

Inconsiderate. Speaker—His wife has applied for more alimony. Pluggs—Well, of all the nerves! Doesn't she know the price of these?—New York Sun.

THE LATEST FASHION NOTE

Says: "It is a wise precaution against germs holes in delicate hosiery to powder the shoes before putting them on." Many people sprinkle the famous antiseptic powder, Allen's Foot-Powder into the shoes, and find that it saves its cost many times over in keeping holes from hoisting up by loosening friction and consequent rubbing and itching of the feet.

For the Children

Prince Humbert, Son of the King of Italy.

Copyright by American Press Association.

Princes and princesses are a good deal like other people, especially when they are little. The young lad attired in a striped bathing blouse and with the trunk of his suit rolled as high as he can get them is Humbert, Prince of Piedmont, heir apparent to the throne of Italy. He is enjoying himself on the beach by the Adriatic sea. Crown Prince Humbert is said to be a studious boy and has a decided talent for music. He is the only son of King Victor Emmanuel and is named for his grandfather. The prince, who is nine years old, is the only son of King Victor and Queen Helena. The other children are all daughters—Princess Yolande, twelve; Princess Mafalda, who will soon be eleven, and Princess Giovanna, about six.

Experiment With a Tumbler. Take a thin blown glass tumbler. Fill it nearly full of water and place on its borders, after drying them well, a cross of equal branches cut from paper. Turn down at right angles the ends of the branches of the cross, in order to prevent it from slipping down the sides. If you now cause the glass to vibrate by rubbing some part of its exterior surface with your wet fingers, as if you were going to make it ring, you will perceive the glass to omit a sound. But more than this, you will notice the following: If your finger rubs the glass under one of the branches of the paper cross, the latter will remain stationary. But if, on the contrary, you rub a part of the glass situated between the branches of the cross, the cross will begin to turn slowly as if it obeyed some magical influence, and will not stop until the end of one of the branches arrives over the part rubbed by the finger. Thus, by moving the finger around the glass, you make the cross turn as you please.—Magical Experiments.

Battle of Dettingen. The last battle in which a British sovereign personally led his troops on the battlefield was in 1742, when George II., at the head of his army, defeated the French at the battle of Dettingen.

Lightning Recorder. An instrument in the weather bureau at Washington records every lightning flash within 100 miles.

Big Ben has something to say to people who like to get up promptly in the morning. He guarantees to call them on the dot just when they want and either way they want, with one prolonged, steady call or with successive gentle rings. And he guarantees to do it day after day and year after year, if you only have him oiled every year or so. We have known him ever since he was 'that high' and we will vouch for everything he says. \$2.50 BURMEISTER & ANDRESEN

England's King and Queen May Visit the United States

THIS is the latest and best "official" picture of the king and queen of England. It was taken this summer. It is of especial interest just at this time because of the report that King George and Queen Mary may visit the United States before the year is over. According to this rumor, it was said the royal couple would visit Canada first and then, being so near the United States, would cross the border and visit New York and Washington. The visit would have great significance just now when the difficulty over the Panama canal tolls with Great Britain is still unsettled.

SAYS PIRATES ARE NOT GAME

Clarke Bemoans Scarcity of Courage on His Team. ADVERSITY AFFECTS SOME. Failure to Hit or Field Perfectly Causes Players to Worry—Manager Admits Club Has Been Disappointed to Him and the Fans.

Photo by American Press Association.

