MOUNTAIN TOP OUTING

FOR REV. G. N. EDWARDS The Rev. George Nelson Edwards, paster of the Congregational church, eaves this week for Government Comp, on Mbunt Hood, to spend his vacation above the clouds. Mr. Edwards will be absent from the city until the early part of August, and while he is away the pulpit in his church will be filled by visitng min isters. During his vacation Mr. Edwards expects to do considerable mountaineering, and will spend the greater part of the time "roughing it"

Good form

Etiquette For Summer Girls' Locks. Women have been warned not to wear boudoir caps if they would keep their hair. If they are worn two hours every day the hair most certainly suffers and eventually falls out because of them. We are also warned not to go bareheaded in the summer. If we do the too direct rays of the sun make the bair fall out.

It is a fact that much falling hair occurs in the fall, a month or so after summer vacations are ended. Specialists on the subject have decided that the habit of spending much of the vacation bareheaded is accountable for this calamity. To be sure, nothing is better for the hair than thorough airing. This, with a moderate amount of vor in the United States, though varisunshine and much brushing, keeps the ous efforts were made to popularize hair clean and so makes the frequent them. The first United States coin shampoo, which specialists, most of with a perforated center was a gold them, also declare is harmful to the dollar issued in 1849, which had a hair, unnecessary. So if you would square hole in the middle of the have beautiful hair when you return from your vacation decide before you start away that you will not expose your locks to the sun's direct rays.

Frequent shampooing is harmful to the hair, but so is dirt. Especially in summer it is desirable to keep the bair always clean and fresh. One way to do this without taking a shampoo is to wash the scalp regularly and frequently with alcohol. Another way is to fashioned copper cent was in general master the dry shampoo. Orris root or orris root mixed with talcum powder ceived the name of "ring cent." The should be rubbed in the hair, but not in the scalp. The scalp should be freed from the orris root or powder, which clogs its pores, by massage.

Another perforated cent issued the Nothing is better for cleaning the same year showed two rings in the hair than the liquid soap known as field with the words, "Cent. One-tenth pure castile. A delightful shampoo Silver." The reverse showed an olive mitxure can be made by melting caswreath around the perforation and the tile soap with a little water until it is a jelly, then adding four teaspoonfuls The mint authorities undertook to of borax. To one cake of soap add a design a coin that would answer all few drops of violet or rose perfume or requirements, and the pieces were cologne to scent it pleasantly. struck with both pierced and perfect

Another good liquid shampoo soap is made by melting a cake of tar soap in a double boiler with a little water or putting it in a glass jar, covering the soap with warm water and putting the iar in a pan of water in the oven until

consequently they were never put in the soan is of fellylike consistency. Remember if you visit the seashore The only gold half dollar ever proand bathe in the surf that salt water is duced at the United States mint was bad for the hair. Bathing caps this year are at once so pretty and so serviceable that there is little excuse for getting the hair wet. If by chance it is wet, however, it should be immediately rinsed in clear fresh water, gently massaged so that all the salt is removed and then dried out by the sun as quickly as possible.

Shaking Hands.

Any one who has gone through the ceremony of shaking hands with several hundred people at a public function knows that there are many varietwo pieces of the denominations of 1 | ties of handshake.

There is the limp, flabby hand which has no grip; there is the hand which seizes yours in a vise-like grip and crushes it until bones and ligaments ache; there is the cordial hand which carries the heart with it.,

From time to time there is a capric in handshaking. A venr or two ago young women af-

fected an upward lift of the arm and a jaunty shake of the hand which was rather embarrassing to old fashioned ladies who had never learned to lift the hand when offering it to a friend. At present many girls not only use this peculiar form of salutation in shaking hands, but have a way of saying "How do you do?" with a rising inflection and an air of indifference which, if they knew it, is really funny. A great deal of tact is required in adapting any salutation to the occa-

In private life in this country the hand is not always given except to intimate friends and relatives. Many persons content themselves with a bow or even a nod on meeting.

But an extended hand is the more Bath In Senegal Was Something cordial manner of salutation. Ordinarily it should be left to the older or Some years ago, when the capital of more distinguished one to make the the French colony of Senegal was a proffer of the hand.

