J. F. Wilmarth of LaMonta, Oregon. made a business trip here Tuesday. Marion Hopkins, a resident of Fal's City, made a business trip to this city

THE AUTUMN GIRL

Brocaded Suits Never Better Liked Than Now.

IN HUNTER'S GREEN BROCADE.

At the end of the season one's tailored suit is apt to look a bit the worse for wear, and the woman who is up to the minute in smartness is buying a new costume for the early autumn

She could not make a more modish selection than to purchase a suit like the one pictured of hunter's green brocaded cloth.

The deep cuffs and collar are fashionable features of this desirable cos-

A Wall street financier was talking about music. "I like all music," he said, "except such native and special sorts as the tomtom, the bagpipes or the India hufaa give off. Did you ever notice how a piper prances up and down as he pipes? He never sits, he never stands still, but up and down, round and round, to and fro, he struts continually. A little boy, listening to the weird skirl of the bagpipes of a street performer, once said to his father, 'Father, why does the piper keep on the move all the time he plays? I can't say, my boy, the father answered, 'unless it is to prevent any one getting the range with a cobble | Exchange.

KEEP YOUR EYE ON THE PITCHER

Infielders Know Where to Play as Ball Is Hurled.

LIGHT ON "INSIDE WORK."

It Takes Time to Master Plays That Often Mean Winning of Ball Games Watch For Catcher's Signals-Evers Is an Expert.

"Why don't those men on the infield move around more?" is a question often asked at a baseball game, mostly by people who are not regular patrons at the parks, when they happen to Misses Daisey and Desmond Cole, of take their eyes off the pitcher, catcher Grants Pass, who have been spending or batter to look at the men protecting the inner defense. What they see in this glance is a quartet of athletes. hands on their knees and eves steadfastly leveled at the man at the plate.

> This attitude causes the fans to ask that question. It is the attitude the infielders generally are in when the pitcher takes his position to pitch. What the four men do when the twirler is in the act of delivering the ball the enthusiasts seldom notice, for they take their eyes off the fielders and

> The infielders move around, probably not as much as the men occupying the outer garden, which may be the reason why the fans sitting in the stands do not observe it. When the catcher squats to give his signal to the hurler for a fast ball or curve each man on the infield watches and knows what is to be thrown. If the back stop has to hide his signal in such a way that the third baseman or shortstop cannot see they are informed through a code by the second baseman or first baseman. 'It is necessary that each man know so he can play accordingly.

> The way they shift also depends upon the batter. They may take a step or two to the right or left as soon as he sets himself for the flinger's offerings. They may even move farther than that. Often an infielder will shift from five to ten feet just because a certain player swats the ball through a certain section of the infield. Then when the ball is thrown the players will start to the right or left, according to whether the ball is thrown is a fast one or a curve.

Failure to observe this system closely has lost many a game and has cost clubs many runs. Manager Evers of the Chicago Cubs follows this method of our spelling and pronunciation. One probably closer than any other man in

If the Cubs' leader is watched closely class. it will be found that he starts toward first base when a ball is thrown to the outside of the plate by a right handed pitcher and toward second when the ball is over the center or on the inside. This enables him to make a quick start and also enables him to field batted balls that he probably would not come near getting if he did not obtain this teacher. one or two step advantage

WHEAT CRACK OUTFIELDER.

Bill Dahlen Says He Wouldn't Trade

Him For Any Other Man. Manager Bill Dahlen of the Brooklyn team declares that Zach Wheat is the most valuable outfielder in the National league. "There isn't anything

ZACH WHEAT, BROOKLYN'S STAR OUT-

he cannot do, and do it well, too," said Dahlen recently. "I wouldn't trade him for any other outfielder in the parent organization. Wheat can almost tell just what direction to go to get under the ball as soon as it is hit He covers as much if not more ground than any other outer gardener in the league, and he possesses a wonderful throwing arm.

"As a base runner he is one of the best in the game. Although he is not hitting as hard as he did last year or the one before, he is hitting when hits mean runs. No. sir, I would not part with him for any other outfielder, and that's saying some."

in Egypt a sarge proportion of the barbers are state functionaries. According to an edict issued by Ibrahim Pasha in 1848, every village barber was ordered when death occurred in his district to make a careful examination of the corpse and report to the authorities any death occurring through epidemic, disease or foul play. Severe penalties were imposed for any neglect of this duty, and a fee of 5 cents was paid for each death registered. Some years ago the system of payment by fees was abolished, and each village barber now draws from the government a fixed salary for his services .-

Joseph E. Willard Is New Minister to Alfonso's Realm

OSEPH E. WILLARD is the new minister to Spain. He'll very likely be made an ambassador shortly, for a bill was introduced in congress to raise the Madrid station to an embassy. Mr Willard, like so many others of President Wilson's appointees, is a southerner. His home is in Richmond, Va., where he is a lawyer of note. He has served his state in mentally organized her work. Whether official capacity and was a stanch supporter of the president. Mr. Willard she moves about in her own house or planned to take up his duties abroad at once.

SNARES IN ENGLISH.

Pazzles For Foreigners Who Are Learning the Language.

It is hard for the person to whom English is his native tongue to realize what a struggle the foreigner has to understand some of the peculiarities foreigner gives the following description of his first lesson in an English

We have been given a book to learn the letters. I arrive at the class, having learned them perfectly.

Soon, in the course of the lesson, we have the word 1-o-w. "Love," I pronounce it, thinking the w has the sound of v. "No; it is pronounced 'lo.' " says the

"Then why is the

quire, mystified, "It is there because that is the way the word is spelled," responds the teacher, "but it is silent. Never mind why; it is sufficient to know that it is

Before long we come to n-o-w. "Pronounce it." says the teacher. "No." I reply.

there.