FRED CLARKE, PIRATES' LEADER. "Well, that is the state of many of my players. They have been through so many misfortunes this season that they are afraid to do anything for fear it will turn out wrong. Our troubles started with accidents which threw our entire machinery out of whack and broke up a combination which looked like a winner. The fans know all about these accidents—the injury to Wagner, the fracture of Gibbs' ankle, the illness of Camnitz's baby, the injuries to Simon and Kelly, to Artie Butler, to Viox and Miller. These untoward events were followed by a batting slump which affected every member of the team at once. It was no more noticeable in any one than in Bobby Byrne, but he has apparently recovered, and the others have not. You know all about what we have been through. Now, let me see if I can explain something to you. I want to convey my meaning clearly, for I don't want to do anybody an injustice. There are ball players who are gamblers than others. 'Game' is hardly the word I want, but I can think of no

OREGON AGRICULTURAL COLLEGE

BEGINS its forty-fifth school year SEPTEMBER 19, 1913. DEGREE COURSES in many phases of AGRICULTURE, ENGINEERING, HOME ECONOMICS, MINING, FORESTRY, COMMERCE, PHARMACY. TWO-YEAR COURSES in AGRICULTURE, HOME ECONOMICS, MECHANICAL ARTS, FORESTRY, COMMERCE, PHARMACY. TEACHER'S COURSES in manual training, agriculture, domestic science and art. MUSIC, including piano, string, band instruments and voice culture. A BEAUTIFUL BOOKLET entitled "THE ENRICHMENT OF RURAL LIFE" and a CATALOGUE will be mailed free on application. Address: H. M. TENNANT, Registrar, (tw-7:15 to 9-9) Corvallis, Oregon.

DARING SHOOTERS

Moonlighters In the Early Days of Our Oil Wells.

FORCED TO WORK IN SECRET.

These Bold Spirits, to Dodge the Owner of the Patent Method of Shooting Wells, Had to Operate at Night—Men and Machinery Often Annihilated. One of the most dangerous and at the same time romantic phases of the early oil business was known as moonlighting. In the beginning of the oil excitement a certain man held the patent on the method of shooting the wells. Having a monopoly of the trade, he could and did charge whatever price he saw fit. As a result of this condition of affairs there sprang into existence a number of bold spirits who began the manufacture of nitroglycerin, the explosive used, and shooting the wells for much less money than the patent holder charged. They were forced to use the greatest secrecy in their work, for the patent holder had men employed for the express purpose of spying on all the wells drilled. A stiff fine for the first offense and a prison term for the second were the punishments inflicted on the man unlucky enough to get caught. These outlaw shooters had their plants for making the glycerin located in some out of the way spot and when their services were required did their shooting by moonlight, hence the name moonlighter. Many and varied were the adventures that befell these moonlighters. A driller coming out from town to a well one day saw a can half hidden in a fence corner and stopped to investigate. Taking off the lid, he saw what he supposed was lard oil. Well pleased with his find, he took it along with him. He showed his treasure to his mates at the well and then used some of it to lubricate the engine. For some reason the men were called from the vicinity of the derrick. They had got but a short distance when there was an explosion that fitted the costly engine for the scrap heap. A close inspection of the supposed lard oil revealed the startling fact that it was nitroglycerin. It was a frightened lot of men who gingerly returned the can to the fence corner from which the driller had taken it. It proved to be the property of a moonlighter, who had left it there, intending to return for it that night. In so dangerous an occupation as moonlighting many fatal accidents were to be expected. I recall very distinctly two that occurred within a short time of each other. In the first, the moonlighter, a big blond Swede, had come straight from his wedding to the well. The liquor he had been drinking in celebration of his marriage had ruffled his usually placid temper. He had filled the shell with the glycerin and was endeavoring to slip the cap into place. His hands were a trifle unsteady, and he fumbled it several minutes. Finally, losing his temper, he roughly jerked the cap into place and struck the percussion cap a heavy blow with his fist. There was a crash that shook the very earth. The derrick and everything in it was blown to splinters. The men who had been watching the operation were instantly killed. Some time later another terrible accident happened. The moonlighter was a young fellow and noted for his careful work. The well he was to shoot had made a fine showing in the sand, and the owner confidently expected a gusher. The shot was started down, and everything seemed to be going all right. There were several men in the derrick, and a tool dresser stood waiting for the shot to reach the bottom of the well when the piece of iron he held in his hand, which was called the go devil, would be sent down to set it off. The moonlighter let the rope, which was stretched taut by the weight of the heavy shot, run through his hands. Suddenly the rope slackened. He knew only too well what that meant. The gas in the well was forcing the shot back out. "It is coming out! For God's sake help me catch it!" he yelled to the tool dresser. With a shriek the tool dresser fled, and the others, knowing their terrible danger, followed him. The shooter, prompted by the mad hope of catching the shell as it came out and thus averting the disaster, stuck to his post. There came a deafening explosion that reduced the derrick to a mass of kindling wood. The helter and engine were twisted wrecks. Strawn upon the ground were the mutilated remains of what had been so short a time before strong men. The moonlighter, who had tried with such desperate courage to save them, had been completely annihilated. Nitroglycerin is when handled in broad daylight and under most favorable conditions a dangerous article. How greatly the danger was increased by handling it as the moonlighters were compelled to may easily be understood. It was without doubt a most hazardous occupation, but the excitement connected with it, to say nothing of the large amount of money received for their services, proved irresistible to the reckless and daring fellows who became moonlighters.—Pittsburgh Dispatch.