Men and women in this country, as in France, seldom extend the hand unless there is a great difference of age and position or much intimacy of relaamusing experience when he wished

to obtain a bath. There was no bathing establishment in the capital of Etiquette of Bridal Calls. > Dinner For Engaged Persons. When giving a dinner complimentary to a bride elect one may invite only her women acquaintances. In such a case the prospective bridegroom is not an invited guest A dinner to which both are invited usually includes the man and his fiancee, her prospective bridal attendants and his best man and ushers or his most intimate friends. It is n pretty custom to present a bouquet of roses or favorite flowers to the bride elect at a dinner.

> > THE FUTURE.

Provide as best you may be able for the future, but do not constantly worry about it. One of the elements of our happiness springs from the fact that we do not know the future. How large a part of the pleasure of life is shattered and blighted by an unreasonable anticipation of coming evil!

She-Grace spends an awful lot of money. He-Not a saving grace, then. -Boston Transcript.

INNER BEAUTY.

There is nothing in the whole world that can vie with the soul in its eagerness for beauty or in the ready power wherewith it adopts beauty unto itself. There is nothing in the world capable of such spontaneous uplifting. of such speedy ennoblement: nothing that offers more scrupulous obedience to the pure and noble commands it receives. There is nothing in the world that yields deeper submission to the empire of a thought that is loftier than other thoughts. And on this earth of ours there are but few souls that can with stand the dominion of the soul that has suffered itself to become beautiful.

In all truth, it might be said that beauty is the unique aliment of our soul, for in all places does it search for beauty, and it perishes not of hunger even in the most degraded of lives, for, indeed, nothing of beauty can pass by and be altogether unperceived.-Maurice Maeterlinck.

Small Boys Used "Squibs." In the early days of the Fourth of July celebration the small boys had to content themselves with "squibs," or small balls of moistened powder, which fizzed and gave out sparks in the darkness; with the rapid waving of firebrands, the sight of glowing bonfires and perhaps a limited participation in the "fun of fire"-namely, the tossing of fire balls made of tow saturated with tar or turpentine into the air, an amusement in which many men and boys frequently took part.

McKinley on the Fourth.

Let us always remember that, whatever differences about politics may have existed or still exist, we are al Americans before we are partisans and above party or state.

The Stuff Successful Men Are Made of The International Correspondence Schools are NOT closed in summer. All of our truly ambitious students those who think more about the increased salaries their studies will qualify them to ears, than of the imaginary discomforts of summer study-devote a part of

week to their studies all summer. A student who will only study in cold weather punishes himself. Because he takes two or three times as long, in preparing himself to earn more money, as the student who studies from a half hour to an hour per day all the year round. We have enough letters on file to make several very large books, the general purport of which is: "Oh, if I had only taken up that Course when I first wrote you about it! I have just missed a fine position, at largely increased wages, because I wasn't prepared to fill it. I lacked just the special knowledge I could have had from the Course." The writers of these letters never have to be coaxed to study in summer NOW. They knew what delay Why not profit by THEIR experience, instead of taking the same bitter medicine yourself?

Persons that suffer most from the heat are those that have nothing else to occupy their thoughts. A man who is interested in his studies doesn't know how hot it is. He has no time to fret about the weather. He is looking ahead a few months to the time when he can demand advancement in position and salary, because his special education will have made his services of more value to his employer. It is no harder to read an Instruction Paper in summer than to read a newspaper. How many summer days are hot enough to prevent you from

reading the daily news? The man who promises himself that he will enroll next fall is only trying to deceive his conscience. He may not know it, but he is weakening his will-power, and it is will-power-power to do what one knows he must do to succeed-that makes the man. A man of weak will-one who will study some day, but not now-will always be down in the world; always in "hard luck." frequently out of work. and when employed, it will always be at low wages. He knows that a knowledge of certain subjects will fit him to earn more; yet he stills his conscience by promising to start later. Such a man isn't truly ambitious. He is one of the kind that always does the hard, menial work, and draws small pay all his life. Are YOU one of that kind. Are YOU truly ambitious to earn more and make something of yourself? If you wont study in summer you are NOT. If you prefer to fret about hos weather, rather than forget it by studying, you are NOT.

The dangerous habit of "putting off" has ruined the lives of more promising young men than drunkenness. It is so easy to say "yes, it's what I need; I'll start tomorrow—next week—some other time." The difference between the man that makes a failure of life and the man that succeeds is simply this: The failure is going to begin "tomor-

row;" the success begins today.

The men who "get there" are those that study for self-improvement in summer, or whenever they have time. They don't let the weather keep them in inferior positions, at small wages. They don't make excuses to themselves when they ought to be up and They don't work for wages barely enough to keep soul and body to-
