He will spend a few days in Portland before returning home. Born, to the wife of George Schultz, a daughter, Monday. Mr. and Mrs. E. W. Scott and children, returned Monday after a week's auto trip to Trout Lake, Wash. They report a very pleasant time. A. W. Lambert, a well known capitalist of Portland, was in Oregon City Tuesday.

DIVORCE IS FILED

Suit for divorce on the grounds of desertion was filed in the Circuit court Tuesday by Blinck D. Roges against Ella N. Roges. They were married at Denver Denver, August 15, 1904.

CURRENT LEAPS 40 FEET UP STEEL TAPE

Manford A. Hosey, aged 37, bridge carpenter, employed by the Portland Railway, Light & Power company on the construction of the new bridge over the Estacada cartracks near Willburg, was killed Tuesday morning when his steel tape with which he was measuring while at his work came in contact with a cable carrying 30,000 volts. The entire voltage passed through his body as he was sitting on a steel beam. Hosey did not think that his tape would touch the cables, which ran 40 feet below the position where he was working. Workmen rescued him from his precarious position and Dr. Ralph Fisher, of the streetcar company, rushed to the scene in a special car carrying a high-power pulmotor with which it was hoped to restore life. The ambulance Service company sent a machine to Hosey's aid, but the body was taken to the morgue. Hosey lived at 42 East Seventy-second street north Portland and leaves a family. He was well known in Oregon City where he had worked for a number of years. Among his relatives are James A. Hosey, of Oregon City; Mrs. Ella Brumbeugh, of Oswego, and Mrs. Chuck of Montavilla.

Premier Lays Corner Stone

TORONTO, Ont., Aug. 26.—The corner stone for Toronto's new technical high school which is designed to be one of the most complete and best equipped institutions of its kind in America, was laid this morning by Premier Borden.

Race Meeting at Ottawa

OTTAWA, Ont., Aug. 26.—Everything is in readiness for the opening here tomorrow of the summer race meeting of the Connaught Park Jockey club. With the track in excellent condition and the stables filled with the speediest horses seen on the Canadian circuit this year, the officials of the club are looking forward to seven days of good sport.

SWEDISH LADIES TO MEET

The Swedish Ladies of Oregon City will meet at the home of Fred Erickson, Jackson St., near Seventh St., tomorrow, Thursday afternoon, Aug. 28, at 2 o'clock. The Rev. John Oval from Portland, and others will be present. All are most cordially invited to attend.

During the three summer months

the farm laborer in Sweden works on an average of ten and one-half hours a day, providing he pays for his board and room in addition. Unmarried women working on the farm receive an average yearly wage of from \$50 to \$60, with board and room.

Cotton Mills Resume Work

FALL RIVER, Mass., Aug. 25.—The seven cotton mills of the Fall River Iron works, which have been idle for more than three months because of the condition of the market resumed operations today. The resumption of work gives employment to about 5,000 persons who have been idle through the summer.

PUTS SPEAKER ON TOP.

Washington's Pilot Says Boston Player is Greatest Ever. This Speaker is the greatest outfielder the game has ever produced, according to Manager Clark Griffith of the Washington team. In all his many years' experience, Griffith says, he has never seen an outfielder who is classed with Speaker.

"Speaker is the only outfielder I have ever seen who knows how to play center field," remarked Griffith. "He can go to either side for drives which no other fielder would reach, while it is next to impossible to drop a Texas leaguer into his territory. What is more, he is right behind every play on

Photo by American Press Association.

TRIS SPEAKER

the infield and saves his team many runs by backing up properly. "I have seen all the great fielders of the past twenty-five years, and I must confess that not a single one of them can be classed with Speaker. He is really the whole Boston team. Without him Boston would have a hard time finishing in the first division. It was Speaker who won the pennant for the Red Sox last season. He is one of the most marvelous players that the game has ever produced, and there is not a fielder in the game today who can hold a candle to him."

Whiskers.

"Whiskers" was a word formerly used to designate the hair on the upper lip. Scott more than once speaks of "whiskers on the upper lip," and so does Defoe in "Robinson Crusoe." Johnson defined a "whisker" as "the hair growing on the upper lip or cheek unshaven, a mustache." It seems to have taken its name from a fancied resemblance to a small brush, to "whisk" properly meaning to sweep, and a "whisker" having been a particular kind of feather brush; also, in the slang of a former time, a switch or rod. In the seventeenth century a "whisker" signified, among other things, a brazen lie, a "whopper."