The archer who misses the target turns to himself and not to another or the cause of his failure.—Confucius. A Glaring One. Teacher—In the sentence, "The sick boy loves his medicine," what part of speech is "love"? Johnny—It's a fib mum.—London Tit-Bits. Long Was Short. Manager—Did you collect that bill from old man Loug? Collector—No; he was in, but he was out.—Boston Transcript. The teacher asked, "Elsie, when do you say 'Thank you'?" Elsie's face lit up, for that was the one thing she knew, and she confidently answered, "When we have company."—Chicago Tribune.

Constituents of Dust. Among the constituents of dust floating in the air are lead, silver, copper, rubidium, calcium, indium, thallium, nickel, manganese, etc. Many of these can be traced to their sources in factory chimneys and flues. Dust from clouds, collected either by itself or in hail, snow, sleet or rain exhibits a regularity of composition not seen in other varieties of dust. Iron, nickel, calcium, copper, potassium and sodium always appear in it in about the same proportions. Some dust that fell some years ago near Dublin resembled meteorites in its composition, was attracted by a magnet and seemed to be of cosmic origin. Fraternal Order of Orioles. MARION, Ind., Aug. 18.—The annual national convention of the Fraternal Order of Orioles was opened in this city today with more than a thousand delegates and visitors in attendance. Organization was effected at the opening session this morning. Mayor Wilson welcomed the delegates and response was made by the national president, Fred J. Lachmies, of Buffalo. A big street parade will be given tomorrow. Thursday the convention will close with an excursion of the delegates to Gas City. As rheumatism is due to an excess of uric acid in the system, the only sensible, rational treatment is one that removes this poison. That is what Hollister's Rocky Mountain tea does. That's why it cures for good. Jones Drug Co.

HAIR TURNING GRAY OR FALLING? JUST MIX SAGE TEA AND SULPHUR. It's Grandmother's Recipe for Dandruff and Restoring Color to Hair. Almost everyone knows that Sage Tea and Sulphur, properly compounded, brings back the natural color and luster to the hair when faded, streaked or gray; also cures dandruff, itching scalp and stops falling hair. Years ago the only way to get this mixture was to make it at home, which is messy and troublesome. Nowadays skilled chemists do this better than ourselves. By asking at any drug store for the ready-to-use product—called "Wyeth's Sage and Sulphur Hair Remedy"—you will get a large bottle for about 50 cents. Some druggists make their own, but it's usually too sticky, so insist upon getting "Wyeth's," which can be depended upon to restore natural color and beauty to the hair, and is the best remedy for dandruff, dry, feverish, itchy scalp and stop falling hair. Folks like "Wyeth's Sage and Sulphur" because no one can possibly tell that you darkened your hair, as it does it so naturally and evenly, says a well-known downtown druggist. You dampen a sponge or soft brush and draw it through your hair, taking one small strand at a time. This requires but a few moments, by morning the gray hair disappears, and after another application or two is restored to its natural color and looks ever more beautiful and glossy than ever. HUNTLEY BROS. CO.

