I. C. S. An Ethical Power

Now, gentlement, just for a moment, I would speak to you, not as an educationalist, but as a preacher of manhood and a lover of his kind. The question of the use of alchohol by the student when studying, has carried me back to the thought. The International Correspond-ence Schools are not simply educational, they are ethical; they not MEN-in capital letters. For you can never awaken any one to his commercial possibilities without stirring up all other possibilities-so cial, patriotic, philanthropic, intellectual, moral. The moment you succeed breaking up one area of inertia you set vibration moving through every part of the being and all kinds of dormant and stagnant powers are set into healthy motion. When a man's mind gets engrossed with an intellectual occupation and he finds that he has a grip upon the laws and forces of the universe, the saloon, the vulgar and degrading - ow, the curb-stone loafing, and the hours of inane and ribald waste -.ow, the curb-stone loating, and the hours of inane and ribaid waste all seem to be unworthy of him and his self-respect clothes him in a protective armor which helps to keep his entire manhood inviolate. A great American preacher used to speak much about "the expulsive pow-er of a new affection," and, having as your life work the duty of both supplying and developing this "new affection"—the love of the best, by which the unworthy and here will be available archive unconsciously which the unworthy and base will be expelled, perhaps unconsciously but surely, from many and many a man. Success to you in your work!
