

studies doesn't know how hot it is. He has no time to fret about the

weather. He is looking ahead a few months to the time when he can

demand advancement in position and salary, because his special educa-

tion will have made his services of more value to his employer. It is

no harder to read an Instruction Paper in summer than to read a news-

paper. How many summer days are hot enough to prevent you from

only trying to deceive his conscience. He may not know it, but he

is weakening his will-power, and it is will-power-power to do what

one knows he must do to succeed-that makes the man. A man of

weak will—one who will study some day, but not now—will always be down in the world; always in "hard luck," frequently out of work,

and when employed, it will always be at low wages. He knows that a knowledge of certain subjects will fit him to earn more; yet he stills

his conscience by promising to start later. Such a man isn't truly ambitious. He is one of the kind that always does the hard, menial work,

and draws small pay all his life. Are YOU one of that kind. Are YOU

truly ambitious to earn more and make something of yourself? If you

wont study in summer you are NOT. If you prefer to fret about hot

weather, rather than forget it by studying, you are NOT.

The dangerous habit of "putting off" has ruined the lives of more

promising young men than drunkenness. It is so easy to say "yes,

it's what I need; I'll start tomorrow—next week—some other time." The difference between the man that makes a failure of life and the

man that succeeds is simply this: The failure is going to begin "tomor-

row;" the success begins today.

The men who "get there" are those that study for self-improve-

ment in summer, or whenever they have time. They don't let the

weather keep them in inferior positions, at small wages. They don't make excuses to themselves when they ought to be up and doing. They don't work for wages barely enough to keep soul and body to-

A CRAZY CURRENCY

China Has a Monetary System That Borders on the Chaotic.

UNIT OF VALUE IS THE TAEL.

Yet the Tael Is Neither a Coin Nor ar Ingot, but Merely an Abstract Term, and Signifies a Unit of Weight-Silver Shoes and Cash on a String.

Of the many strange things in China not the least strange is its currency. To the foreigner it seems a miracle that any business can be transacted successfully with such a medium of exchange. It has been described as chaotic. Nevertheless business and trade flourish in China, which speaks volumes for the business acumen of the Chinese. Perhaps the fact that trade flourished in China long before such a thing as currency was known accounts for the fact that the Chinese with such a lax system as they now possess, still stand in the front rank of commercial nations.

In China all forms of exchange frem barter up are in use. A very large part of the country's business is done agninst the actual delivery of weighed silver. For convenience silver is melbed into rough ingots having the shape of the Chinese shoe. These silver shoes have stamped upon them their fineness and weight. The unit of weight is the tael, which is equal to a quantity of eliver weighing 580 grains troy and is worth about 60 cents in

The tael is not an ingot ner a coin but simply an abstract term signifying a unit of weight, such as a "pound" of butter or an "ounce" of gold. Though an abstract term, it is the measure of wealth and the unit of value throughout the length and breadth of China. A man buys a business for so many taels of silver. His profits are computed in taels. When he makes payment be weight out the silver according to this unit

The silver shoes vary in weight from one to seventy-five taels. All silver shops and banks have forges, where the silver is melted in iron ladies and poured into molds. The smelters with heir ladies and molds remind one of cooks. They stir the silver with a pair of metal chopsticks. To one not aware of what they were doing it would be natural to suppose that they were engaged in concecting semething good te eat. In the process of recasting the ingots their fineness is often changed, being either improved or debased. whichever best suits the interests of the she . Bankers and money changers are able to determine the quality of the silver by the sense of touch. The sellers or depositors are always at their mercy and must often submit to the operation of having their silver

discounted on account of "bad touch." in the interior of China small purchases are made with copper ceins with square boles in the center. These are called "cash" and are threaded on strings so that they may be carried across one's shoulder or on a pole. A string of 1,000 of these cash is worth about 50 cents in our money. Sometimes bits of silver are chipped from purchases. When traveling in the interior one must take with him a large amount of silver shoes, exchanging them for strings of cash at the various shops. The money changers have two sets of scales, one to be used in the purchase of silver and the other in the

In an attempt some years ago to introduce a currency based on western models the Chinese government purchased and put into circulation several million Mexican dollars. The people took to the new coins and called for more. The provincial governments then set up mints and began to coin Chinese dollars of approximately the same weight and fineness as the Mexican dollars. They also coined an enormous amount of subsidiary items in the shape of small silver coins and copper pennies

Soon it was discovered that the new currency was as unstable as the old. The value of the dollar in relation to the subsidiary coinage varied from day to day. The cent was never worth the hundredth part of a dollar. Some days 110 cents were required to make up \$1, and on other days it took 130 cents. Similarly the value of the dollar as compared with the tael was continually fluctuating. Sometimes \$100 would bring 70 taels and at other times only 65. It was sickening to the people, but very profitable to the money changers.-Harper's Weekly.

The Mozart Cycle.

The only works of Mozart designed for the stage (there are nearly a score of them, that have remained regular "repertory operas." as the Germans say, are "Don Giovanni," "Figaro" and "The Magic Flute." Once in awhile, however, a Mozart cycle is given in one of the larger German cities, and this includes generally, besides the three operas named, "Idomeneo," "Die Entfuhrung," "Cosi Fan Tutti" and "Clemenza di Tito."-Argonaut.

Knew His Man. "Why did you tell that man you don't smoke when you do?" "I had a good reason."

"Perhaps he was going to give you s clear "No: I know that chap. He was going to ask me for one."- Detroit Free

Among all the fine arts one of the finest is that of painting the cheeks with health. Ruskin.

meight of the Clouds There is no fixed height for any kind of cloud. Some remarkably interesting measures of the height of clouds have been made at Vienna by an ingenious method. Advantage was taken of the extremely brilliant light furnished for a great illuminated fountain erected in that city. By means of a projector it was found that a beam of light could be sent up to the clouds, producing upon them a luminous spot capable of being observed simultaneously from points on the earth two or three miles apart. By such observations the height of certain clouds of the cirrus variety was found to be as much as 10,000 me ters, or nearly 33,000 feet.

H. Mayr, Mfg. Chemist, 154-156 Whitting Street, Chleago,

Poultry raisers are selling eggs in Oregon City for 22 cents cash or 23 cents in trade, and the majority of dealers are taking a three-cent profit and offering eggs to the public at 25 cents a dozen. Efforts of Portland dealers to force a better price are still being continued, but are not availing anything. Loganberries have broken into the as follows:

market at \$1.50 per crate. Raspber-ries are being quoted at two-bits a crate less, and some late strawberries that are of good quality are being offered at the same rate. Cherries are to be had at anywhere from 5 cents a pound up. Gooseberries, of much better quality than those offered earlier in the season, are also on sale.

The vegetable market is somewhat weaker than last week, but offerings continue plentiful. Green peas, string beans, new potatoes and onions are all a few cents cheaper, but are good quality. Lettuce of all kinds is \$9; Oat hay best \$11 and \$12; mixed to be found in abundance, while radiates and onion sets are well down on timothy selling \$20.50 to \$23; valley ishes and onion sets are well down on the quotation list.

Outside fruit is holding well on the