ROUND TRIP FARES -- FOR -- RINGLING BROS. CIRCUS .VIA "The EXPOSITION LINE---1915" Salem, August 23 FARES Oregon City to Salem and return \$1.50 Woodburn to Salem and return .70 All Other Points One and One-third Fare Tickets will be sold August 23rd from all points on the Main Line Oregon City to Eugene inclusive; from West Side points Corvallis to St. Joseph inclusive; also from points on the S. P. C. & W. and C. & E. Final return limit: Monday, August 25. Call on nearest agent for specific fares from any station, train service, etc. John M. Scott, General Passenger Agent, Portland, Oregon.

I. C. S. An Ethical Power. Now, gentlemen, just for a moment, I would speak to you, not as an educationalist, but as a preacher of manhood and a lover of his kind. The question of the use of alcohol by the student when studying has carried me back to the thought. The International Correspondence Schools are not simply educational; they are ethical; they not only make foremen and craftsmen and draftsmen, but they make MEN—in capital letters. For you can never awaken any one to his commercial possibilities without stirring up all other possibilities—social, patriotic, philanthropic, intellectual, moral. The moment you succeed breaking up one area of inertia you set vibration moving through every part of the being and all kinds of dormant and stagnant powers are set into healthy motion. When a man's mind gets engrossed with an intellectual occupation and he finds that he has a grip upon the laws and forces of the universe, the saloon, the vulgar and degrading show, the curb-stone loafing, and the hours of inane and ribald waste all seem to be unworthy of him and his self-respect clothes him in a protective armor which helps to keep his entire manhood inviolate. A great American preacher used to speak much about "the explosive power of a new affection," and, having as your life work the duty of both supplying and developing this "new affection"—the love of the best, by which the unworthy and base will be expelled, perhaps unconsciously but surely, from many and many a man. Success to you in your work! The Trained Man Never Worries. When the chiefs put their heads together to hire or "fire,"—the trained man doesn't worry. He knows that there is always a place for him. You can look your job and every man in the face if you possess the training so much in demand everywhere today. The International Correspondence Schools will go to you in your spare time, wherever you live, and will train you to become an expert in your chosen line of work. Such a training will forever take you off the "anxious" seat. It costs you nothing to find how the I. C. S. can help you. Mark the coupon opposite the occupation for which you have a natural liking, mail the coupon today, and the I. C. S. will send you facts showing how you can earn more money in the occupation of your own choice. INTERNATIONAL CORRESPONDENCE SCHOOLS H. H. HARRIS, Local Mgr. 505 McKay Building, Portland, Oregon. Explain without further obligations on my part, how I can qualify for the position before which I mark X. Salesmanship Electrical Engineer Electric Lighting Supt. F. WELSH CERTAIN HE WILL WIN GO

VANCOUVER, B. C., Aug. 18.—So sure is Freddy Welsh that he will repeat his former victory over world's champion Willie Richardson in the pair meet in this city for their twenty-round championship battle on Labor Day afternoon, that he is already going ahead with his plans for future matches based on a decision over the San Francisco champion. "I want the general public to know that if I win this title I am going to defend it every time a worthy opponent comes into view," declared Welsh. "First of all Packy McFarland can have his chance. I have already boxed with him 55 rounds, being the only lightweight that has ever dared tackle McFarland. I can easily make the 133 rindside, the American scale of weight, but if McFarland can do 135 at 6 o'clock, he can have the first chance at the title. Then, on every holiday I am ready to defend the title before the club offering the highest price." DRIVER HURT IN RUNAWAY. Wm. Burns, connected with Burns & Co., grocers, of Gladstone, was slightly injured Saturday when the team became frightened and ran away. NEW CURE FOR RHEUMATISM. Get the uric acid out of your system and your rheumatism will be cured. Meritol Rheumatism Powders are the most effective agency known for this purpose. You can buy them from any member of the American Drug and Press Association. Jones Drug Co.