"Why will you not?" she asks me. It is some time before she understands that I am trying to pronounce the word when I say "No." Then she declares that, although 1-o-w is lo, n-o-w

"If you want to make it no," she explains kindly, "you put k before it." You may believe I am bewildered. However, I memorize that n-o-w is The next word is s-n-o-w. I pronounce it like now with an s be-. fore it. The teacher laughs. The w is again become silent, apparently for no reason, and the word is called sno.

But that is not all. Later I find that if you drop the n from snow you can pronounce it whichever way you like .-Youth's Companion.

Provisional Government, "Father," said the small boy, "what

is a provisional government?" "Well, my son, my impression in a general way is that a provisional government is one that has to keep hustling from day to day for provisions,"-Washington Star.

Too Much Busy-ness

Falstaff's saying. "It were better to be eaten to death with rust than scoured to nothing with perpetual motion," comes to mind when one notes the many busy-nesses of the modern'

woman. "Rushed to death!" she cries. "So much to do, so little time," and away she patters to attend a committee meeting or address a convention or "see somebody" about something. And it never occurs to her that this old world would wag along just the same if she did none of these things-in fact, she would be highly indignant were such an insinuation made.

Well, as a matter of fact, women do accomplish many good works. But they haven't as yet acquired the art of doing things without bustle and fuss as men do. They spend too much energy in getting ready to do things; they flutter too much. The empty wagon makes a lot of noise; the load-

ed wagon goes quietly. The woman of real executive ability goes about her duties quietly; she has engages in outside endeavors, she is calm and composed-and effective. She has, moreover, a sense of proportion which enables her to recognize how much of her energy and time can pro-

fitably be given to any one thing. You will find that the really efficient woman is not busy with her busy-nesses all the time. She knows the value of leisure and that hurry and haste never produce the best re sults.

And quite often she is called upon to repair the results of overhaste or ill judged action on the part of those who act first and think afterward.

To clean strainers and sieves rub with coarse salt and then pour boiling water through them.

One of the Queer Things.

"There are many queer things in connection with human existence," says the professor in the Fliegende Blatter "Thus Ishave discovered that by multiplying the numerals which indicate the date of my birth by my telephone number and subtracting the age of my mother-in-law the final result will be

PEAR BLIGHT IS

WASHINGTON, D. C., Aug. 19.-The department of Agriculture has received notice by telegraph from citizens in the state of Washington that play grounds of the Oregon Agriculturcertain people are spreading the idea al Col'ege has been 75 percent comthat the pear blight is not a bacterial inleted, according to statements given

be dealt with by cutting out the diseased portions of trees is not an ef-

fective measure. In the fear that these unscientific opinions may stop orchardists from following the highly successful practical measures recommended by federal specialists, and thus lose their own orchards and spread the disease among neighboring orchards, the department has issued the following special statement:

"That pear blight is a bacterial diseast of the pear tree is not open to question. The scientists have clearly established the existence of these bac teria by means of microscopis examination, and have reproduced the disease by inoculating fruit and trees with them. The germ is the bacillus amylovorus. It is an oval-shaped body, and is 1-18000 of an inch long and 1-25000 of an inch across, and can be clearly seen with a high power mi-

"Moreover, the scientists have raised these bacteria in their laboratories and have used them a large number of times in experiments to infect healthy trees and fruit. Wherever this bacillus has been introduced into a health; tree or fruit the pear blight has fol-lowed. The scientists also have proved that the pear blight can be municated from the blossoms of an affected tree to healthy trees by bees and other insects, and that the blight that is held over through the winter can be communicated to healthy portions of the same tree or to other trees by flies or other insects.'

Rich milk, malted grain, in powder form. More healthful than tea or coffee. For infants, invalids and growing children. Agrees with the weakest digestion. Pure nutrition, upbuilding the whole body. Keep it on your sideboard at home. the nursing mothers and the aged. A quick lunch prepared in a minute.

I. C. S. An Ethical Power

an educationalist, but as a preacher of manhood and a lover of his kind. The question of the use of alchohol by the student when studying, has carried me back to the thought. The International Correspondence Schools are not simply educational, they are ethical; they not only make foremen and craftsmen and draftsmen, but they make MEN-in capital letters. For you can never awaken any one to his commercial possibilities without stirring up all other possibilities—social, patriotic, philanthropic, intellectual, moral. The moment you succeed breaking up one area of inertia you set vibration moving through every part of the being and all kinds of dormant and stagnant powers are set into healthy motion. When a man's mind gets engrossed with an intellectual occupation and he finds that he has a grip upon the laws and forces of the universe, the saloon, the vulgar and degrading show, the curb-stone loafing, and the hours of inane and ribald waste all seem to be unworthy of him and his self-respect clothes him in a protective armor which helps to keep his entire manhood inviolate. A great American preacher used to speak much about "the expulsive power of a new affection," and, having as your life work the duty of both supplying and developing this "new affection"—the love of the best, by which the unworthy and base will be expelled, perhaps unconsciously but surely, from many and many a man. Success to you in your work

The Trained Man Never Worries

When the chiefs put their heads together to hire or "fire,"—the trained man doesn't worry. He knows that there is always a place for

You can look your job and every man in the face if you possess the training so much in demand everywhere a today. The International Correspondence Schools will go to you in your spare time, whereever

you live, and will train you to become an expert in your chosen line of work. Such a training will forever take you off the "anxious" seat. It costs you nothing to find how the I. C. S. can help you. Mark the coupen opposite the occupation for which you have a natural liking, mail the coupon today, and the I. C. S. will send you facts showing how you can earn more money in the occupation of your cwn choice.