UNIQUE NAME

Can You Pronounce Name of World's Most Famous CATARRH Remedy?

High-o-me—that's the proper way to pronounce HYOMEI, the sure breathing remedy that has rid tens of thousands of people of vile and disgusting Catarrh. Booth's HYOMEI is made of Australian eucalyptus combined with thymol and some listerian antiseptics and is free from cocaine or any harmful drug. Booth's HYOMEI is guaranteed to end the misery of Catarrh or money back. It is simply splendid for Croup, Coughs or bronchitis. Complete outfit, including hard rubber inhaler, \$1.00. Extra bottle of HYOMEI, if later needed, 50 cents at Humbley Bros. and druggists everywhere. Just breathe it—no stomach dosing.

HUNTLEY BROS., Druggists

EVEN THE MOST PRACTICAL FROCK SHOWS SOME SMART TOUCH IN GIRL OR FRILL AND FOR THE SMALL MAID, THERE IS NOTHING SO FASHIONABLE AS THE LOW-BELTED EFFECTS.

There is nothing you can make so easily as the simple little wash dress of gingham, or linen, or even the inexpensive chambray. Choose a model like 7663, that, save for its smart, little tab at the side-front is perfectly plain. There is style, though to the drop-shoulder blouse, and not of novelty in the notch of the side-front and side-back seams of the skirt. The latter fabric washes and wears splendidly, and economical mothers have always realized this and used it for play time frocks. The blouse of this frock slips on over the head, and is made with a deep pointed yoke that may be laced together in front. Below this there is a panel, with a corresponding panel on the skirt, which gives a line that is most harmonious. The skirt is attached to an under-trait, which may be faced with contrasting material in shield effect. Patterns for this dress are obtainable in five sizes, 6 to 14, and for the 12-year-old girl, 4 yards 36-inch material will be required, with 1/2 yard for under-waist—15 cents. Middy Style Popular. You will get equally good results from making little daughter's dress by

The Best Food-Drink Lunch at Fountains

Insist Upon ORIGINAL GENUINE HORLICK'S

Avoid Imitations—Take No Substitute. Rich milk, malted grain, in powder form. For infants, invalids and growing children. Pure nutrition, upbuilding the whole body. Especially for nursing mothers and the aged. More healthful than tea or coffee. Agrees with the weakest digestion. Keep it on your sideboard at home. A quick lunch prepared in a minute.

TREATING A DOG BITE.

Act Promptly and There is Little Danger of Hydrophobia. If you should be bitten by a dog suspected of rabies don't get scared, but act promptly. Immediately apply a tourniquet above the wound. No tourniquet being at hand, use a handkerchief or necktie, twisting it tightly with a stick. The poison should then be sucked out and the wound cauterized as soon as possible. If it is believed the dog was mad the Pasteur treatment should be resorted to. Only two-tenths of 1 per cent of those who take this treatment develop hydrophobia. Although the germ of rabies has not been demonstrated, it is generally conceded the disease has a specific germ. Rabies never occurs in the human spontaneously, but always by inoculation. It is also moderately well demonstrated that dogs and other animals likewise contract the disease through inoculation. Many more male than female dogs go mad. The reason given for this is that male dogs fight among themselves, but a male seldom bites a female. The proportion is seven mad males to one mad female. Contrary to popular belief, rabies is more common in a temperate zone than in the tropics or the arctic region and in spring and fall than in summer and

I am a power for great good if you do not abuse my use. In cases of need—I do my work well. I am a builder up of health and strength—in the hospital or in the home. For the invalid or the convalescent—for the tired or overworked I offer a great help. A little of me goes a long way. I have been among you for three generations.

I'm known as Cyrus Noble throughout the world. W. J. Van Schuyver & Co., General Agents Portland, Oregon

Fruit for Sale

1500 boxes of peaches. 500 boxes of apples. 200 boxes of pears. Peaches will be ready for market about Sept. 1st; pears about Sept. 15th; apples, various kinds Sept. 1st to Oct. 1st. Apply at ranch or order by phone or mail. Frank Robertson, P. O. address, Clackamas, Ore., R. F. D., phone address, Oregon City, 17x1. (old Brethaupt ranch).

KEEP HOUSE COOL

Ways of Preventing the Summer Home From Becoming Hot. LET IN THE GOOD NIGHT AIR.

It is Particularly Important That Attic and Cellar Should Have Proper and Sufficient Ventilation—Neglect of This Causes Trouble.

Keeping the house cool in summer is not always an easy problem to solve. People who have large houses and money enough to equip them with electric fans and other appliances can, of course, keep very comfortable, but it is more difficult to manage it in small houses. Windows must be shaded with blinds, shutters or awnings and be well screened. All the heavy hangings should be removed and where possible the carpets should be taken up and cool colors, such as white, gray, light greens and blues, should take the place of the warmer colors. Then white muslin curtains soften the light, though many people object to even that much drapery.

The coolest hours of summer are the night hours. Therefore the night air should be allowed to circulate freely through every part of the house. The best circulation is obtained by having windows open at the top and bottom instead of entirely at the bottom. This lets out the hot air and lets in the cool.

When this method is followed put the screen in the lower sash of one window of each room and in the upper sash of another.

As it is important that sunlight, too, should enter the house at some time of the day, open all the blinds and windows in the early morning for a little while. Then darken the house for the rest of the day.

It is especially important that the attic and cellar should have proper ventilation. In the former a skylight or window should be kept open night and day; except, of course, when it rains. The cellar windows should be open only at night when it is comparatively cool. Open them at sundown and close them at 8 o'clock in the morning. Neglect of this method of airing the cellar causes a great deal of trouble during the hot weather. If the windows are not closed during the heat of the day the warm, moisture laden air enters the cellar and condenses on walls, pipes, metals, etc. The colder the surface the greater will be the amount of moisture that will condense upon it, and a few days of neglect will make the cellar so damp that it will not be a suitable place for keeping food.

Antiquity of Tobacco.

The cultivation and use of tobacco are of such antiquity that authentic history does not record their beginnings. The claims of certain European and Asiatic countries to an acquaintance with the plant prior to the discovery of America by Columbus are not supported by accepted history nor satisfactorily demonstrated by the researches of the antiquarian or the archeologist. It is fairly well settled that tobacco is indigenous to the western hemisphere and that the aborigines practiced its cultivation and use from remotest times and spread their knowledge to the rest of the world.—Washington Star.

Pythians at Trinidad

TRINIDAD, Colo., Aug. 26.—Three days of interest in Pythian circles were ushered in here today with the opening of the annual grand lodge session of the Uniformed Rank of the Knights of Pythias. Members of the order from all parts of Colorado are in attendance. General Burdick and his staff arrived in the city this morning and were escorted to the headquarters camp in Central park. This afternoon the great parade took place. The competitive drills will be held tomorrow and on Thursday the gathering will close with the election and installation of the grand lodge officers.

I. C. S. An Ethical Power

Now, gentlemen, just for a moment, I would speak to you, not as an educationalist, but as a preacher of manhood and a lover of his kind. The question of the use of alcohol by the student when studying, has carried me back to the thought. The International Correspondence Schools are not simply educational, they are ethical; they not only make foremen and craftsmen and draftsmen, but they make MEN—in capital letters. For you can never awaken any one to his commercial possibilities without stirring up all other possibilities—social, patriotic, philanthropic, intellectual, moral. The moment you succeed breaking up one area of inertia you set vibration moving through every part of the being and all kinds of dormant and stagnant powers are set into healthy motion. When a man's mind gets engrossed with an intellectual occupation and he finds that he has a grip upon the laws and forces of the universe, the saloon, the vulgar and degrading—now, the curb-stone losing, and the hours of idleness and ribald waste all seem to be unworthy of him and his self-respect clothes him in a protective armor which helps to keep his entire manhood inviolate. A great American preacher used to speak much about "the explosive power of a new affection," and, having as your life work "the duty of both supplying and developing this "new affection"—the love of the best, by which the unworthy and base will be expelled, perhaps unconsciously but surely, from many and many a man. Success to you in your work!

The Trained Man Never Worries

When the chiefs put their heads together to hire or "fire,"—the trained man doesn't worry. He knows that there is always a place for him. You can look your job and every man in the face if you possess the training so much in demand everywhere today. The International Correspondence Schools will go to you in your spare time, wherever you live, and will train you to become an expert in your chosen line of work. Such a training will forever take you off the "anxious" seat. It costs you nothing to find how the I. C. S. can help you. Mark the coupon opposite the occupation for which you have a natural liking, mail the coupon today, and the I. C. S. will send you facts showing how you can earn more money in the occupation of your own choice.
